

Bandi Gopala Rao | Data Analyst

CA, USA | +1 (334) 220-7348 | bandigopalarao97@gmail.com | [LinkedIn](#)

SUMMARY

Detail-oriented and results-driven **Data Analyst** with over **5 years of experience** in transforming complex data into actionable insights to support strategic decision-making and performance optimization. Skilled in **SQL development**, **ETL processes**, and **data visualization** using tools like **Power BI**, **Tableau**, and **Python**. Proven ability to develop scalable data pipelines, design intuitive dashboards, and implement predictive models for trend analysis and business forecasting. Adept at collaborating with cross-functional teams, gathering requirements, and delivering data-driven solutions in dynamic, fast-paced environments.

TECHNICAL SKILLS

Programming & Query Languages: Python (Pandas, NumPy, SciPy, Scikit-learn, XGBoost, Seaborn, Matplotlib, Statsmodels), SQL (PostgreSQL, MySQL, SQL Server, SQLite)

Data Engineering & ETL Tools: Apache Airflow, Apache Kafka, AWS Glue, Azure Data Factory, DBT (Data Build Tool), SSIS, Talend, Informatica, Alteryx, Data Wrangling & Transformation, Batch Scheduling, Python-based ETL Development

Business Intelligence & Reporting Tools: Tableau, Power BI, Looker, Qlik Sense, Microsoft Excel (Pivot Tables, Macros, VLOOKUP, Data Models), Google Data Studio, SSRS

Data Warehousing & Storage: AWS Redshift, Azure Synapse Analytics, Snowflake, BigQuery, S3, Google Cloud Storage

Cloud Platforms & Services: Amazon Web Services (EC2, S3, Glue, Redshift, Lambda, RDS, CloudWatch, IAM, CloudFormation) Microsoft Azure (Synapse, Data Factory, Databricks, Blob Storage, Azure SQL, Cosmos DB, Functions) Google Cloud Platform (BigQuery, Cloud Functions, Pub/Sub)

Analytics & Machine Learning: Predictive Modeling, Classification & Regression, Forecasting, Clustering, Time Series Analysis (ARIMA, Prophet), A/B Testing, Statistical Analysis, Data Mining, Anomaly Detection, PCA, Dimensionality Reduction, Feature Engineering

Data Quality, Governance & Compliance: Data Profiling, Data Cleansing, Data Lineage, Data Cataloging, Metadata Management, Master Data Management, HIPAA, GDPR, CMS, Joint Commission, SOX, PCI-DSS

DevOps, CI/CD & Version Control: Git, GitHub, GitLab, Bitbucket, Jenkins, Docker, Terraform, JIRA, Confluence, Visual Studio Code, PyCharm

Tools & Collaboration Platforms: Jupyter Notebooks, VS Code, Excel, Google Workspace, Slack, SharePoint, MS Teams, Confluence, Notion

Project Management & Methodologies: Agile, Scrum, Waterfall, Kanban, SDLC, Requirements Gathering, Documentation, Stakeholder Communication

PROFESSIONAL EXPERIENCE

United Health Group, CA, USA	Feb 2024 - Current
Data Analyst	
- Designed and executed advanced SQL queries, CTEs, and window functions in Snowflake to analyze millions of rows of claims, EHR, and financial data, improving data delivery for provider performance and clinical outcome reviews. - Developed and maintained interactive dashboards in Power BI and Tableau to visualize key healthcare KPIs including HEDIS, Stars Ratings, CAHPS scores, readmission rates, and chronic condition management, supporting internal operations and external reporting to CMS and NCQA. - Built automated ETL pipelines using Python (pandas, NumPy) and SQL to extract, normalize, and merge data from Epic, Cerner, and OptumRx, streamlining care gap identification and population health reporting across 10+ regions. - Partnered with actuarial, clinical, and care coordination teams to define and monitor risk adjustment models, RAF scores, medical loss ratio (MLR), and utilization review metrics, enabling better alignment with value-based care contracts. - Applied predictive modeling techniques (logistic regression, decision trees, XGBoost) to identify high-risk patients, forecast hospital admissions, and prioritize interventions, increasing outreach impact by 25%. - Created and scheduled automated alert systems for fraud detection, denial tracking, appeal escalation, and case management triggers using stored procedures, views, and dynamic SQL. - Conducted root cause analysis of claims denials, delays, and reimbursement discrepancies, contributing to a 20% improvement in first-pass claim resolution rates across multiple payer systems. - Produced robust technical documentation including data dictionaries, BRDs, data lineage diagrams, and SOPs, supporting governance, compliance audits, and cross-department knowledge sharing.	
Hexaware Technologies, India	Mar 2020 – Jul 2022
Data Analyst	
- Developed, optimized, and maintained complex T-SQL queries, stored procedures, common table expressions (CTEs), and user-defined functions (UDFs) across client-facing SQL Server environments, reducing execution time for key financial queries by 50%. - Designed, deployed, and monitored ETL pipelines using SQL Server Integration Services (SSIS) and custom Python scripts to automate data ingestion from flat files, APIs, Oracle DB, and cloud platforms (AWS S3, Azure SQL), ensuring real-time analytics readiness. - Built and maintained scalable data warehouse structures including fact and dimension tables, indexing strategies, and partitioning logic, supporting high-volume reporting needs for banking and insurance clients. - Developed Power BI dashboards and paginated reports to track SLA performance, loan application cycles, claims processing times, and audit flags, improving executive visibility and compliance reporting. - Partnered with QA, data engineering, and DevOps teams in Agile/Scrum environments to design and implement testing plans for SQL modules, ETL validation, and schema consistency checks. - Conducted data profiling, anomaly detection, and cleansing operations using T-SQL and Python (pandas, NumPy) to support regulatory submissions, risk modeling, and Basel III compliance projects. - Led data migration projects during system modernization efforts, including data mapping, transformation logic documentation,	

