Irving, TX • +1 (469) 289-9164 • gouthamkosaraju1996@gmail.com

SUMMARY

- **5+ years of experience** as a **Data Analyst**, specializing in **marketing and sales analytics**, customer segmentation, and campaign performance evaluation using SQL, Python, and data visualization tools.
- Expertise in **A/B testing, cohort analysis, and predictive modeling**, applying statistical techniques to optimize marketing strategies and improve customer acquisition and retention.
- Proficient in **Excel-based reporting**, utilizing pivot tables, macros, and advanced functions to automate ad-hoc analyses and streamline business decision-making.
- Developed **interactive dashboards in Tableau, Power BI, and Salesforce**, enabling real-time KPI tracking and data-driven decision-making for cross-functional teams.
- Skilled in **SQL query optimization and database management**, ensuring efficient data retrieval for marketing performance tracking and customer analytics.
- Hands-on experience with **Python for data analysis, sentiment analysis, and trend forecasting**, supporting pricing strategies and promotional effectiveness.
- Strong collaboration skills, working with **engineering, product, and marketing teams** to translate data insights into strategic recommendations that drive **customer engagement and revenue growth**.

TECHNICAL SKILLS

Programming Languages:	Python, SQL, R.
Visualization Tools:	Power BI, Tableau, MS Excel.
Databases:	MS SQL server, Teradata, Oracle, MySQL.
Cloud Technologies:	AWS (S3, IAM, EC2, CloudWatch, Lambda,).
Libraries:	NumPy, Pandas, Matplotlib, Scikit-Learn.
Big Data Tools:	Hadoop, Apache Spark, Kafka.
ETL Tools:	Informatica Power Center, Talend.
Methodologies:	Agile, Waterfall.
Tools:	JIRA, Azure DevOps, Salesforce, MS Office, Asana.
Version Control:	Git, GitHub.
Analytical Skills:	Data Mining, Data Cleansing, Data Visualization, Data Wrangling, Data Warehousing,

PROFESSIONAL EXPERIENCE

BNY Mellon	TX
Data Analysis Engineer	Nov 2024 – Current
• Analyzed large, sensitive datasets in cloud environments—structuring and profiling data to ensure quality and compliance, and enabling secure, cross-border access for 15+ teams. • Streamlined reporting by automating multi-stage data validation and transformation workflows in Apache Airflow, cutting 8 hours of manual prep monthly and reducing data-entry errors for audit-ready deliverables. • Conducted end-to-end data consolidation from 10+ source systems, normalizing and aggregating records so analysts could perform rapid trend and variance analyses, accelerating quarterly strategy reviews by 1.5 weeks. • Developed interactive dashboards that visualize real-time metrics—key performance indicators, data volumes, and throughput—so leaders could spot performance gaps and reallocate resources within hours. • Benchmark-tested analytical database queries for high-frequency reporting, identifying and tuning bottlenecks to reduce history-retrieval time from minutes to sub-second, enabling near-instant ad hoc analysis. • Monitored 2M+ daily events using streaming analytics logic to detect anomalies in under 0.5s, generating real-time exception reports that supported compliance investigations across three regional hubs. • Built and validated predictive models on two years of historical data—applying feature selection to isolate 15+ behavioral indicators—boosting anomaly-alert precision and cutting false positive investigations by over 150 cases per month.	
McKinsey	TX
Data Analyst	Feb 2024 – Nov 2024
• Analyzed client datasets across finance, healthcare, and manufacturing using Python and cloud platforms to identify inefficiencies in supply chain workflows and streamline manual data processing. • Automated financial and operational reporting using Azure Data Factory and Apache Airflow, enhancing data-driven decision making. • Engineered data analytics frameworks by integrating multiple client data sources (e.g., IoT sensors and ERP systems) with Azure Synapse and Databricks, reducing data transformation time and uncovering trends to drive cost-reduction opportunities. • Developed interactive Power BI dashboards for healthcare and manufacturing clients to track key metrics like equipment downtime and patient discharge timelines.	

