

EDUCATION

The University of North Texas at Denton, M.S, Data science

GPA 3.8, (May 2023)

Jawaharlal Technological University Hyderabad, B.Tech., ECE.

May 2019

CAREER OBJECTIVE:

Proactive, Analytical, and Result-Driven professional seeking an entry-level Data Science/Data Analytics/Business Intelligence Analysis position focused on creating and developing data analysis models for business communications.

TECHNICAL SKILLS

Data Analysis Tools:	Rapid Miner, SAS
Programming:	Python (Intermediate), SQL, Core JAVA, C, R(basics)
Databases:	MySQL, Oracle 11g
Business Intelligence Tools:	Tableau, Power BI, Microsoft Office Suite (Excel)
Frameworks& Tools:	Jupyter notebook, JIRA, Test rail, Jenkins, GitHub, Eclipse, IntelliJ, Postman
SDLC:	Agile, Waterfall model
Relevant Course Work:	Data Visualization, Data Mining, Machine Learning, Data Modeling, Data Analytics.

WORK EXPERIENCE

Client: State of Illinois/ Data Analyst

July 2023 – current

- Employed **Python's pandas** library to clean and preprocess the data, handling missing values and data anomalies.
- Handled various file formats like **CSV, JSON, and XML**.
- Utilized **Erwin data** modeller to create **ERD's**.
- Achieved **data normalization** using **star- schema** methodology.
- Involved in the Design and development of the Enterprise **Data Warehouse** using **SQL Server**.
- Employed data querying language **SQL** to efficiently retrieve and extract data from databases.
- Performed **statistical analysis** and **data visualization** in **Tableau** to gain insights.
- Proficient in integrating **HIPAA** and **FHIR** standards for secure, compliant healthcare data operations.
- Worked under **Agile** methodology.
- Utilized **Git** for version control, managing codebase changes, collaborating with team members, and ensuring smooth integration and deployment of data processing scripts.
- Collaborated with **stakeholders** to understand their data needs and requirements, ensuring data extraction aligns with their objectives.

Rythmos, Hyderabad, India/ Associate Consultant

May 2019 – Nov 2021

Business Data Analyst (June 2020 – Nov 2021)

- Elicited and analyzed business requirements to streamline end to end business processes.
- Utilized **Python** and **Excel** to perform data validation, data cleaning and for data analysis.
- Employed advance Excel functions like **LOOKUP, MACROS, PDF2EXCEL** and custom **user defined** functions for data analysis.
- Utilized **SQL** queries to extract data from **SQL Server** databases.
- Proficient in using MS office tools like **Excel, Word, PowerPoint and Visio**.
- Utilized **SharePoint** to maintain project documentation.
- Developed interactive and insightful **Power BI dashboards** and reports to track key performance indicators (**KPIs**) and provide actionable business insights.
- Utilized **DAX (Data Analysis Expressions)** to create complex calculated measures and columns for data analysis and reporting.
- Collaborated with **business users** to present and interpret data analysis results, ensuring they understood the insights and their implications for decision-making.
- Conducted daily stand-ups, sprint planning, sprint reviews, and retrospectives following the **Agile** process.

Automation Test Engineer (May 2019 – June 2020)

- Developed **Automation test** scripts using **Selenium, Python, cucumber** on IntelliJ with **BDD** framework.
- Handled different kinds of testing like **smoke testing, Integration testing, Sanity testing, Unit testing and regression testing** in Dev, staging and prod environments at various STLC levels.

- Documented Test Scenarios, and Test cases in Excel using **Gherkin** format in **testrail** for future purpose.
- Developed the **Positive and Negative Test Cases** for various modules based on the business requirements, process flow, flow charts and program specifications.
- Expert is finding **P1 and P2 bugs** and discuss them with the developers.
- Performed **API** testing using **Postman** for data validation.
- Collaborated with **stakeholders** and business users to perform **UAT** testing.
- Experience in creating stories, reporting priority and severity bugs by raising tickets using **Jira**.
- Handled all aspects of **software development lifecycle** – Developing, production support and testing.

ACADEMIC PROJECTS

- **Data Warehousing:** Using the Convenience store data designed and architected a data warehousing model using the star schema methodology and achieved the normalization in the data. Designed and implemented Crow-foot ERD model using PhpMyAdmin and then formulated SQL queries for data retrieval.
- **Big Data Project:** Installed and configured **Hadoop MapReduce** HDFS and developed MapReduce jobs in **java** for data cleaning and preprocessing. Integrated **AWS** services, to run HDFS jobs on EMR cluster. Imported data using **Sqoop** to load data from **MySQL** to **HDFS** on regular basis. Written **Hive** queries for data analysis to meet the business requirements. Created **Hive** tables and worked on them using **Hive SQL**.
- **A/B and Multivariate Testing for E-Commerce Optimization:** In a hands-on academic project, I utilized **A/B testing, multivariate testing**, and experimentation frameworks to improve conversion rates for an e-commerce website. Using **Python's PyAB** library, I designed experiments to test **hypotheses** regarding changes to key features, such as CTA buttons and product page layouts. I analyzed test outcomes using **statistical significance tests (t-tests)** and visualized results through **Power BI**. This project provided valuable experience in designing experiments, analyzing data for business insights, and optimizing web performance through data-driven decisions.
- **Data Visualization using Power BI:** I've created dynamic dashboards in **Power BI**, employing diverse visualizations for in-depth analysis of critical **performance metrics** and **KPIs**. Leveraging Power BI's time intelligence functions, I facilitated seamless data exploration at varying granularities. I've used advanced **DAX** functions to create complex calculations, custom tables, and measures, thereby enriching the dashboards' analytical depth. The project showcased my proficiency in creating an interactive user experience through **slicers, filters, and drill-through actions**.

CERTIFICATION

- SQL for Data Science
- Snowflake – Hands on essentials Data warehousing and Data Engineering certification
- Data Analytics - Accenture Internship through Forage
