PROFESSIONAL SUMMARY

- I am a Full Stack Developer with 5 years of experience in building robust, scalable, and user-friendly web applications and conference services. I have hands-on expertise with React.js and modern JavaScript, along with strong proficiency in back-end development using Node.js, Express.js, Python, and various databases, including MySQL and MongoDB. My current role at Virtuoso involves designing and developing end-to-end, full-stack systems, deploying containerized applications to AWS using Docker and GitHub Actions, and maintaining secure, high-performance architectures.
- Recently, I have expanded my skill set into Generative AI by integrating OpenAI APIs into web applications to enable dynamic content generation and user assistance features. I apply prompt engineering techniques to fine-tune interactions and improve the accuracy and contextual relevance of AI-driven functionality. This integration of AI complements my core strengths in full-stack development, enabling me to build more intelligent and personalized digital experiences.
- With a strong foundation in UI/UX principles, RESTful APIs, Agile methodologies, and test-driven development, I continuously strive to deliver clean, efficient, and maintainable code. Backed by a master's in information systems and industry certifications from Meta, Google, and IBM, I'm passionate about applying new technologies to solve real-world problems and contribute meaningfully to innovative teams.

TECHNICAL SKILLS

- **Operating Systems:** Windows 10/11, Windows Server (2012–2022), Linux (Ubuntu), macOS
- **IT Support Tools:** Active Directory, Group Policy, Microsoft 365, Azure AD, Azure Virtual Desktop, SCCM, Remote Desktop, ServiceNow, Jira, Zendesk
- **Networking:** TCP/IP, DNS, DHCP, VPN, LAN/WAN, Firewall configuration & troubleshooting
- **Hardware Support:** Desktops, Laptops, Printers, Scanners, Audio-Visual equipment, Peripherals
- **System Administration:** User account management, Patch management, Backup &

recovery, Endpoint protection

- **Cloud & Virtualization:** Azure, AWS (basic), VMware, Hyper-V
- **Security & Compliance:** MFA, BitLocker, ISO/NIST standards, Cybersecurity best practices
- **Scripting & Automation:** PowerShell, Bash, Python (basic)
- **Productivity & Collaboration Tools:** Microsoft Office Suite, Outlook, Teams, SharePoint, OneDrive, Zoom, Slack

PROFESSIONAL EXPERIENCE

Full-stack developer

Virtuoso –March 2025 – *present*

- Provided technical support for in-house applications, assisting internal teams with configuration, access management, and troubleshooting.
- Investigated and resolved production issues by analyzing logs, databases, and application workflows.
- Supported deployment of application updates and patches, ensuring minimal downtime.
- Assisted in writing and debugging backend scripts in Node.js and Python to address recurring technical issues.
- Managed relational and NoSQL databases (MySQL, PostgreSQL, MongoDB) for application stability and performance monitoring.
- Deployed and maintained application environments using Docker containers on AWS.
- Documented solutions, configuration steps, and troubleshooting guides for recurring issues.
- Collaborated with cross-functional teams in Agile sprints to ensure smooth feature rollouts and system integrations.

Full Stack Developer

Find Me (Internship) – June 2025 – August 2025

- Developed and deployed real-time ML models for facial recognition and intelligent data processing.
- Built scalable UI with React.js and back-end services with Node.js and Express.js.
- Designed and optimized relational and NoSQL databases (MySQL, MongoDB).
- Integrated third-party APIs for identity management, search, and content generation.
- Applied prompt engineering to fine-tune OpenAI GPT responses for user interaction.

- Ensured WCAG-compliant accessibility, responsive layouts, and cross-browser compatibility. Contributed to CI/CD pipelines using GitHub Actions and supported Agile team workflows.

IT Conference Services Team Member

Indiana Institute of Technology, Fort Wayne, IN –May 2023 – Dec 2024

- Installed, configured, and maintained desktops, laptops, and computer-related equipment across multiple office locations.
- Provided end-user support via telephone, email, remote administration tools, and face-to-face interactions.
- Monitored and supported company data backup policies to ensure business continuity.
- Coordinated with vendor service providers to maintain and repair the IT infrastructure.
- Reviewed help desk tickets for accuracy, routing, and timely resolution; identified recurring issues for process improvement.
- Delivered staff training on information systems, software usage, and cybersecurity best practices.
- Communicated trends, updates, and urgent IT issues to management promptly.
- Followed ISO, NIST, and company-specific IT operational processes and procedures.
- Provided after-hours support as required and occasionally traveled to company facilities to support local IT operations.
- Troubleshoot and maintained Windows-based systems, network devices, and peripherals in accordance with organizational standards

Front-End Developer

Wipro, Hyderabad, India – August 2020 – March 2023

- Built mobile-first web applications using React.js, Redux, and ES6+.
- Styled user interfaces using Tailwind CSS and Material UI based on UI/UX designs.
- Integrated RESTful APIs for asynchronous data fetching and dynamic views.
- Ensured responsiveness, accessibility, and pixel-perfect design implementation.
- Participated in Agile workflows and collaborated in code reviews and sprint planning.

EDUCATION

Master of Science in Information Systems

Indiana Institute of Technology, Fort Wayne

May 2023 – Dec 2024 | GPA: 3.7 / 4.0

Bachelor of Technology in Electronics and Communication Engineering

Swami Vivekananda Institute of Technology,

Aug 2016 – May 2020 | CGPA: 6.8
