SUMMARY

Data Engineer with 3+ years of experience in building scalable data solutions using **Spark, SQL, Python, Hive,** and **Informatica** across **Hadoop, AWS, GCP**, and on-prem infrastructures. Proficient in ETL pipeline development, cloud services like **S3, EC2, Glue**, and known for strong collaboration with cross-functional teams to deliver impactful, data-driven outcomes.

EXPERIENCE

Software Engineer

Cognizant (Client: Google)

1/2021 - 10/2022

Hyderabad, India

- Built robust ETL workflows using **Informatica** and **SQL** to ingest 3.5M+ daily ad event records from upstream platforms like Google Ads API, DoubleClick logs, and internal tracking systems into **Hadoop** and **GCP** Cloud Storage for centralized analytics.
- Developed modular **PySpark** and **SparkSQL** scripts to clean, transform, and aggregate campaign performance KPIs; reduced transformation latency by 40 %
- Designed optimized partitioned Hive tables to support multi-region reporting and tuned queries to reduce SLA by 40.
- Automated validation and SLA monitoring via **Python**, improving delivery compliance from 82 % to 98 %. Collaborated with cross-functional global analytics teams to deliver reliable dashboards in **Looker** and **Google Data Studio**.

Software Engineer

Manac Infotech Private Limited (intern)

12/2019 - 11/2020

Hyderabad, India

- Designed **SSIS**-based ETL workflows to integrate CRM and sales data into **SQL** Server.
- Built automated **Power BI** and **Tableau** dashboards for business operations. Reduced manual reporting effort by 40 % with scheduled data refreshes .
- Reduced manual reporting effort by 40 % with scheduled data refreshes

ACADEMIC PROJECTS -

Grocery E-Commerce Platform with Chatbot Integration

Southern Arkansas University 2025

- Built an e-commerce recommendation engine using **Spark, Python**, and **R**. Ingested structured and semi-structured order data via **Hadoop** and hosted data on **AWS S3** pipelines were deployed on **Kubernetes** (EKS). Implemented real-time personalization using **SparkSQL** and automated 80 % of customer queries via chatbot logic.

Log Processing ETL Simulation

Southern Arkansas University 2024

- Simulated an enterprise-grade batch ETL pipeline on Hadoop for over 5.2 million log records. Transformed data with **HiveQL** and **SparkSQL**, optimized with ORC format and partitioning. Benchmarked Spark vs Hive; Spark reduced processing time by 2x. Integrated **SSIS** and **DataStage** for orchestration and scheduled and managed data workflows using **Apache Airflow**; simulated real-time streaming using Kafka.

Consumer Behavior Analytics – Energy Drink Case Study

Southern Arkansas University 2023

- Processed 50,000+ survey responses to extract behavior and intent patterns using Hive, Spark, and Python. Built a dimensional model, cleansed data using **Informatica**, and achieved 99.6 % data quality. Generated segments with 75 % purchase likelihood; visualized insights in **Power BI** and **Matplotlib**.

TECHNICAL SKILLS

Languages

Python, SQL, R, SparkSQL, HiveQL

Big Data & ETL

Apache Spark, Hive, Hadoop, Informatica, SSIS, DataStage, Kafka

Cloud Platforms

AWS(S3, EC2, EMR, Kinesis, Lambda, Glue), GCP(BigQuery), Kubernetes

Data Modeling & Warehousing

Dimensional Modeling, Star Schema, Snowflake Schema

Visualization Tools

Power BI, Tableau, Google Data Studio, Looker,

Version Control & Tools

Git, JIRA, Agile, Control-M, Oracle, CI/CD.

Others

REST APIs, JSON, ORC, CSV, XML, OOP

Certifications

AWS Cloud Quest:Cloud Practitioner, Social Networking(NPTEL),

Machine Learning(NPTEL)

EDUCATION

Masters in Computers and information Science, Southern Arkansas University (completed)

08/2023 - 05/2025

Bachelors in Computer Science - Jawaharlal Nehru Technological University

08/2016 - 11/2020
