Professional Summary

Business Analyst with 3 years of experience delivering technology and process transformation initiatives across automotive, retail, and enterprise domains. Proven expertise in gathering and analyzing business requirements, facilitating stakeholder collaboration, and translating complex needs into actionable solutions. Adept at leading end-to-end SDLC projects, creating wireframes, process flows, and dashboards, and ensuring quality through UAT coordination and risk management. Successfully led the high-impact migration of Tata Motors' commercial and passenger vehicle websites to a modern digital platform, enabling improved customer experience and operational efficiency. Skilled in Agile methodologies, data-driven decision making, and cross-functional team leadership to deliver measurable business outcomes.

Skills & Certifications

Programming Languages & Query Languages: Python (Pandas, Matplotlib, Seaborn), R Programming, SQL

Methodologies & Documentation: SDLC, Agile, Scrum-Ban, KanBan, FRD, BRD, SRS, RTM

Project & Collaboration Tools: MS Project, MS SharePoint, JIRA, Confluence, Trello, Salesforce, Balsamiq, MS Visio, UAT

Visualization & Reporting Tools: Tableau, Power BI, Power Query, QlikView, MS Office (Excel, PowerPoint, Word, Outlook)

Analysis and Design Skills: Cost/benefit analysis, Ad-hoc Analysis, GAP analysis, SWOT analysis, Budget Analysis, Root Cause Analysis, Mockups, Wireframes, BPMN, Process flow, Use Case, Activity, Sequence diagrams

Cloud & Database: AWS, Azure, MySQL, SQL Server, PostgreSQL

Key Skills: Project Coordination & Scheduling, QA Testing Coordination, Documentation & Reporting, Database Management, Risk & Issue Management, Requirements Gathering, Stakeholder Management, KPI Development, Product Management

Certification: Marketing Analytics in Google Sheets by Data Camp | AI for Marketing | Power BI and Power Query

Education

Master's in Data Analytics and Information Systems

May 2025

Texas State University, San Marcos, Texas

Experience

Credit Suisse

Sep 2024 – Present

Business Analyst

USA

- Led the coordination and execution of cross-functional Agile sprints using JIRA and MS Project, resulting in a 25% improvement in sprint delivery timelines and increasing team velocity by 15% over two quarters.
- Developed and automated financial dashboards in Tableau and Excel by leveraging Python (Pandas) for data wrangling, enabling leadership to make real-time cost-benefit and budgetary decisions, improving budget accuracy by 20%.
- Conducted root cause analysis on recurring system defects across product lines, collaborated with QA teams, and implemented fixes, reducing reported UAT issues by 30% in the following two release cycles.
- Spearheaded stakeholder communication using Salesforce and Visio to document end-to-end workflows and business processes, enhancing cross-team clarity and cutting onboarding time for new analysts by 40%.
- Collaborated with product managers to define and track various key performance indicators (KPIs), aligning metrics with business goals and delivering quarterly KPI reports that improved product roadmap visibility across departments.
- Performed 50+ ad-hoc and budget analyses using PostgreSQL and Python, directly influencing leadership decisions that resulted in \$500K in annualized cost savings through vendor re-negotiations and spend optimization.
- Drove UAT testing coordination with QA and end-users across 3 business units, managing test cases, bug tracking, and documentation, which helped reduce post-deployment issues by 35%.

Aspire Technolab

Aug 2021 – Jul 2023

Business Analyst

India

- Facilitated Agile ceremonies and led detailed requirements elicitation using JIRA, refining 100+ user stories and acceptance criteria, which enhanced sprint planning efficiency and reduced backlog grooming time by 20%.
- Conducted various JAD (Joint Application Development) sessions and stakeholder interviews across IT and business units to gather and validate project requirements, increasing cross-team alignment and reducing rework by 25%.
- Designed and delivered 10+ KPI-driven Power BI dashboards to monitor financial health and operational risk, which improved leadership decision turnaround by 15% and reduced risk reporting latency by 40%.
- Acted as a central liaison between cross-functional teams, driving continuous communication via MS Teams, Slack, and Zoom, resulting in a 35% faster project cycle time and a measurable improvement in stakeholder engagement scores.
- Established robust stakeholder communication frameworks, which reduced project delays caused by requirement ambiguity by 25%, and consistently achieved positive stakeholder feedback in post-project evaluations.
- Led the integration of data sources from SQL Server, Excel, Azure, and SharePoint into Power BI dashboards, reducing manual report generation time by 65% and enhancing operational transparency for decision-makers.
- Performed in-depth business needs analysis and gap assessments for 5 major client projects, enabling solution designs aligned with strategic goals and delivering implementations with a projected 30% ROI.
