

OBJECTIVE

Results-driven Data Analytics and Business Intelligence professional with 5+ years of experience in data management, data modeling, and cloud-native analytics. Skilled in Agile delivery as a certified Scrum Master, driving cross-functional collaboration and accelerating project timelines. Proficient in SQL, Python (Pandas, PySpark), Snowflake, AWS, and GCP, with expertise in data privacy, MDM, and governance frameworks to ensure compliance and data integrity. Experienced in designing automated data validation and reconciliation frameworks, reducing data quality issues by 30% and improving reporting accuracy. Adept at building scalable ETL pipelines, advanced Power BI dashboards, and data marts that transform raw data into actionable insights. Skilled in Snowflake performance optimization through clustering, partitioning, and caching strategies, improving query efficiency by 20%. Proven expertise in investment and financial data modeling, including risk, performance, and operational analytics to support enterprise-scale decision-making. Collaborated with governance and compliance teams to create audit-ready metadata catalogs and standardized data dictionaries, enhancing data transparency and trust. Passionate about conceptual/logical data modeling, mentoring teams, and fostering agile best practices to deliver measurable business impact and enable data-driven decision-making in dynamic enterprise environments.

SUMMARY

- 5+ years of expertise in data analytics, data modeling, and cloud-native platforms (Snowflake, AWS, GCP).
- Proven experience as an Agile Scrum Master, driving sprint planning, backlog refinement, and cross-functional collaboration.
- Designed and implemented conceptual and logical data models for financial, investment, and operational data domains.
- Strong proficiency in SQL, Python (Pandas, PySpark), ETL pipelines, and data engineering best practices for large-scale data processing.
- Expertise in data governance, MDM, GDPR/PII compliance, and metadata management ensuring regulatory and audit readiness.
- Built data marts and API-based consumption layers, accelerating BI reporting and reducing manual data preparation efforts by 40%.
- Developed enterprise-level Power BI dashboards to deliver actionable insights for senior leadership and business stakeholders.
- Skilled in data quality assessments, gap analysis, and data lineage mapping, enabling trustworthy analytics ecosystems.
- Experienced in agile project management using Jira and Confluence, improving sprint velocity and delivery predictability.
- Passionate about optimizing data platforms, automating validation frameworks, and transforming data into strategic assets that drive business growth.
- Actively collaborated with cross-functional teams using Agile methodologies (Scrum/Kanban) to facilitate iterative software development cycles.
- Regularly participated in comprehensive code reviews, consistently enforcing best practices and maintaining high coding standards.
- Designed and implemented automated data validation and reconciliation frameworks, reducing data quality issues by 30%.
- Partnered with data governance and finance teams to create audit-ready metadata catalogs and standardized investment data models.
- Improved Snowflake query performance by implementing clustering, partitioning, and caching strategies, reducing execution time by 20%.
- Led proof-of-concept initiatives for integrating market data feeds into Snowflake, enhancing investment risk and performance analytics.
- Mentored junior analysts and engineers, promoting best practices in ETL development, data modeling, and agile delivery.

WORK EXPERIENCE

Division of IT, Colorado State University

Data Analyst

Dec 2024 – May 2025

- Performed end-to-end data analysis and profiling for source systems to ensure data quality, lineage, and readiness for ingestion into Snowflake and GCP.
- Defined conceptual and logical data models for investment and finance domains, supporting BI, API delivery, and advanced analytics.
- Conducted gap analysis and collaborated with business stakeholders to resolve data inconsistencies, improving data trust by 20%.
- Partnered with data governance teams to standardize metadata, build data dictionaries, and integrate lineage into Confluence.
- Authored detailed requirement documentation, process flows, and user stories in Jira, reducing development rework by 25%.
- Acted as Scrum Master, facilitating sprint planning, backlog grooming, and daily stand-ups, increasing sprint velocity by 30%.
- Coordinated with BI teams and product owners to deliver data marts and curated datasets for reporting on investment KPIs.
- Developed automated data validation scripts in Python, reducing manual testing efforts by 40%.
- Designed and optimized ETL workflows in SQL and Python, reducing pipeline execution time by 20%.
- Collaborated with cloud engineers to implement Snowflake performance tuning strategies, cutting query costs by 15%.

