

HANSA PRADHAN

Seeking Full-Time Software Engineer roles - Grad Student at VT - 3 years professional experience

☎ 571-394-0032 ✉ pradhanhansa99@gmail.com [linkedin.com/in/hansapradhan](https://www.linkedin.com/in/hansapradhan) github.com/hansapradhan

Education

Virginia Tech

Masters of Engineering, Computer Science and Applications (Data Analytics and AI)

Aug. 2023 – May 2025(Expected)

Virginia, US

SRM University

Bachelor of Technology, Computer Science and Engineering

May. 2016 – Jun 2020

Chennai, India

Delhi Public School, RK Puram

High School

May. 2010 – Jun 2016

New Delhi, India

Experience

Coforge

Data Analyst Intern

May 2024 – Aug 2024

Princeton, New Jersey

- Gathered and analyzed client requirements to implement solutions involving cloud data migration and dashboard creation using Tableau
- Observed and documented the client's data flow pipeline and ETL processes, identifying bottlenecks and recommending optimizations for increased scalability and availability.

Infosys Limited

Power Programmer(Microsoft .NET Full-Stack Developer)

Sep 2020 – Aug 2023

Pune, India

- Developed microservice applications using Google Cloud, C#, .NET Core, Couchbase, SQL Server, and RabbitMQ to support the Price Prediction System. Also, guided junior developers and interns, offering mentorship.
- **Reduced response time by 8%** through the strategic setup and configuration of Google Cloud within the app.
- Designed, tested, and deployed RESTful services for multi application support in a company, **serving 200k users**.
- Balanced roles as a developer and scrum master, **leading 7 agile product lifecycles** with high-quality deliverables.
- Collaborated with geo-distributed teams to ensure smooth project delivery and operational efficiency.
- *Continuous Integration/Deployment Pipeline Integration, Pull Requests, Code Reviews, Scrum Master, Unit Testing*

Project Experience

Talk Money LLM | HTML, CSS, React, Axios, NodeJS, Python, FastAPI, MongoDB

Mar 2024

- Developed the User Interface of an AI-powered chatbot that promotes financial literacy by providing personalized advice to users based on their transactions. This was built as part of HooHacks Hackathon 2024. Used LangChain for LLM and FastAPI.
- This can potentially **increase user engagement by 30%** leading to increased profits.

Booksian Bookstore Website | React, Java, mySQL, Javascript, full stack development

Feb 2024

- Designed and implemented an online bookstore using React for the frontend and Java for the backend, ensuring seamless user experience
- Gained hands-on experience in full-stack development, including front-end design, back-end logic, database integration, and server management.

Flight Status Prediction Dashboard | python, GCP, Seaborn, Plotly, Dash and Kaggle(dataset)

Dec 2023

- Built an webapp that visualizes Flight Status Prediction dataset from Kaggle. Added **20+ graphs and 4 features**
- Utilized Plotly (interactive plots) and Seaborn(static visualizations), to make data comprehensible for end users.

Technical Skills

Languages: Python, C/C++, JavaScript, C#, Java, HTML, CSS, SQL, NoSQL, XML

Domain Knowledge: Finance, Logistics, Security

Databases: SQL Server, MongoDB, Couchbase, Azure Data Lake, BigQuery, PostgreSQL

Technologies/Frameworks: GCP, Azure, REST API, Microservices, Angular, React, Hadoop, Spark, .NET

Developer Tools: Jupyter Notebook, PyCharm, Visual Studio, Git, JIRA, Confluence, Kibana

Core Competencies: FullStack development, UI/UX, Machine Learning, Cloud Computing

Achievements

- **STG Excellence Award:(Jul 2021)** Recognized for outstanding contributions to Infosys Strategic Technology Group
- **HackWithInfy Hackathon:(Apr 2020)** Ranked in the top 1% and secured a Power Programmer interview at Infosys
- **Scholar Badge (DPS RKPuram):(May 2016)** The award was given for academic excellence in school.
