Engineering Management grad student and Lean Six Sigma Green Belt with U.S. manufacturing experience, driving supply chain optimization, process efficiency, and cost reduction through data-driven project management.

EDUCATION

University of Maryland Baltimore County

Baltimore, MD

Master of Science in Engineering/Industrial Management | GPA: 3.9

Jan 2024 - Dec 2025

Gayatri Vidhya Parishad College of Engineering (Autonomous)

Visakhapatnam, India

Bachelor of Engineering in Information Technology

Aug 2019 - Apr 2023

Relevant Course Work : Manufacturing Operations, Management for Product Design and Manufacturing, Financial Management, Management Leadership and Communication, Project Management and Advanced Project Management

WORK EXPERIENCE

Manufacturing & Process Improvement Intern

Jun 2025 - Aug 2025

Gerard Daniel Worldwide

Hanover, PA

- **Analyzed production and supply chain data** to identify inefficiencies and optimize material flow, achieving a **12% increase in throughput** and reducing handling delays by 20%.
- **Monitored inventory levels, coordinated supplier schedules, and optimized transportation workflows**, ensuring **timely replenishment and uninterrupted production**.
- Applied **Lean Six Sigma and 5S methodologies** to standardize operations, reducing changeover time by 15% and improving **on-time production fulfillment by 10%**.
- Developed **automated performance dashboards (Excel & SPC)**, reducing manual reporting by 12 hours/week and improving **operational visibility**.
- Supported **ISO 9001/IATF 16949 audits**, ensuring compliance and improving process governance.

Project Management Intern

Jan 2025 - May 2025

Sphere Hub (Via UMBC Maryland New Venture bwtech Program)

Remote

- Planned and coordinated the full lifecycle of the Sphere Hub housing platform, defining scope, timelines, and deliverables to transform the idea from a roommate-matching tool into a full-stack housing solution.
- Conducted **15 stakeholder interviews** with landlords and realtors and analyzed **50+ student surveys**, leading to **5 new platform features** and reshaping the business model based on user pain points.
- Created a **Work Breakdown Structure (WBS)** with **40+ tasks** and applied **CPM analysis** in MS Project to track dependencies, ensuring all milestones were met on time.
- Applied **Agile (Scrum)** practices with **bi-weekly sprints**, managing updates, risks, and priorities through **Jira** and **Google Workspace**, boosting team efficiency by **25%**.
- Performed **Earned Value Analysis (EVA)**, built a detailed **financial forecast projecting \$262K profit by Year 3**, and maintained delivery within **±5%** of planned budget through proactive risk and cost control.

CAD Engineer

Jun 2023 - Dec 2023

Opti Design Solutions Private Limited

Hyderabad, India

- Created and modified **2D and 3D models of rail components, assemblies, and structural systems** using **SolidWorks / CATIA**, improving design accuracy and reducing rework by **15%**.
- Prepared **100+ detailed manufacturing drawings** with **GD&T annotations** and **Bills of Materials** for production release.
- Conducted **tolerance analysis, fitment checks, and design validation** to ensure compliance with **EN 15085 rail standards**.
- **Led and mentored a team of 5 design interns**, overseeing CAD modeling tasks, reviewing drawings, and providing technical guidance to ensure project quality and deadlines were met.

Design Intern

Nov 2022 - Apr 2023

Opti Design Solutions Private Limited

Hyderabad, India

- Assisted in creating **2D drawings and 3D models of rail assemblies** using **SolidWorks / CATIA**.
- Supported fitment and assembly verification, learning the fundamentals of **GD&T and tolerance stack-up analysis**.
- Collaborated with **mechanical and production teams** to implement minor design improvements.
- Helped update **design documentation and change records in PLM/PDM systems**, ensuring consistent revision control.

SKILLS

Project Coordination & Manufacturing Ops: Production scheduling, BOM/MRP tracking, WBS, Gantt charts, preventive maintenance, order- to-cash lifecycle, On-time delivery monitoring, Inventory Management

Tools & Systems: Microsoft Excel, Google Apps Script, Power BI, Monday.com, MS Project, Smartsheet, Trello, Confluence, Google Workspace, AutoCAD, SolidWorks

Methodologies & Processes: Lean, Six Sigma Green Belt , SDLC, Agile, SOP documentation, KPI dashboarding, Root cause analysis, DFMEA, Poka-Yoke, Statistical Process Control

Collaboration & Communication: Cross-functional coordination, vendor/supplier alignment, stakeholder reporting, team training, QA/testing

Analytical & Technical: Data cleaning & visualization, inventory tracking, basic SQL, downtime analysis, process automation

CERTIFICATIONS

CAPM - Certified Associate in Project Management (In Progress) | LSSGI - Lean Six Sigma Green Belt | Post-baccalaureate Certificate in Project Management (UMBC) | Post-baccalaureate Certificate in Integrated Product Development, Manufacturing (UMBC) | CBRE Project Management Virtual Experience Program | Diageo Manufacturing Virtual Experience Program