Nutrien Ag Solutions

Data Analyst

May 2024 – Dec 2024

- Modeled investment-related financial data schemas (3NF and dimensional) for forecasting, budgeting, and performance analytics.
- Created source-to-target mappings and implemented ETL pipelines in Snowflake for faster integration of SAP, Oracle, and external market feeds.
- Conducted gap analysis on data feeds to resolve missing attributes, improving data completeness by 15%.
- Developed API-based data access layers for downstream reporting and analytics.
- Automated data quality checks using Python, decreasing data discrepancies in financial reports by 20%.
- Collaborated with finance and operations teams to standardize investment data marts, streamlining access to key KPIs.
- Optimized Snowflake query performance with indexing and partitioning, improving dashboard load time by 30%.

ZS Associates

Senior Data Analyst

Jul 2022 – Dec 2023

- Built data pipelines integrating 20+ sources into Snowflake on AWS/GCP, enabling enterprise-wide self-service analytics.
- Defined logical data models for investment risk, sales forecasting, and performance metrics, aligning with business reporting needs.
- Developed Power BI dashboards with consumption layers, reducing ad-hoc data requests by 35%.
- Performed data quality assessments on 300M+ records, using SQL and Python to identify and fix discrepancies.
- Partnered with data governance teams to build metadata catalogs and lineage diagrams in Confluence, improving data discoverability.
- Facilitated agile ceremonies and mentored junior analysts, increasing team delivery efficiency by 18%.
- Created automated testing frameworks for ETL jobs, ensuring error-free deployments and faster release cycles.
- Engineered automated data reconciliation workflows, reducing financial reporting discrepancies by 25
- Optimized Snowflake query performance using clustering, partitioning, and warehouse scaling strategies, cutting query costs by 20
- Integrated real-time market and investment data feeds into Snowflake, enabling timely risk and performance analytics.

- Collaborated with product owners to design API-based data services, improving data accessibility for downstream applications by 30
- Implemented data lineage tracking and impact analysis tools, improving regulatory compliance and audit readiness.
- Led proof-of-concept initiatives for machine learning-driven anomaly detection, enhancing proactive data quality monitoring.

Cognizant

Data Analyst

Nov 2019 – Jul 2022

- Designed and implemented GDPR-compliant data governance framework, including PII masking, automated retention, and audit logging.
- Delivered investment-related data mapping documents and requirement specs, accelerating onboarding of new data projects by 25%.
- Built ETL pipelines in Informatica and Snowflake for structured and semi-structured financial data ingestion.
- Supported cloud migration from on-premises to AWS Redshift, reducing infrastructure costs and improving query speed.
- Collaborated with legal and compliance teams to ensure audit readiness and adherence to global regulatory requirements.
- Led sprint retrospectives and backlog grooming sessions as part of Agile delivery, ensuring smooth project execution.

EDUCATION

Colorado States of University, Fort Collins, CO
Master's in Computer Information Systems

Graduation Date: May 2025

KIIT University, Bhubaneswar, India
Bachelor's in Electrical Engineering

Graduation Date: May 2019

SKILLS & INTERESTS

Programming Languages: SQL (PostgreSQL, MS SQL Server), Python (Pandas, PySpark, NumPy), R, DAX.

Technologies: Snowflake (AWS & GCP), AWS Redshift, GCP BigQuery, Azure Synapse, Spark, ETL (Informatica, Alteryx, Boomi), API Development, Cloud Data Warehousing, Metadata Management, Master Data Management (MDM).

BI & Visualization: Power BI (DAX, Power Query), Tableau, SSIS, SSRS.

Tools & Platforms: Jira, Confluence, Visio, Lucidchart, Git, Excel (VBA/Macros), Freshservice, SDLC.

Data Science & Analytics: A/B Testing, Hypothesis Testing, Regression, Time Series, KNIME, Forecasting, Data Modeling.

Workflow: Agile (Scrum, Kanban), Technical Program Management.

Data Governance & Compliance: GDPR, PII Masking, Data Lineage, Audit Readiness.

Soft Skills: Problem-Solving, Analytical Thinking, Cross-Functional Collaboration, Leadership, Communication, Time Management, End-to-End Delivery

CERTIFICATIONS

- SnowPro Associate: Platform Certification
- Google Data Analytics Professional Certificate
- DP-900 Microsoft Azure Data Fundamentals
- Business information system certificate;(Colorado State University)
- Information Technology Project Management Certificate; (Colorado State University)
