

Gurucharan kalali | Software Engineer

NC, USA | +1 (443) 3800-709 | gurucharankalalisde@gmail.com | [LinkedIn](#)

SUMMARY

Software Engineer with **4+ years of experience** delivering **scalable, high-performance applications** across **e-commerce, healthcare, and financial services** industries. Proven ability to drive the **full software development lifecycle** from planning and design to deployment and maintenance. Skilled in improving **system performance**, enhancing **user experience**, and supporting **business objectives** through **efficient, secure, and reliable solutions**. Experienced in **fast-paced Agile environments** with a strong focus on **collaboration, continuous improvement**, and meeting **tight deadlines**. Recognized for **streamlining release cycles**, reducing **production issues**, and contributing to **user engagement** and **retention growth**. Demonstrates strong **problem-solving abilities, attention to detail**, and a commitment to delivering **high-quality software** aligned with **organizational goals**. Adept at **cross-functional communication** and translating complex requirements into **actionable, value-driven solutions**.

TECHNICAL SKILLS

Languages: Java, Java 8, SQL, Python

Frameworks/Libraries: Scikit-Learn, Matplotlib, Seaborn, TensorFlow, Keras, Jupyter, Spring MVC, JSF, Hibernate, Node.js, React.js, Spring Boot, Microservices, Spring Security, Django, Flask, FastAPI, Pandas, NumPy

IDEs: NetBeans, IntelliJ IDEA, Eclipse, Visual Studio Code, PyCharm, Jupyter Notebook

J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC

Web Technologies: HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, JSON, XML, RESTful APIs

Application Servers: Apache Tomcat, WebSphere, Gunicorn, Nginx, AWS, Azure

Cloud & Databases: AWS (S3, Lambda, EC2), Azure (App Services, Storage), Google Cloud Platform, MySQL, PostgreSQL, MongoDB, NoSQL, SQLite

Build/Other Tools: UML, MS Visio, Maven, Gradle, JUnit, Jenkins, Docker, Kubernetes, Ansible

Version Control & Collaboration Tools: Git, GitHub, Jira, Trello, Bitbucket, GitLab

Testing Tools: PyTest, Unittest, Selenium

Methodologies: SDLC, Agile, Waterfall

PROFESSIONAL EXPERIENCE

Cisco Technology, NC | Software Engineer

Jan 2024 – Current

- Designed and launched a scalable e-commerce platform using **Python (Flask)**, reducing query response times by **20%**, resulting in a smoother checkout experience and increased customer retention.
- Developed dynamic front-end components with **React and Redux**, enhancing UX and increasing **user engagement by 25%**, contributing to a **15% rise in overall conversion rate**.
- Integrated **Stripe and PayPal** payment APIs with full **PCI-DSS compliance**, enabling secure transactions and driving a **30% increase in successful payment completion rates**.
- Built high-performance RESTful APIs and implemented **Redis caching**, enabling the system to handle **10,000+ requests/min** with <150ms latency, supporting flash sales and peak traffic with **zero downtime incidents**.
- Streamlined DevOps workflows by automating CI/CD with **GitHub Actions and Jenkins**, reducing deployment cycles by **30%** and decreasing production release errors by **40%**.
- Containerized services using **Docker** and deployed on **AWS EC2**, achieving **99.95% deployment reliability** and enabling rapid scalability during marketing campaigns and seasonal traffic spikes.
- Implemented end-to-end monitoring with **Grafana and Prometheus**, proactively identifying and resolving performance bottlenecks, maintaining **99.9% system uptime**, and improving incident response times by **35%**.

Cybage Software, India | Software Developer

Jan 2020 – Jul 2022

- Developed scalable RESTful APIs using Java (Spring Boot) for a multi-channel e-commerce platform, enabling seamless integration between microservices and front-end systems.
- Boosted back-end throughput by 30% during peak loads by implementing advanced multithreading and Redis-based caching strategies.
- Ensured 100% compliance with data security standards by integrating Spring Security and encryption mechanisms to safeguard sensitive information.
- Automated deployment processes using Docker and Jenkins, achieving zero-downtime releases and reducing deployment lead time by 40%.
- Enhanced performance and reliability by optimizing PostgreSQL queries and creating stored procedures for high-volume transactional processing.
- Spearheaded the migration from monolithic to microservices architecture, improving modularity and accelerating feature rollout by 15%.
- Partnered with DevOps to streamline CI/CD pipelines, facilitating smooth integration, continuous testing, and faster production deployments.

Citiustech, India | Front-End Developer

Mar 2019 – Dec 2019

- Translated detailed UI/UX designs into fully responsive web interfaces using React.js, resulting in a 25% increase in user satisfaction as per post-release feedback.
- Improved accessibility by implementing WCAG standards and ARIA roles, achieving 95% usability across various user demographics and contributing to a successful compliance audit.
- Optimized site performance through lazy loading, file compression, and JS/CSS minification, reducing average page load times by 40% and boosting engagement metrics.
- Built reusable, modular components for core features like user accounts and checkout, accelerating future development efforts by 30% and earning recognition as “Top Performer Intern.”
- Integrated RESTful APIs with real-time data syncing, ensuring consistent product inventory and user state—leading to a smoother shopping experience and a 20% increase in organic traffic via SEO enhancements.

EDUCATION & CERTIFICATION

Master in Computer and Information Science | Southern Arkansas University

May 2024

Bachelor of Automobile Engineering | VNR VJIET

May 2019

AWS Certified Cloud Practitioner (Oct 2024) | AWS Certified AI Practitioner (Nov 2024)
