SUMMARY

Analytical and detail-oriented Data Engineer with 3+ years of experience leveraging data to drive business decisions. Skilled in SQL, Python, R, Tableau, Power BI, and Excel for transforming complex datasets into actionable insights. Proficient in predictive modeling, data visualization, A/B testing, and dashboard development. Proven ability to enhance operational efficiency and support business goals through data storytelling and stakeholder collaboration.

EDUCATION

Temple University, Fox School of Business – Philadelphia, PA Master of Science, Business Analytics (Expected May 2025) GPA: 3.78 | Relevant Coursework: Statistical Learning & Data Mining, Advanced Business Analytics, Decision Models

MVGR College of Engineering – Visakhapatnam, India Bachelor of Technology, Computer Science and Engineering (Sep 2021) GPA: 7.54/10 (3.2/4.0) | Leadership: Board Member & Youth Instructor, Swecha

TECHNICAL SKILLS

- **Programming & Querying:** Python (Pandas, NumPy, Scikit-learn), SQL, R
- **Data Analytics & Visualization:** Tableau, Power BI, Google Analytics, Microsoft Excel (Advanced)
- **Database Management:** MySQL, SQL Server, Oracle
- **Statistical Analysis & Machine Learning:** Regression, Hypothesis Testing, Predictive Modelling, A/B Testing
- **Cloud & Big Data:** AWS, Hadoop, Azure

- **Tools & Workflow:** Git/GitHub, Microsoft Power Platform (Power BI, Power Automate)
-

PROFESSIONAL EXPERIENCE

Temple University, Philadelphia, PA Data Analyst | Sept 2024 – Present

- Analyzed IT infrastructure and system performance data to improve service delivery and efficiency.
- Created Power BI dashboards to visualize key IT metrics, leading to a 15% improvement in response times.
- Collaborated with stakeholders to define KPIs and reporting needs for data-driven decision-making.

Infosys, Hyderabad, India Data Engineer | Aug 2021 – Aug 2023

- Developed SQL-based dashboards for MasterCard clients, monitoring customer engagement and performance.
- Conducted data-driven business process improvements, reducing operational inefficiencies by 20%.
- Automated reporting workflows using Python and SQL, saving 15+ hours per week in manual efforts.

Infosys, Hyderabad, India Data Analyst Intern | Jun 2020 – Jul 2021

- Built Power BI dashboards to analyze operational and financial data, improving business decision-making.
 - Conducted exploratory data analysis (EDA) on business KPIs to enhance forecasting accuracy.
-

PROJECTS

University Admission Predictor | Predictive Modeling with Python & Regression

- Built a predictive model using multiple linear regression to estimate university admission chances.
- Achieved 82.11% accuracy with clean feature engineering and EDA.

Global Renewable Energy Policy Insights | Regression in R & Python

- Conducted regression analysis on data from 213 countries to assess factors impacting renewable energy adoption.
- Provided policy recommendations based on statistical trends.

Timetable Tracker System | Web-Based Scheduling Tool

- Developed a web application to automate faculty scheduling using clean UI and backend logic.

CERTIFICATIONS

- Google Data Analytics Certificate (Coursera) – 2024
- SQL for Data Science (Udemy) – 2023
- Programming in Python (Coursera) – 2020
- Salesforce Cloud Solutions Certification – 2021

LANGUAGES

- English: Fluent
- Hindi: Conversational
