

Haneesh Reddy Pothireddy

Denton, TX | +1 940 354 9671 | haneeshreddy032001@gmail.com | [LinkedIn](#)

Professional Summary

M.S. computer science intern skilled in machine learning, NLP, and generative AI. Developed transformer-based models for text summarization and question answering while optimizing data pipelines and ensuring clear visual data insights. Proficient in Python, agile development, and data preprocessing. Eager to apply technical expertise to drive data-driven AI initiatives.

Education

University of North Texas

M.S., Computer Science

May 2025

Geethanjali College of Engineering

B.Tech, Computer Science

Jun 2022

Experience

University of North Texas

Graduate Assistanship

Aug 2023 - May 2023

- Developed transformer-based models for text summarization and question answering using Python, integrating NLP techniques and core software development principles.
- Preprocessed large-scale academic datasets with comprehensive data augmentation and filtering routines, leveraging data preprocessing and feature engineering skills.
- Evaluated model performance and fine-tuned hyperparameters to improve accuracy, while documenting findings and utilizing data visualization to communicate results.
- Collaborated with cross-functional teams in code reviews and project refinement with AI, HCI, and UX teams, ensuring clear communication of technical concepts.

Virtusa

Data Science – Financial Forecasting

Jun 2022 - Jun 2023

Remote

- Designed and implemented machine learning models for payment delay prediction and time series forecasting using Python, applying statistical models and supervised learning techniques.
- Documented end-to-end ML pipelines and delivered performance dashboards to business teams, effectively communicating complex insights through data visualization.
- Coordinated with DevOps teams to automate retraining and data refresh processes, reinforcing agile development practices and version control with Git.

Projects

LLM-Based Image Captioning

- Fine-tuned a pre-trained model on the MS COCO dataset to generate creative image descriptions.

NLP-Powered Resume Ranker

- Developed a web app that ranks resumes based on job descriptions using sentence embeddings and cosine similarity.

Skills

- **Languages:** Python, Java, C++
- **ML Frameworks:** PyTorch, TensorFlow, Keras, SparkML
- **Data:** Pandas, NumPy, Scikit-learn, Hugging Face Transformers
- **Specialties:** Generative AI, LLMs, Transformer Models, NLP, Computer Vision, Machine Learning, Deep Learning
- **ML Pipeline:** Data Collection, Cleaning, Feature Engineering, Model Tuning, Data Visualization
- **Tools:** Jupyter, Git, VS Code, DVC, Weights, Biases, Cloud Computing
- **Soft Skills:** Communication, Time Management, Documentation, Collaboration
- **Core Competencies:** Software Development Principles, SQL, Agile Development

Certifications

- DeepLearning.AI Generative AI with LLMs
- Google TensorFlow Developer Certificate – In Progress
- Hugging Face NLP Specialization – Coursera
