

Gopala Rao Bandi

Data Analyst

CA, USA • Phone: +1 (334) 220-7348 • Email: bandigopalarao97@gmail.com • [LinkedIn](#)

Professional Summary

Data Analyst with over **5 years of experience** transforming complex datasets into actionable insights across healthcare, finance, and retail sectors. Reduced reporting time by 50% through optimized SQL queries and automated Power BI dashboards, driving \$2M in operational efficiencies, functional collaboration, and improved key performance indicators. Implemented machine learning models for forecasting trends and delivering impactful solutions in fast-paced environments.

Technical Skills

- **Programming & Query Languages:** Python (Pandas, NumPy, SciPy, Scikit-learn, XGBoost, Seaborn, Matplotlib, Statsmodels), R (dplyr, ggplot2, caret, tidyverse), SQL (PostgreSQL, MySQL, SQL Server, SQLite), SAS
- **Data Engineering & ETL Tools:** Apache Airflow, Apache Kafka, AWS Glue, Azure Data Factory, DBT (Data Build Tool), SSIS, Talend, Informatica, Alteryx, Data Wrangling, Batch Scheduling, Python-based ETL Development
- **Business Intelligence & Reporting Tools:** Tableau, Power BI, Looker, Qlik Sense, **Google Data Studio**, SSRS, Microsoft Excel (Pivot Tables, Macros, VLOOKUP, Data Models), SAP BusinessObjects
- **Data Warehousing & Storage:** AWS Redshift, Azure Synapse Analytics, Snowflake, BigQuery, S3, Google Cloud Storage
- **Cloud Platforms & Services:** AWS (EC2, S3, Glue, Redshift, Lambda, RDS, CloudWatch, IAM, CloudFormation), Azure (Synapse, Data Factory, Databricks, Blob Storage, Azure SQL, Cosmos DB, Functions), GCP (BigQuery, Cloud Functions, Pub/Sub), SaaS Platforms
- **Analytics & Machine Learning:** Predictive Modeling, Classification, Regression, Forecasting, Clustering, Time Series Analysis (ARIMA, Prophet), A/B Testing, Statistical Analysis, Data Mining, Anomaly Detection, PCA, Feature Engineering
- **Data Quality, Governance & Compliance:** Data Profiling, Data Cleansing, Data Lineage, Data Cataloging, Metadata Management, HIPAA, GDPR, CMS, Joint Commission, SOX, PCI-DSS
- **DevOps, CI/CD & Version Control:** Git, GitHub, GitLab, Bitbucket, Jenkins, Docker, Terraform, JIRA, Confluence, Visual Studio Code, PyCharm
- **Tools & Collaboration Platforms:** Jupyter Notebooks, VS Code, Excel, Google Workspace, Slack, SharePoint, MS Teams, Confluence, Notion
- **Project Management & Methodologies:** Agile, Scrum, Waterfall, Kanban, SDLC, Requirements Gathering, Stakeholder Communication

Professional Experience

Data Analyst, United Health Group, CA, USA

Feb 2024 – Present

- Engineered advanced SQL queries, CTEs, and window functions in Snowflake to analyze millions of claims, EHR, and financial records, reducing data delivery time by 30% for provider performance and clinical outcome reviews.
- Developed interactive Power BI and Tableau dashboards to visualize healthcare KPIs (HEDIS, Stars Ratings, CAHPS, readmission rates), supporting CMS and NCQA reporting and improving operational efficiency by 20%.
- Built automated ETL pipelines using Python (Pandas, NumPy) and SQL, merging data from Epic, Cerner, and OptumRx, streamlining care gap identification and population health reporting across 10+ regions.
- Collaborated with actuarial and clinical teams to monitor risk adjustment models, RAF scores, and medical loss ratio metrics, improving alignment with value-based care contracts by 15%.
- Applied predictive modeling (logistic regression, decision trees, XGBoost) to identify high-risk patients, forecasting hospital admissions and increasing outreach impact by 25%.
- Created automated alert systems for fraud detection and case management using stored procedures and dynamic SQL, reducing manual oversight by 18 hours weekly.
- Conducted root cause analysis of claims denials and reimbursement discrepancies, improving first-pass claim resolution rates by 20% across multiple payer systems.
- Authored data dictionaries, BRDs, and SOPs, streamlining compliance audits and reducing knowledge-sharing time by 15 hours per cycle.

Data Analyst, Hexaware Technologies, India

Mar 2020 – Jul 2022

- Optimized T-SQL queries, stored procedures, and CTEs in SQL Server, reducing execution time for financial queries by 50% and enabling real-time analytics for banking and insurance clients.
- Designed ETL pipelines using SSIS and Python scripts to ingest data from flat files, APIs, Oracle DB, and AWS S3, ensuring data readiness for high-volume reporting.
- Built scalable data warehouse structures with fact and dimension tables, improving query performance by 40% for client reporting needs.
- Developed Power BI dashboards to track SLA performance, loan cycles, and audit flags, increasing executive visibility by 60% and supporting Basel III compliance.
- Collaborated with QA and DevOps teams in Agile/Scrum to implement testing plans for ETL validation and schema consistency, achieving 99.9% data accuracy.
- Conducted data profiling and cleansing with T-SQL and Python, supporting regulatory submissions and reducing risk modeling errors by 15%.
- Led data migration projects to Azure Synapse and AWS RDS, documenting transformation logic and ensuring zero data loss during system modernization.

Data Analyst, Genius SoftTech, India

Jul 2019 – Feb 2020

- Analyzed retail and e-commerce datasets using SQL, Python (Pandas, NumPy), and Excel, identifying operational inefficiencies and boosting revenue opportunities by 10%.
- Deployed Power BI dashboards to monitor KPIs (order-to-ship time, cart abandonment, NPS), reducing decision-making time by 20 hours monthly.
- Built ETL pipelines with Python and SQL to integrate Salesforce, SAP ERP, and REST API data, improving report accuracy by 50%.
- Collaborated with stakeholders to define KPIs and create BRDs, FRDs, and user stories, aligning data models with business requirements.
- Applied predictive analytics (linear regression, K-means clustering) to forecast demand and segment customers, increasing campaign effectiveness by 15%.
- Conducted data validation and cleansing, accelerating BI deliverable timelines by 25% through improved data reliability.

Data Analyst Intern, Genius SoftTech, India

Jan 2019 – Jun 2019

- Extracted and transformed data using SQL and Excel Power Query for healthcare and IT analytics, supporting client deliverables and internal projects.
- Developed Tableau dashboards to visualize campaign effectiveness and SLA performance, enabling proactive account management and saving 12 hours weekly.
- Conducted exploratory data analysis to detect outliers and quality issues, shaping client-specific reporting frameworks and improving data reliability by 20%.
- Automated Excel-based reports with VBA macros, streamlining project delivery and invoice accuracy, reducing manual effort by 10 hours weekly.

Education**Masters in Information Technology**

Aug 2022 – Dec 2023

Auburn University at Montgomery, AL, USA

- Relevant Coursework: Data Mining, Cloud Computing, Advanced Database Systems, Machine Learning

Bachelor of Technology in Electronics and Communication Engineering

Aug 2016 – May 2020

Lovely Professional University, Phagwara, India

- Relevant Coursework: Data Structures, Algorithms, Database Management Systems
