

Hamza Yasin

Senior Software Engineer | 2x Certified Salesforce

Cell: +923314763759 Email: m.hamzay23@gmail.com

LinkedIn: <https://www.linkedin.com/in/m-hamza-350852175/>

GitHub: <https://github.com/HAMZA-multitask>

Trailblazer: <https://www.salesforce.com/trailblazer/mhamza28>

Professional Overview:

- Having 4 years of experience in software development in Salesforce Commerce Cloud, Salesforce Marketing Cloud as well as in JavaScript, React JS, Node JS, Express JS, React Native and Database.
- Experience in developing web/desktop client/server applications, implemented cross-platform solution for data sharing between different systems.
- Have experience in Storefront Reference Architecture (SFRA) Implementation from scratch as well Site Genesis and PWA Headless. Have experience in building LINK cartridges as per Salesforce Commerce Cloud standards and get them certificated from Salesforce.
- Have experience in Salesforce Marketing Cloud and studios for contacts and customer journey management, emails handling, cloud pages and many more
- Have experience in React Native for creating Hybrid Mobile Apps for Android, IOS and Web. Have experience in Node JS, Express JS for creating backend API's and linked with frontend React JS.
- Have experience in getting the business requirements from clients and converting them into technical requirements.
- Perform Code reviews and deployments on different instances, attend Sprint planning and Status meetings and provide estimates and solutions, have experience working with Agile methodology and provide assistance to the juniors.

Education:

BS Computer Science - (4 years) 2016-2020

University of the Punjab, Lahore Pakistan.

Project:

ARZ Land Services Project.

Certifications:

- **SALESFORCE B2C COMMERCE DEVELOPER** - CREDENTIAL ID: 2400047
- **SALESFORCE AI ASSOCIATE** - CREDENTIAL ID: 5896050
- **WORDPRESS Digiskills**

Work Experience:

Designation	Company Name	Tenure
Senior-Software Engineer	Innovadel Technologies Limited UK	June 2023 – Till Date
Software Engineer	Innovadel Technologies Limited UK	June 2021 – June 2023
Associate Software Engineer	Shahruh Technologies	Jan 2021 – June 2021

Technical Skills and Domains:

Technical Languages	• Salesforce Commerce Cloud • SFRA/Site Genesis/PWA • Salesforce Marketing Cloud • Ajax/Axios/fetch • API's/Services/Hooks • Third Party Integrations • XML/JSON	• JavaScript • NodeJS • Express JS • jQuery • React JS • React Native	• Bootstrap • Chakra-UI • Native Base • HTML/CSS/SCSS • MySQL	• Jira • Bitbucket • SourceTree • Confluence • Github • Postman
Third party Integrations / Link Cartridges	Rikified, Yotpo, Listrak, E-ShopWorld, Clyde, Option Products, Adyen, Apple Pay, SFMC, Google Analytics, Google Tag Manager, Google Maps, Google Search, CK Editor			
Databases	MySQL, NoSQL (Mongo DB)			
Programming Tools	VS Code, Brackets, Eclipse, Spring Tool, SQL Server 2008, MySQL workbench, MongoDB Compass			
Build Tools	Bitbucket Pipelines, Expo, NPM, Yarn, NVM			

Projects:

Title	MVMT and Olivia Burton (Salesforce Commerce Cloud SFRA Architecture) (Jan 2021 – Till Date)
Company	Innovadel Technologies Limited
Description	Decouple customization for SFRA, design workflows and implement them, design and implementation of new features, Research and POC on new integrations and provide feedback, Integration and Customization of third-party link cartridges. Customize Business Manager Configurations and Metadata.
Role	Senior Software Engineer • Worked on Multi Sites with different stores, implement reusable code structure for multi sites handling, design the layouts for frontend also worked on backend side, implement new features. • Develop the architecture for migrations, worked on Product and Order Feeds in Jobs. • Integrate third party link cartridges. • Riskified, Yotpo, Listrak, EShop World, Option Product, Pre Order, Back Order, Shipping methods integrations and customizations. • Einstein and manual recommendations customizations.

