PROFESSIONAL EXPERIENCE

Larry H. Miller Dealerships, UT

July 2024-Present

Title Clerk

- Coordinated with the Department of Motor Vehicles and state agencies to track and validate ownership records, ensuring data accuracy and timely processing in accordance with regulatory standards.
- Compiled and submitted complete documentation packages for vehicle ownership transfers, including lien data entry and verification, contributing to clean and consistent records management.
- Maintained and regularly updated vehicle title status in CDK (title tracking system), analyzing discrepancies, ensuring compliance with state/federal guidelines, and supporting audit readiness through meticulous data management.

Lincoln Heritage Life Insurance, Phoenix AZ (Remote)

April 2023-April 2024

QA Engineer

- Conducted thorough testing of new features, identified and documented defects to facilitate timely resolution.
- Spearheaded comprehensive Regression tests on existing software to ensure product stability.
- Collaborated with cross-functional teams to understand and test new features effectively.

Journeyfront, American Fork, UT

February 2022- March 2023

QA Engineer

- Directed the development of detailed test plans and test cases, ensuring 100% coverage of critical functionality.
- Implemented Jira to centralize and organize work processes, setting the company up for future expansion.
- Orchestrated seamless communication between cross-functional teams, resulting in the resolution of critical bugs within 48 hours.
- Documented test results and conducted Pre and post-deployment tests to ensure the integrity of core functionality.
- Managed Regression Automation initiative utilizing Java and TypeScript, resulting in a 40% reduction in testing time, equating to 200 hours saved per month.

DevMountain, Lehi, UT

February 2022 - April 2023

QA Mentor- part-time

- Provided personalized guidance to individual students, significantly enhancing their understanding of the curriculum and increasing graduation rates by 10%.
- Delivered weekly lectures on manual and automation practices, providing students with diverse teaching styles.
- Enhanced the QA curriculum to improve clarity and reduce confusion, boosting student confidence in their learning.

iFIT Health and Fitness, Logan, UT

May 2021 - January 2022

Software Tester

- Conducted regression tests on pre-release iFIT application builds, ensuring stability and reliability during deployment, thereby minimizing post-launch issues and enhancing user experience.
- Performed functional and non-functional tests to ensure comprehensive test coverage.
- Efficiently identified and communicated bugs for prompt resolution, aiding developers in prioritizing their workload.

DevMountain | Lehi, UT

October 2020 - January 2021

QA Engineer (student)

Solo Capstone Project - [Github Repo](#) | [Demo](#) |

TypeScript | Selenium Webdriver | NodeJS | XPath | CSS | Jest |

- Utilized Jira to meticulously document and manage test plans for Wyze.com, ensuring comprehensive quality assurance.
- Identified automation selectors and authored acceptance test scripts, demonstrating proficiency in automated testing practices.
- Developed multiple automated tests using TypeScript and identified a bug where searching for a product failed, highlighting the importance of thorough testing in ensuring product accessibility and functionality.

Prestman Auto, Salt Lake City, UT

December 2019 - May 2021

Title Clerk

- Produced vehicle title documents for hundreds of transactions with an extremely high attention to detail, ensuring accuracy and compliance.
- Provided title documents for government agencies, ensuring adherence to regulations and minimizing errors.
- Converted titles from salvaged to rebuilt while navigating a rigorous documentation process, ensuring legal compliance and vehicle roadworthiness.
- Processed solutions for financial institutions by manually identifying common process errors, improving operational efficiency and accuracy.

Tim Dahle Nissan, Murray, UT

July 2019 - December 2019

Deal Booker

- Reviewed car deals in final stages and applied finances to the correct accounts, ensuring accurate financial management.
- Prevented common accounting issues by carefully reviewing and closing accounts, reducing discrepancies.
- Managed trade-in payoffs by confirming title information and processing checks, streamlining transactions, and preventing delays.
- Maintained dealer sales compliance by identifying and correcting any errors in paperwork, resulting in an 85% reduction in compliance issues and ensuring smooth transaction processes.

D.Dahle Mazda, Murray, UT

May 2018 - July 2019

Accounting Clerk

- Managed hundreds of forms with high efficiency to generate vehicle titles, ensuring 95% timely processing and reducing administrative delays.
- Facilitated the smooth and efficient trading of vehicles between dealerships, ensuring streamlined operations.
- Verified title documents and conducted thorough reviews to identify and rectify potential errors, ensuring precision and compliance.

CIT Electronics, American Fork, UT

January 2018 - May 2018

Phone Tester

- Conducted tests to verify the condition and functionality of phone hardware, ensuring quality and reliability for new users.
- Followed standard hardware testing processes and successfully identified and resolved issues, ensuring optimal performance and reliability of devices.
- Tracked phone damage errors and accurately labeled all products with a 98% accuracy rate, ensuring precise inventory management and customer satisfaction.

Vivint Smart Home, Lindon, UT

February 2017- February 2018

Account Creation

- Efficiently created and set up new customer accounts, ensuring accurate data entry and verification.
- Provided hands-on assistance to field technicians in setting up and activating smart home security systems post-account creation
- Recognized for outstanding performance by winning an award for completing the highest number of surveys with technicians post-installation, demonstrating dedication to improving service quality.