and validation from legacy to cloud-native SQL environments (Azure Synapse, AWS RDS).

- Authored comprehensive documentation including **data dictionaries**, **ER diagrams**, **technical SOPs**, and contributed to stakeholder meetings for **requirement gathering**, **UAT sign-off**, and **solution handover**.

Genius SoftTech, India

Jul 2019 – Feb 2020

Data Analyst

- Analyzed client data ecosystems using **SQL**, **Python (Pandas, NumPy, SciPy)**, and **Excel** to identify data anomalies, operational inefficiencies, and hidden business opportunities across retail, logistics, and e-commerce domains.
- Designed and deployed dynamic **Power BI dashboards** to monitor KPIs such as order-to-ship time, regional revenue, cart abandonment rate, churn rate, NPS, and fulfillment accuracy, improving decision-making and client reporting.
- Built robust and reusable **ETL pipelines** using Python scripts and SQL procedures to integrate datasets from **Salesforce**, **SAP ERP**, **REST APIs**, and legacy DBMS, reducing data latency and improving report accuracy by 50%.
- Collaborated with stakeholders, QA engineers, and data architects to translate business requirements into scalable data models, defined KPIs, and created documentation including **BRDs**, **FRDs**, and **user stories**.
- Applied **predictive analytics techniques** such as linear regression, time series analysis, logistic regression, and K-means clustering to forecast demand, identify high-risk customers, and drive segmentation strategies.
- Conducted **data validation, cleansing, and profiling** as part of data readiness checks, improving data reliability and accelerating project timelines for BI deliverables.
- Participated in **client delivery lifecycle** including requirement workshops, sprint reviews, and backlog grooming while adhering to Agile methodologies for data-driven project execution.
- Led **user acceptance testing (UAT)**, developed detailed SOPs, and conducted end-user training sessions to support successful deployment and adoption of analytics solutions across client operations.

Genius SoftTech, India

Jan 2019 – Jun 2019

Data Analyst Intern

- Extracted and transformed raw business and operational data using **SQL queries**, **Excel Power Query**, and manual logic to support internal analytics projects and external client deliverables across healthcare and IT services clients.
- Developed interactive **Tableau dashboards** to visualize campaign effectiveness, user engagement, SLA performance, and client satisfaction trends, enabling proactive account management and resource allocation.
- Conducted **exploratory data analysis (EDA)** to detect data quality issues, outliers, and underperformance in client datasets; assisted in shaping reporting frameworks tailored to client-specific metrics.
- Participated in **business requirement gathering sessions**, contributed to drafting **data dictionaries**, **process flow diagrams**, and **functional specs** used to guide downstream report and dashboard development.
- Automated weekly and monthly Excel-based reports with VBA macros and formulas, streamlining manual workflows for project delivery tracking, invoice accuracy, and utilization metrics.
- Collaborated with QA and data governance teams to conduct **data validation**, reconciliation, and metadata management, ensuring consistency across production dashboards and source systems.

EDUCATION

Auburn University at Montgomery, AL, USA

Aug 2022 - Dec 2023

Master's in information technology

Lovely Professional University, Phagwara, India

Aug 2016 - May 2020

Bachelor of Technology in Electronics and Communication Engineering
