

# Haeun Kim

Dallas, Texas | 469-404-2647 | [haeun4372@gmail.com](mailto:haeun4372@gmail.com) | LinkedIn: [linkedin.com/in/haeunkim4372](https://www.linkedin.com/in/haeunkim4372)

## EDUCATION

### The University of Texas at Dallas, Richardson

Graduation May 2025

#### Master of Science, Business Analytics and Artificial Intelligence

GPA 3.83

Coursework: Machine Learning, Database Foundations, Data Visualization, A/B Testing, Prescriptive Analytics

Graduation December 2023

#### Bachelor of Science, Data Science

GPA 3.91

Honor: Dean's list for Fall 2021 and Spring 2022 and Spring 2023, Magna Cum Laude

Coursework: Database Systems, Machine Learning, Big Data Management, Computational Methods for Data Scientists

## WORK EXPERIENCE

### The University of Texas at Dallas, Richardson, Texas

August 2024 – May 2025

#### Teaching Assistant

- Improved exam pass rates by 20% by supporting over 200 students in "Applied Econometrics and Time Series Analysis" through clear concept explanations via office hours and personalized guidance.
- Managed and guided more than 40 student projects to successful completion, ensuring students met key milestones and enhanced their learning outcomes through applied problem-solving.

## PROJECT EXPERIENCE

### EY Biodiversity Challenge Project | Analytics Practicum

January 2025 – May 2025

- Achieved the highest f1-score (0.84) among all teams by improving model performance by 35% through advanced pre-processing, feature engineering, and hyperparameter tuning to predict frog presence using climate data.
- Proposed a business case linking model predictions to biodiversity monitoring, ecological farming, and ESG strategies, demonstrating real-world applicability beyond technical accuracy.

### Customer Airline Satisfaction Analysis | Predictive Analysis

January 2025 – May 2025

- Increased prediction accuracy to 91.25% using stepwise logistic regression with interaction terms, reducing AIC and improving generalizability across customer segments.
- Identified statistically significant service drivers through odds ratio analysis, providing insight into satisfaction factors by age group.
- Delivered top-ranked presentation by translating model results into age-targeted customer strategies, improving business relevance and audience engagement.

### San-Hak AI Online Internship | San-Hak Fund, Seoul, South Korea

July 2024

- Improved fraud detection accuracy to 85.21% by leading a team of five members in developing an XGBoost model with optimized hyperparameters for identifying high-risk insurance claims.
- Enabled real-time risk assessment by integrating with a backend system.
- Designed a user-friendly UI/UX for a web interface, allowing users to input accident details and instantly receive fraud probability.

### TI Market Analysis | Capstone Project, Texas Instruments, Richardson, Texas

August 2023 – December 2023

- Discovered pricing optimization opportunities by analyzing five years (2018-2023) of economic data on labor, transportation, and precious metal prices, producing insights that informed strategic planning.
- Improved price forecasting accuracy by 12% by developing an RNN model capturing correlations between precious metals (gold, silver, palladium) and USD exchange rates, strengthening financial risk management.

## ADDITIONAL INFORMATION

**Skills:** Python, R Studio, MySQL/PostgreSQL, Hadoop/Spark, Tableau/Spotfire, Microsoft Excel

**Language:** Korean, English