- Optimized various client databases (SQL, MongoDB) with improved indexing and governance protocols, accelerating query response times for tasks such as audit compliance and customer segmentation.
- Processed real-time events using Kafka and Docker, with visualizations that quickly detect issues like equipment failures and shipment delays, effectively reducing unplanned maintenance costs.
- Leveraged Excel for ad-hoc data analysis and reporting, facilitating quick insights and ensuring accurate data validation.

UBER

TX

Data Analyst

Aug 2023 – Feb 2024

- Analyzed ride-matching performance using Python libraries (pandas, NumPy) to identify trends and inefficiencies, thereby improving ETA predictions and driver allocation.
- Automated trip data workflows with Apache Airflow, reducing analytics latency and enabling real-time operational decisions.
- Built predictive models with scikit-learn to analyze rider and driver behavior, supporting dynamic pricing and demand forecasting.
- Created interactive dashboards with Tableau to visualize key mobility metrics, such as trip completion rates and regional demand trends, driving strategic adjustments.
- Optimized data pipelines and improved storage with PostgreSQL and MongoDB, ensuring efficient management of geospatial and transactional data.
- Integrated real-time data streams using Apache Spark and Kafka to deliver actionable insights that enhance operational efficiency.
- Conducted statistical analysis with Python's SciPy and statsmodels libraries to uncover patterns in mobility data, supporting route optimization and marketing strategy refinement.
- Performed A/B testing on marketing campaigns to evaluate effectiveness and inform adjustments to promotional strategies for enhanced customer engagement.

Airbnb

India

Data Analyst

Sep 2019 – Dec 2021

- Developed and maintained **interactive dashboards** in **Tableau** and **Salesforce**, visualizing **user engagement, conversion rates, and campaign performance** to drive marketing strategy.
- Performed **SQL-based analysis** on large datasets to identify **booking trends, customer churn patterns, and pricing insights**, optimizing marketing and promotional strategies.
- Created **complex SQL queries** with **window functions** and **CTEs** to track **marketing campaign effectiveness**, analyzing customer acquisition and retention metrics.
- Analyzed **SEO, PPC, and social media campaign performance** using **Python (pandas, NumPy)** to identify **high-performing channels and optimize ad spend allocation**.
- **Built Excel-based campaign performance reports** with **pivot tables, lookup functions, and conditional formatting**, enabling real-time tracking of **customer acquisition costs (CAC) and return on ad spend (ROAS)**.
- Conducted **A/B testing** to measure the impact of **marketing strategies, landing page designs, and promotional offers**, using **statistical significance testing (t-tests, chi-square tests)** for data-driven decision-making.
- Used **Python for sentiment analysis on customer reviews and feedback**, identifying trends in user satisfaction and areas for improvement in marketing campaigns.
- Developed **cohort analysis reports** to track user retention and **repeat booking trends**, providing insights into customer loyalty and lifetime value.
- Analyzed **regional demand variations** and **seasonality trends** to refine **pricing and promotional strategies**, improving campaign targeting and revenue optimization.
- Partnered with **marketing and sales teams** to translate data insights into **actionable recommendations**, enhancing **campaign performance and customer engagement strategies**.

Cipla

India

Data Analyst Intern

Oct 2018 – Aug 2019

- Systematized data extraction, transformation, and loading (ETL) processes with Python scripts, improving pipeline efficiency and reducing manual work across monthly data operations.
- Pruned complex SQL queries to retrieve and manipulate data from relational databases, enhancing the speed and accuracy of report generation for timely business insights.
- Streamlined data analysis and reporting tasks with Excel models, incorporating advanced functions like Pivot Tables, VLOOKUP, and Macros, automating repetitive tasks and improving weekly workflows.
- Monitored Oracle databases to ensure high availability and reliability, implementing regular backups and disaster recovery procedures to minimize downtime and data loss.
- Secured sensitive data within PostgreSQL databases by applying access controls, encryption, and validation measures, maintaining data integrity, and protecting over 1,000 GB of data from unauthorized access.
- Conducted A/B testing to assess the impact of changes on key metrics, providing data-backed recommendations that upgraded conversion rates and user engagement.

EDUCATION

Texas A&M University

Master's in Business Analytics

TX

Jan 2022 – Jun 2023

CR Reddy Engineering College

Bachelor in Computer Science

India

Jun 2015 – Apr 2019