	- Implement Quantity Selector, Variations and Group Variations in multiple sites. - Develop A/B test, worked with services, endpoints for API calls. - Provide Production Support and resolve production issues, performed Code Reviews and Provide technical assistance to juniors. - Deployment to deploy code on diff instances (Development and QA instance).
Tools/Technologies	Salesforce Commerce Cloud (SFRA Demandware), Node JS, JavaScript, jQuery, Bootstrap, SCSS, Business Manager Configurations, Multi Sites, ISML Templates.
Project URL	https://www.mvmt.com/home

Title	KaamKrew Application (React Native for Android/iOS/Web) (June 2023 – Till Date)
Company	Innovadel Technologies Limited
Description	Implement new and maintained exiting features, working on the Android, iOS and Web, implement third party packages and integrations, did bug fix and improvements, design new screens and features, research on 3rd party integrations, defined and fixing all the project dependencies, Working on builds for Android, IOS and Web for different instances.
Role	Senior Software Engineer - Integrate the Api's and CRUD operations, handle the Socket calls and data. - Design and Research on new features. - Defined various components for customization, defined customization for various functionality - Defined endpoints for Api's and implement app flows. - Managing the builds and APK's. - Attend sprint planning meetings and discussed implementations, work flows and provide estimations
Tools/Technologies	React Native, React.js, Native base, Expo, Axios, Google Maps and addresses, JWT Tokens, WebSocket, OAuth 2, Third party integrations and npm packages, API's integrations, Android, IOS, Web Application.
Project URL	https://www.kaamkrew.com/

Title	KaamKrew Dashboard (React JS) (Jan 2023 – Aug 2023)
Company	Innovadel Technologies Limited
Description	Build the application from scratch, setup the whole project, build the application using React js and Chakra UI, performed CRUD operations and consume Api's using Axios, handle forms, tables, and to create submit and show data, implement Pagination, Sorting, Select All features, implement third party packages and integrations like Google maps and addresses, Rating and Reviews, CK Editor for emails, start from scratch and delivered high quality work.
Role	Senior Software Engineer - Develop the architecture for whole processes, develop data handle and submit processes. - Handle all the code base, Setup and implement new features, develop flow diagrams for integration of different system. - Defined various components for customization, defined flows for automation of different services. - Defined customization for various functionality, research on third party features. - Handle the whole project and provide estimations.
Tools/Technologies	React.js, Chakra UI, Axios, CK Editor, Google Maps and Addresses, Rating Reviews, JWT token, Third party and npm packages.

Title	Salesforce Marketing Cloud (Integrations and Tasks) (June 2023 – Till Date)
Company	Innovadel Technologies Limited and Freelance Projects
Description	Setup the Dashboard from scratch, setup Salesforce Commerce Cloud integration with Salesforce Marketing Cloud, setup 3 rd parties service inside Salesforce Commerce Cloud for connecting to SFMC, customize the Dashboard setting for using Api's and hooks, integrate SFMC with Salesforce Accelerator project for emails when user login, forget password, place order and newsletter subscription, write Email templates with dynamic data from data extensions, using the SFMC hooks, Creating Triggers, Data extensions, templates for emails, used diff studios for handled diff tasks, worked on Cloud Pages and design the Cloud Pages, worked with Journeys and Mobile sms integrations, research the scenarios and implementations.
Role	Software Engineer - Develop the architecture for whole processes, develop code and integration setups. - Setup SFMC configurations and code requirements, develop flow diagrams for integration of different system. - Defined various components for customization, defined flows for automation of different services - Defined customization for various functionality
Tools/Technologies	Salesforce Marketing Cloud, Hooks Customization, Email Studio, Content Builder, Triggers, Data Extensions, Services, Rest/Soap API's, Cloud Pages, Mobile Studio, Web Studio, Journey Builder, Automations, Integrations.

Title	Salesforce Accelerators (Salesforce Commerce Cloud PWA Architecture) (June 2022 – Mar 2022)
Company	Innovadel Technologies Limited
Description	Setup Salesforce Commerce Cloud Integration with 3rd party APIs for login and fulfillment as well as PWA Kit (Headless), Used OCAPI and SCAPI hooks, Shop and Data API's, Customize the custom objects to utilize the business logic, Customize the logic for shipping methods, customize the PWA Kit to render the design, customize the order flow and get order data from OMS, design the Components and features in frontend with React and Chakra UI, customize the existing and create new controllers, models, integrate Salesforce Accelerators with SFMC for emails
Role	Software Engineer - Develop the architecture for whole processes, develop data migration setups. - Develop flow diagrams for integration of different system, defined various components for customization. - Defined endpoints for getting the custom status and sync it back to 3rd party systems. - Customize the PWA design and add new features combined with backend OCAPI. - Integrate Payment method PayPal.
Tools/Technologies	. Salesforce Commerce Cloud, Node JS Headless Architecture, OMS, OCAPI, SCAPI, Shop API's, Data API's, Hooks implementation, Hook Customization, Integrate PayPal. Salesforce Marketing Cloud, React.js, Chakra UI.
Project URL	https://innovadel-pwa-production.mobify-storefront.com/

