Professional Summary

An analytical and results-driven Data Analyst with experience in health-tech and fintech. Proven expertise in leveraging the **Azure** ecosystem (**Data Factory**, **Synapse**, **Databricks**) to build end-to-end **ETL/ELT pipelines**, develop predictive **machine learning models**, and create insightful **Power BI** dashboards. Adept at using **Python** and **SQL** to translate complex data into actionable business strategies and drive operational efficiency.

Technical Skills

Cloud & Big Data: Azure Data Factory, Azure Synapse Analytics, Azure Databricks, Azure Blob Storage, Azure SQL, Azure ML, Apache Spark, Delta Lake

BI & Visualization: Power BI, DAX, Power Query, Tableau, Matplotlib, Seaborn

Programming & Databases: Python (Pandas, NumPy, Scikit-learn), SQL (T-SQL), NoSQL

ETL & Data Modeling: SSIS, Dimensional Modeling, Star Schema, Snowflake Schema

Machine Learning: Regression, Classification, Forecasting (Scikit-learn, XGBoost), NLP

Tools & Methodologies: Git, GitHub, Agile/Scrum, JIRA

Education

Florida Atlantic University – M.S. in Data Science and Analytics | Boca Raton, FL

Graduated: April 2025

VNR Vignana Jyothi Institute of Engineering and Technology – B.Tech in Information Technology | Hyderabad, India

Graduated: May 2023

Work Experience

Optum |Miami| Data Analyst

May 2024 – Present

- Engineered scalable **ETL pipelines** using **Azure Data Factory** and **Azure Databricks** to process patient data into **Azure Synapse Analytics**, supporting analysis for a user base of 50+ clinicians.
- Developed dynamic **Power BI** dashboards with complex **DAX** measures to monitor patient outcomes, improving strategic planning by 20%.
- Built and deployed a patient readmission **classification model** using **Azure ML**, achieving 88% accuracy and enabling proactive care interventions.
- Authored optimized **T-SQL** queries and stored procedures to perform complex transformations and ad-hoc analysis on **Azure SQL Database**.

- Analyzed 1M+ transactions using **SQL** and **Python** to identify fraudulent patterns, contributing to a 15% improvement in fraud detection model accuracy.
- Automated daily operational reports using **Power BI**, reducing manual effort by over 15 hours weekly and providing real-time insights to leadership.
- Performed data cleaning and feature engineering on semi-structured financial data in **Azure Blob Storage** for a customer segmentation initiative.
- Collaborated in an **Agile/Scrum** environment using **JIRA** and **Git** for sprint planning, version control, and team collaboration.

Projects

Hospital Readmission Prediction System

- Developed a **classification model** in **Python (Scikit-learn)** to predict 30-day patient readmission, leading to more efficient clinical resource allocation.
- Deployed the model as a real-time predictive service using **Azure ML Studio** and visualized patient risk scores on an interactive **Power BI** dashboard.
- Utilized **T-SQL** to extract and preprocess training data from **Azure SQL**, ensuring high-quality inputs for the model.

E-commerce Demand Forecasting Engine

- Constructed an end-to-end **ETL pipeline** with **Azure Data Factory** and **Azure Databricks** to populate a central data warehouse in **Azure Synapse Analytics**.
- Implemented a **time-series model** in **Python** to forecast product demand, reducing overstocking costs by a projected 18% and improving inventory turnover.
- Created **Power BI** reports to track forecast accuracy and visualize sales trends, providing actionable insights to the supply chain team.

Real-Time Financial Market Sentiment Analysis

- Engineered a serverless pipeline using **Azure Functions** for real-time news ingestion, performing **NLP-based sentiment analysis** with **Python (NLTK)**.
- Stored processed sentiment scores and article metadata in **Azure Blob Storage** for historical analysis and model retraining.
- Designed a live-streaming **Power BI** dashboard to correlate market sentiment with stock prices, providing traders with immediate, data-driven insights.
