

GRACE KIM

Irvine, CA | (949) 283 2640 | eunhyk2@uci.edu | [LinkedIn](#) | [Portfolio](#)

OBJECTIVE

A professional simultaneous interpreter and project manager turned data analyst, blending advanced analytics expertise with exceptional communication skills to transform data into actionable knowledge and drive clear, strategic business insights

EDUCATION

University of California Irvine, Paul Merage School of Business

Master of Science in Business Analytics (STEM Designated)

Relevant coursework: Statistics, Advanced Analytics, Machine Learning, NLP, Business Big Data Management, Data architecture, Analytics Consulting

Irvine, CA

Aug 2025

Seoul University of Foreign Studies

Master of Arts in Simultaneous Interpretation and Translation (Korean English)

Seoul, Korea

Aug 2019

Incheon National University

Bachelor of Arts in French Language & Literature

Incheon, Korea

Aug 2013

PROFESSIONAL EXPERIENCES

APPLIED MEDICAL

Business Intelligence Analyst Intern

Irvine, CA

Jun 2025 - present

- Drive the design and build of Power BI reports (from requirement gathering to publishing for business consumption for basic ARC requests)
- Partner with cross-functional teams to extract and transform data from various systems (e.g., SAP HANA Views, SQL databases), enabling the development of actionable business insights and data-driven decision-making
- Compile and optimize a list of reports/workspaces to facilitate the transition of Power BI reports to Fabric

JOHNSON & JOHNSON MEDTECH: US Sales Growth Analytics (Capstone Project)

Irvine, CA

Student Data Analyst (Project Lead)

Jan 2025 – June 2025

- Led a team of five to analyze Johnson & Johnson's historical sales data from over 2,000 hospitals, integrating Medicaid datasets to identify retention trends, at-risk accounts, and untapped market opportunities
- Executed advanced customer segmentation and cohort analysis using K-Means clustering, and developed predictive models (XGBoost, Random Survival Forest) to forecast churn risk and high-value accounts achieving 84% test accuracy
- Developed interactive dashboards in Tableau and Power BI by integrating Python and SQL pipelines, delivering actionable insights to support sales strategy, marketing, and stakeholder decision-making

ASTELLAS PHARMA

Seoul, Korea

Operation Analyst /Project Manager (Reported directly to General Manager)

Aug 2020 - Nov 2022

- Led the Smart Office Project team, utilizing SQL and Excel to analyze workspace utilization data of 150 employees, optimizing office layout and reducing operational costs by nearly 50% through data-driven space reallocation
- Conducted warehouse data analysis to identify obsolete records, streamline data storage, and implement a more structured data management system, leading to a 30% reduction in operational costs
- Delivered weekly executive reports and presentations using PowerPoint and Word, providing data-driven insights on office operations and warehouse management, leading to strategic optimizations and significant cost reductions

DATA ANALYTIC PROJECT

BANK CUSTOMER CHURN PREDICTION

- Applied statistical modeling techniques (Regression, Decision Tree, Random Forest etc.) and statistical analysis to predict bank customer churn using a dataset of 10,000 records
- The Random Forest model achieved the highest accuracy of 86%, and SMOTE was applied to address class imbalance, improving recall for churned customers
- Leveraged business intelligence tools to propose retention strategies tailored to high-risk customer segments

LEADERSHIP & INVOLVEMENT

UCI Merage Health Care Association

Sep 2024 - Present

Active member contributing to initiatives at the intersection of healthcare and data analytics

Data Con LA

Sep 2024 - Present

Support the organization and execution of one of the largest data conferences on the West Coast

TECHNICAL EXPERTISE

Statistic Modeling & Machine Learning: Python (Scikit-Learn, Statsmodels, XGBoost, K-Means)

Data Analytics & Visualization: Python (Pandas, NumPy, Matplotlib, Seaborn), Tableau, SQL, Microsoft Excel, PowerBI
