

GOWTHAM KRISHNA D

FULL STACK ENGINEER

Email: krishnadronadula1403@gmail.com | **Phone:** +1 (971) 425-8814 | **Location:** Bridgeport, CT

PROFESSIONAL SUMMARY

Full Stack Engineer with 4+ years of experience in designing, developing, and deploying scalable applications. Proficient in backend technologies (Java, Spring Boot) and frontend (React, JavaScript). Experienced in creating RESTful APIs, ensuring high performance, and integrating systems. Skilled in DevOps with Jenkins, Maven, and Docker to streamline CI/CD pipelines and improve system reliability. Focused on delivering innovative solutions to optimize performance and user experience.

TECHNICAL SKILLS

Programming Languages	Java, JavaScript, Python, TypeScript, SQL, Bash
Frontend Development	ReactJS, Angular, Bootstrap, jQuery, HTML5, CSS3, JavaScript, RESTful APIs, JSON
Backend Development	Spring Boot, Node.js, Express.js, RESTful APIs, Microservices, Java, Spring Cloud
Databases	PostgreSQL, MySQL, MongoDB, Oracle, SQLite, JDBC, Hibernate ORM
DevOps & Tools	Jenkins, Maven, GitLab, Bamboo, Docker, Kubernetes, Git, GitHub, Bitbucket, AWS, Azure, GCP
Web Services & APIs	RESTful APIs, GraphQL, WebSockets, JSON, XML, SOAP, OpenAPI
Methodologies	Scrum, Kanban, TDD (Test-Driven Development), SDLC, Microservices Architecture, Agile Project Management
Collaboration Tools	Jira, Confluence, Trello, Slack
Other Skills	System Integration, Performance Optimization, Code Refactoring, Cloud Computing, Security Best Practices, Technical Documentation

PROFESSIONAL EXPERIENCE

Full Stack Engineer

GreenSky | Bellevue, WA | **June 2024 – Present**

- Developed and maintained scalable and high-performance applications, utilizing Java and Spring Boot for backend services and react for frontend interfaces.
- Engineered complex RESTful APIs to facilitate seamless communication between services, improving data transfer speeds and system integration efficiency.
- Led the integration of PostgreSQL and Oracle databases, implementing advanced optimization techniques to reduce query times by 25%.
- Spearheaded the adoption of containerization using Docker, improving deployment workflows and scaling system performance by 30%.
- Collaborated with cross-functional teams to define business requirements, ensuring alignment between technical solutions and business goals.
- Automated the CI/CD pipeline using Jenkins and Maven, reducing build times by 40% and increasing deployment frequency.
- Implemented best practices for security, including user authentication via JWT and OAuth2 for secure API access.

Software Engineer

Mphasis | Hyderabad, India | **May 2020 – August 2022**

- Designed and developed scalable backend services using Java, Spring Boot, and microservices architecture, supporting high-traffic enterprise applications.
- Developed dynamic and responsive UIs using ReactJS and JavaScript, ensuring a seamless user experience across devices.
- Engineered RESTful APIs to ensure efficient communication between frontend and backend systems, enhancing overall system performance.
- Optimized PostgreSQL and MySQL database queries, resulting in a 30% improvement in data retrieval times.
- Implemented CI/CD pipelines using Jenkins and Docker to automate build and deployment processes, reducing time-to-market for new features.
- Collaborated with cross-functional teams in Agile sprints to gather requirements, implement new features, and improve product quality.

- Assisted in the migration of legacy systems to cloud-based microservices, improving scalability and maintainability.

Software Developer

Tech Mahindra | Hyderabad, India | **May 2019 – August 2021**

- Developed robust backend modules using Java, supporting financial transactions and data validation for enterprise-grade applications.
- Utilized RESTful web services to integrate different subsystems, ensuring data consistency and reducing latency by 20%.
- Worked closely with DevOps teams to optimize deployment pipelines, utilizing Jenkins and Docker to streamline releases and automate testing.
- Contributed to system performance tuning and debugging, resolving bottlenecks and enhancing the system's overall stability.
- Led the design of database schemas and implemented efficient indexing strategies to handle large datasets with high transaction volumes.

Software Development Intern

Tech Mahindra | Hyderabad, India | **January 2019 – May 2019**

- Developed Java-based backend modules for internal systems, collaborating with senior developers to ensure functionality and integration.
- Assisted in the development of RESTful APIs to facilitate database interactions using Spring Boot and Hibernate ORM.
- Implemented unit tests using JUnit and participated in debugging sessions to improve code quality and reduce defects.
- Gained hands-on experience with version control (Git) and collaborated with the team on source code management and best practices.
- Worked on optimizing SQL queries for PostgreSQL databases, improving data handling efficiency for various modules.
- Participated in Agile ceremonies, including sprint planning, retrospectives, and daily stand-ups, learning the best practices in collaborative software development.

PROJECTS

Scalable E-Commerce Platform

Technologies: Java, Spring Boot, React, PostgreSQL, Docker

- Architected a fully scalable e-commerce platform using Spring Boot for the backend and React for the frontend, allowing for real-time updates and enhanced user engagement.
- Integrated various payment gateways and ensured secure, PCI-compliant transactions through REST APIs and secure token-based authentication.

Real-Time Data Processing System

Technologies: Java, Spring Cloud, Kafka, PostgreSQL

- Built a real-time data processing system capable of handling millions of transactions per second, using Kafka for messaging and PostgreSQL for data storage.
- Optimized data ingestion and query performance by implementing partitioning and indexing strategies, reducing data retrieval times by 35%.

Microservices-based Inventory Management System

Technologies: Spring Boot, Docker, Kubernetes, PostgreSQL

- Developed and deployed a microservices-based inventory management system, improving resource management and reducing downtime by 40%.
- Leveraged Docker and Kubernetes for containerization and orchestration, enhancing system scalability and ease of deployment.

EDUCATION

Masters in Computer Science, University of Bridgeport, USA | 2022 – 2024

Bachelors in Computer Science, Guntur, India | 2016 – 2020

CERTIFICATION

AWS Academy Graduate - AWS Academy Cloud Foundations

Programming, Data Structures and Algorithms using Python, NPTEL

Coursera – Java Full Stack

Software Intern - Verzeo