Title	Movado Watches (Salesforce Commerce Cloud SFRA Architecture) (Jan 2021 – June 2022)
Company	Innovadel Technologies Limited

Description	Decouple customization for SFRA, design workflows and implement them, design and implementation of new features, research and POC on new integrations and provide feedback, integration and Customization of third-party link cartridges, customize Business Manager Configurations and Metadata.
Role	Software Engineer - Worked on Multi Sites with 5 stores, Customize the sites and implement new features. - Develop the architecture for migrations, Design the layouts for frontend also worked on backend side. - Integrate third party link cartridges. - Riskified, Adyen, Clyde, Yotpo, Listrak, EShop World, Option Product, SFMC, Pre Order integrations and customization, Shipping methods customization. - Einstein and manual recommendations customizations. - Implement Quantity Selector, Variations and Group Variations in multiple sites. - Develop A/B test, worked with services and implement services, endpoints for API calls. - Provide Production Support and resolve production issues, performed Code Reviews and Provide technical assistance to juniors, deployment to deploy code on diff instances (Development and QA instance)
Tools/Technologies	Salesforce Commerce Cloud (SFRA Demandware), Node JS, JavaScript, jQuery, SCSS, Bootstrap, Business Manager Configurations, Multi Sites, ISML Templates.
Project URL	https://www.movado.com/us/en/home

LINK Cartridge Projects:

Title	Clyde (Salesforce Commerce Cloud SFRA Architecture) (Oct 2021 - Dec 2021)
Company	Innovadel Technologies Limited
Description	Development link cartridge, development the logic of warranty option, sync the products on delta vs full mode, retrieval warranty pricing against each product, product option customization, development of unit and integration testing, write jobs for handling option products prices.
Role	Software Engineer - Develop the architecture of link cartridge, develop the logic to generate the catalog.xml having product option. - Develop the logic to add the option product price when customer selects the warranty widget. - Develop the logic to export catalog in different modes to Clyde.
Tools/Technologies	Salesforce Commerce Cloud (SFRA Demandware), Node JS, REST API's, Job Framework, BM Customization, Catalog Import, XML File Generation.
Project URL	https://joinclyde.com/

Title	Cloudinary (Salesforce Commerce Cloud SFRA/Site Genesis Architecture) (June 2021 – Dec 2021)
Company	Innovadel Technologies Limited
Description	Development of link cartridge, add chunk scripts to upload large image to Cloudinary, development of script for storefront template and controllers, development of job for catalog export using configurable fields as well as for image upload, Documentation and metadata.
	Software Engineer - Develop the architecture of link cartridge, add customization, develop FTP/SFTP connection for larger file upload, connect with Rest APIs to upload images. - Defined the cartridge structurer to work on three different modes on catalog, slots/static content & category level and provide compatibility for Controller and SFRA version. - Develop the capability of auto upload the images and rewrite the image URLs and custom logic to render Cloudinary gallery widget.
Tools/Technologies	Salesforce Commerce Cloud (SFRA / SG Demandware), Node JS, Images upload and retrieval, External CDN Configuration, REST APIS, Job Framework, BM Customization, Chunk Oriented Programming.
Project URL:	https://cloudinary.com/home

Title	Printable.pk (Jan 2021 to June 2021)
Company	Shahruh Technologies
Description	Add improvements on the existing site, design and implement new features, design workflows and implement them, customization of the existing features.
Role	Associate Software Engineer - Implement the new pages and features, fixed the Design issues and design the responsive layouts. - Create form and fields, handle the form data dynamically, Improve Site performance.
Tools/Technologies	HTML, CSS, Bootstrap, JavaScript, jQuery, AJAX, React JS, Node JS.

Achievements:

- 1.Star of the Year 2021** (Innovadel Technologies Limited):
 In recognition of excellent performance and outstanding achievements throughout the year for "Cloudinary" project.
- 2. Star of the Month (March-August-November) 2022** (Innovadel Technologies Limited):
 In recognition of excellent performance and outstanding achievements for "Movado-Clyde, MVMT, Olivia Burton" project.
