PROFESSIONAL EXPERIENCE

Oracle (Cerner) Software Engineer II

Remote/Kansas City, MO
April 2022 – September 2025

- Developed and maintained 15+ RESTful APIs to process data, wrote PL/SQL backend scripts to manage data retrieval and insertion into Oracle Database, ensuring efficient queries and data storage.
- Supported three Azure Data Factory pipeline for migration from source tables to Snowflake, writing complex SQL and Scala code for ETL(Extract, Transform, Load) processes.
- Built a PL/SQL database package for a version history model in APEX, it transformed source data to JSON to be processed – it utilized a flashback data archive tool that saved months of development effort.
- Designed and optimized database tables, views, indexes to support business requirements, ensuring high performance and efficient data storage.

Paycom Software Developer I

Oklahoma City, OK
June 2021 – April 2022

- Developed reusable ReactJS UI components and API endpoints, accelerating feature delivery and reducing duplicate code across projects.
- Completed front and back end software issues using React JS, PHP, SQL.
- Collaborated with team to align with agile framework, participating in stand ups, sprint planning, and retrospective to deliver high quality software solutions.
- Refined/debugged web application to ensure accuracy and security. By conducting code reviews and implementing test cases into each Jira story.

University of Kansas Supplemental Instruction Leader: Programming I & II

Lawrence, KS
August 2019 – May 2021

- Led weekly 1 hour programming workshops for 20+ students per semester with activities related to course material and problems similar what they might see in a technical interview.
- Executed plans according to the standards set by UMKC, the SI International Center
- Participated in weekly meetings/training that covered responsibilities, conflict resolution, organization, and other topics that enhanced my professional skills.

EDUCATION

University of Kansas

Graduated May 2021

- Bachelor of Science in Computer Science GPA: 3.2

TECHNICAL PROJECT

Capstone Project: What's Due When

- Built a scheduling web application with modern UI, enabling students/faculty to manage 20+ tasks/events daily. Developed using ReactJS, Node.js, and MongoDB, ExpressJS.
- Implemented the process for authenticating users with either their Google or standard username and password login. Wrote the backend code to handle GET, POST, and PUT rest API request.

SKILLS

Programming Languages: Python, JavaScript, Typescript, PHP, C#

Web Development: Oracle APEX, React, HTML, CSS, NextJS, NodeJS, Rest API, AWS, ExpressJS

Databases: PL/SQL, Oracle DB, Snowflake, MongoDB

Version Control / Tools: Git, Gitlab, Github / CI/CD pipeline, Docker, Postman, Azure Data Factory
