

PROFESSIONAL SUMMARY

Business & Data Analyst with 3+ years of experience in insurance, financial services, and technology domains. Skilled in SQL, Python, Tableau, Power BI, ETL pipelines, and data governance, delivering data-driven insights and automation. Proven ability to bridge business and technical teams, streamline reporting, and enhance compliance and operational efficiency.

TECHNICAL SKILLS

Data Analytics: SQL, Python, Excel (Pivot Tables, Macros), R (basic), ETL Development

Visualization: Tableau, Power BI, Excel Dashboards, KPI Tracking

Business Analysis: BRD/FRD, User Stories, Process Mapping, GAP Analysis, Requirements Elicitation

Cloud & CRM: AWS (Cloud Foundations), Salesforce Cloud Solutions

Testing & Tools: UAT, Jira, Confluence, Agile/Scrum, Data Governance

Soft Skills: Stakeholder Communication, Problem Solving, Analytical Thinking, Team Collaboration

EDUCATION

Temple University, Philadelphia, PA | Master's in Business Analytics (STEM) | GPA: 3.8 | Aug 2023 – May 2025

MVGR College of Engineering, India | Bachelor of Technology in Computer Science & Engineering | Jul 2017 – Jul 2021

CERTIFICATIONS

AWS Academy Graduate – AWS Cloud Foundations | May 2024

Salesforce Cloud Solutions | Sep 2022

Programming in Python | Oct 2023

SQL for Data Science | May 2022

PROFESSIONAL EXPERIENCE

Business/Data Analyst | Answer Financial | Jul 2025 – Present

- Partner with product owners and stakeholders to gather and translate business requirements into BRDs, FRDs, and user stories, ensuring alignment with technical teams.
- Built Tableau and Power BI dashboards to monitor customer acquisition, claims performance, and premium trends, cutting reporting cycle time by 40%.
- Designed and optimized SQL queries and ETL pipelines, increasing data accuracy by 25% and speeding up analytics delivery.
- Conducted user acceptance testing (UAT), logged defects in Jira, and secured sign-offs, reducing post-deployment errors by 20%.
- Applied data governance and compliance standards to reporting processes, ensuring accuracy for audits and regulatory reporting.

Keywords Used: SQL, Tableau, Power BI, ETL, UAT, Jira, BRD/FRD, Data Governance, Agile

Data Analyst | Saksen Technologies – Bengaluru, India | Aug 2021 – Jul 2023

- Developed SQL reporting scripts and automated Python ETL processes to support telecom client reporting, reducing manual effort by 30%.
- Built Power BI dashboards that enabled clients to track real-time network performance and operational KPIs.
- Conducted ad-hoc analysis on customer usage and billing trends, helping identify revenue leakage worth \$200K annually.
- Partnered with cross-functional teams to establish data validation and cleansing routines, improving accuracy of enterprise data.

Keywords Used: SQL, Python, ETL, Power BI, Data Validation, Telecom Analytics, Ad-hoc Analysis

Business Analyst (Intern) | Mastek – Hyderabad, India | Jul 2020 – Jul 2021

- Assisted senior analysts in capturing and documenting business requirements, BRDs, FRDs, and process flows for enterprise clients.
- Designed Excel dashboards with pivot tables and macros to track project KPIs, risk metrics, and issue logs.
- Conducted variance and trend analysis to highlight inefficiencies in IT project execution, presenting insights to leadership.
- Supported UAT cycles by preparing test scripts, executing test cases, and logging issues in Jira.

Keywords Used: BRD/FRD, Requirements Documentation, Excel Pivot Tables, Variance Analysis, Jira, UAT

PROJECTS

1. Customer Churn Prediction | Temple University

- Built a **machine learning model in Python** (scikit-learn, pandas) to predict customer churn for a telecom dataset, achieving 82% accuracy.
- Conducted **feature engineering** and applied techniques such as logistic regression and random forest to optimize performance.
- Visualized churn trends and retention strategies in **Tableau dashboards**, enabling stakeholders to understand key drivers.

Skills & Tools: Python, Pandas, Scikit-learn, Tableau, SQL, Data Visualization

2. Sales Performance Dashboard | Academic Project

- Designed an interactive **Power BI dashboard** to analyze regional sales and marketing campaign effectiveness across multiple product lines.
- Integrated datasets from **SQL and Excel**, applying **ETL transformations** to clean and standardize data.
- Delivered actionable insights on top-performing markets and underperforming SKUs, helping simulate 15% revenue lift scenarios.

Skills & Tools: SQL, Power BI, Excel, ETL, Data Modeling, KPI Reporting

3. Insurance Claims Analytics | Independent Project

- Simulated real-world claims data to analyze **fraud detection patterns** using Python (NumPy, Pandas) and SQL queries.
- Applied **data governance principles** to ensure consistency and audit readiness of synthetic datasets.
- Built a claims processing dashboard in **Tableau**, highlighting average settlement time, claim severity, and anomaly detection.

Skills & Tools: Python, SQL, Tableau, Data Governance, Fraud Analytics
