

GODWIN PRINCE

Binghamton, NY | (607) 312-8569 | godwinprish99@gmail.com | [LinkedIn](#)

EDUCATION

Binghamton University, State University of New York, Thomas J. Watson College of Engineering and Applied Science

Master of Science in Computer Science

Expected May 2025

Cumulative GPA: 3.59/4.00 | Dean's List (Fall 2023 - Spring 2025)

Relevant Coursework: Systems Programming, Distributed Systems, Topics in Data Privacy, Human Computer Interaction

Velammal Institute of Technology, Chennai, India

Bachelor of Technology in Information Technology

May 2021

Cumulative GPA: 7.71/10.00

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming(JAVA), Big Data Analytics, E-Commerce

TECHNICAL SKILLS

Languages: C, Java, Javascript, Haskell

Software: Git, Eclipse, IntelliJ, Visual Studio Code, Maven, Jenkins, JIRA, Windows, Linux, Postman

Additional: HTML5, CSS3, JSON, ReactJS, SQL, MySql, MongoDB, JDBC, Spring, Spring Boot, Docker, Microservices

Certifications: Java Programming, Ultimate Hands on Hadoop-Big Data, Amazon Web Services Security Speciality

PROFESSIONAL EXPERIENCE

Societe Generale, Software Engineer | Bangalore, India

May 2022 – July 2023

- Worked on Full Stack technologies and actively participated in the validation process to ensure **system integrity** and performance, implementing test cases for the **Collateral Swap** project using **Java** and **JSON**
- Validated business logic using **Java classes** and **Spring Boot**, reducing **processing time by 50%** and decreasing complexity. Generated feature file outcomes in the **Spring Cucumber** framework and presented documentation to the team and clients.
- Performed events and flow creation using **Net Stable Funding Ratio (NSFR)** derivatives to assess funding stability and analyzed **Liquidity Coverage Ratio (LCR)** requirements for **collateral swap authentication** in the Spring framework.
- Partnered with the Business team to survey existing work and deployment across various **system levels**, gathering requirements to improve system efficiency and compliance.
- Responsible for building and deploying the **workflow application** using Automation Build tool and **SpringBoot** to level up module platform access

Environment : J2EE, JDK17, SpringBoot, JPA, Spring, Tomcat, IntelliJ, Bitbucket, Toad, Oracle, JSON, Maven, Jenkin, Confluence, JIRA, Junit, Visual Studio, Spring Security, OpenShift Containers, SonarQube, Mockito

Imarticus, Big Data Software Intern | Remote, India

January 2022 – April 2022

- Retrieved data sets of Indian Premier League and used **SQL** and **MySQL** to analyzed the entire process for internal team requirements
- Adjusted design parameters to **incorporate new features** and deployed updates to the database using **Hadoop**, while establishing and monitoring data layouts through ER Diagrams
- Collaborated with **Security team** on **static code analysis** by ensuring software quality in existing **code** and documented data processes, workflows and queries
- Completed the Industry Leading Graduates training program, gaining expertise in **Hadoop, HDFS, HBase, and Pig**, enhancing skills in big data technologies

PROJECT EXPERIENCE

Hacking 5g Networks, Individual Project

April 2024 - May 2024

- Deployed and executed various **cyberattacks** and investigated the **security vulnerabilities** of 5g core networks
- Analyzed the impact of the attacks including **DDos, DNS, SSH** attack and presented the findings to faculty
- Highlighted the inherent risks associated with 5g risks and utilizing advanced

Face Based Music Recommendation App, Web Developer | Group Project

August 2023 – December 2023

- Developed a web application using **HTML, CSS, JavaScript, and Python** to detect **facial expressions** and generate **music playlists**
- Created a **UML** diagram to illustrate the **application's flow**, including music recommendation and retrieval
- Assisted in training and fine-tuning a **CNN** model while implementing **HAAR cascade** classifiers for real-time emotion classification using webcam feed

Network Intrusion Detection System, Independent Project

April 2023 – May 2023

- Defined requirements for **Remote Desktop Protocol** and **Remote Frame Buffer Protocol** to establish database connections
- Developed and analyzed **admin** and **remote login systems** using **Java**, comparing performance across both protocols
- Improved **memory management** and assisted in **troubleshooting network server** issues related to protocol failures

ACHIEVEMENTS AND AWARDS

- Winner of the **Startup Launch Event** in National Level Technical Symposium at SRM Easwari Engineering College, Chennai
- Awarded twice for **content creation** in a national talent festival at Velammal Institute of Technology
- Elected as **Student President** of IT Department, facilitating **career development** and placement meetings with hiring companies
