3+ Years Experience as a Data Analyst

EDUCATION

University of Houston, Houston, TX

Aug 2023 - May 2025

Master of Science in Computer and Systems Engineering, GPA: 3.788/4.0

EXPERIENCE

Data Analyst

Sep 2023 - Present

University of Houston, Business Department, Houston, TX

- Optimized project management using **Smartsheet**, Excel, and Google Sheets, improving KPI tracking and team productivity by **50%**. Automated workflows using Smartsheet API and **IF-THEN logic**.
- Implemented Power BI dashboards with **DAX** functions to optimize **KPI visualization**, reducing reporting time by **30%**. Executed **ETL** processes in **Power Query**, ensuring **90%** data accuracy.
- Established role-based access controls and advanced **pivot table** analysis to strengthen **data security** and ensure compliance. Conducted audits to maintain data integrity and regulatory adherence.
- Utilized **Pandas** and NumPy to process and analyze **10,000+** rows of data monthly, improving data processing efficiency by **20%** and enabling faster decision-making for stakeholders
- Pioneered 15+ interactive dashboards using **Matplotlib** and Seaborn, translating complex datasets into actionable **visualizations** that Fabricated data-driven decision-making and directly influenced key stakeholders' strategic initiatives across the organization.

Data Analyst

Jan 2022 - Jul 2023

Capgemini Technology Services, India

Client: Global Tech Solutions

- Project: FY Webinar Analytics: Leveraging Power BI and Python**
 - Created Power BI dashboards for **FY Webinars**, including topic-wise and company-wise webinar counts, improving data accessibility for **500+ users**. Leveraged **DAX** functions to drive calculations and optimize data models.
 - Employed Pandas and **NumPy** for data preprocessing and analysis, managing **10,000+ rows** monthly. Analyzed predictive models to detect trends and facilitate strategic planning.
 - Visualized complex datasets using Matplotlib and **Seaborn**, developing over 15 dashboards revealing critical operational trends; formulated decision-making speed across departments, and identified process improvements that saved approximately 80 hours weekly.
 - Collaborated with cross-functional teams to streamline data workflows and improve reporting efficiency. Translated complex data insights into actionable recommendations for stakeholders, fostering data-driven strategies and enhancing operational effectiveness.
- Project: Data-Driven Decision-Making with EDGE Dashboard**
 - Collaborated with **TBEXG** to develop the EDGE Dashboard using **API** as the data source, improving data integration efficiency by **15%**. Generated **Power BI dashboards** for User Creation & Login, User Activity, and User Analytics.
 - Worked on data transformation using Power Query, including merging, joining, and pivoting data, reducing manual effort by **30%**. Applied **Pandas** for data cleaning and transformation, processing **50,000+ rows of data** monthly.
 - Designed **Seaborn** visualizations to highlight user engagement trends, improving decision-making for **20+ business units**. Presented insights to stakeholders, enabling data-driven decisions and improving operational efficiency.
- Part

ACADEMIC PROJECTS

Sales Performance & Trend Analysis: Developed an automated dashboard using **SQL** and **Power BI** to track revenue growth and YOY trends, enabling data-driven decisions that increased revenue by **7%**.

Image Quantization: Analyzed image quality using **OpenCV**, NumPy, and Matplotlib by performing intensity-level quantization and spatial resolution reduction on images. Constructed computational efficiency by **20%**.

Netflix Content Analytics Dashboard: Streamlined an interactive **Power BI** dashboard using **Excel datasets** and DAX measures to analyze Netflix's content library, increasing engagement insights by **15%**.

CORE COMPETENCIES

Programming Languages: Python, HTML, CSS, JavaScript, MySQL

Technologies & Frameworks: Django, Spring Boot, Microservices, GitHub, Windows, Linux, AI & Machine Learning

Data Analytics & Processing: Data Cleaning, Transformation, Wrangling, ETL, Statistical Analysis, Modeling, Feature Engineering, Validation

Visualization Tools: Power BI, Tableau, Microsoft Excel (Macros & VBA), Smartsheet, Google Sheets, Pivot Tables, DAX Measures, Matabolic, Seaborn, PowerPoint, SharePoint, Jupyter Notebook, Snowflake
