WORK EXPERIENCE

CodeAlpha

Frontend Developer Intern

Mar 2025 - May 2025

Remote

- **Developed and maintained responsive web applications** using Tailwind CSS and Next.js, enhancing design coherence and user engagement.
- **Implemented contemporary frontend solutions** that enhanced UI/UX performance and **increased page speed by 20%**.
- **Optimized development workflow** by leveraging component libraries such as ShadCN UI alongside React.js.

Freelance

Freelance Software Engineer

Jul 2023 - Feb 2025

Remote

- **Developed and maintained responsive web applications** using React, Next.js, Tailwind CSS, and ShadCN UI, ensuring clean code architecture and modern UI/UX design.
- **Collaborated with a mosque organization** to build a dynamic, user-friendly website for event announcements, prayer times, and donation integration.
- **Delivered full-stack solutions** with performance optimization, accessibility best practices, and mobile-first design, tailored to client needs across various sectors.

Rainbow Shops

Computer Bank Data Analyst

Aug 2021 - Jul 2022

Brooklyn, NY

- **Downloaded and consolidated** bank transaction data from multiple financial institutions used by 900+ retail store locations.
- **Analyzed and matched** external bank data against internal company records to ensure accuracy and consistency.
- **Investigated and resolved discrepancies** by researching variances between matched datasets, improving data integrity and reconciliation efficiency.

PROJECTS

Masjid-e-Khazra | <https://masjid-e-khazra.netlify.app/>

Masjid-e-Khazra

- Used React + Vite to develop a dynamic, community-focused web platform for a masjid with an emphasis on mobile responsiveness, accessibility, and performance.
- Incorporated functions to benefit the local Muslim community, such as event listings, prayer time schedules, and location-based updates.
- Designed in accordance with current web app standards, with scalability and user engagement in mind.

HashBot AI | <https://hashbotai.vercel.app>

- Created a full-stack AI application with Next.js, TailwindCSS, and Prisma ORM.
- Used AI models to have features like real-time communication between authenticated users and an AI assistant and AI photo generation.
- Concentrated on secure user session management, real-time message updates, and a clean user interface.

HashManga | <https://hashmanga.netlify.app/>

- A full-stack MERN web application with a responsive user interface (UI) constructed with React.js and Tailwind CSS that lets users browse, search, and read manga.
- Implemented JWT-based authentication to securely manage user sessions, storing user data and preferences in MongoDB.
- Designed and integrated search and filtering features to allow users to discover manga by title and genre easily.
