SUMMARY

Detail-oriented Data Analyst with 4+ years of experience designing, developing, and optimizing business intelligence solutions. Proven track record of transforming user requirements into actionable dashboards and reports using Power BI, Tableau, and SSRS. Expert in SQL Server (2014+), query optimization, and complex T-SQL logic for high-performance reporting. I am skilled in integrating data from OLTP, OLAP, SaaS, and REST APIs to deliver accurate, timely insights. Adept at collaborating with cross-functional teams, illustrating designs with UI mockups and process flows, and ensuring data solutions meet business goals.

SKILLS

- **BI AND REPORTING TOOLS:** Power BI, Tableau, SSRS, Excel (Advanced), Power BI Service
- **DATABASES:** SQL Server (2014+), PostgreSQL, Oracle, MySQL
- **PROGRAMMING & QUERIES:** SQL/T-SQL, DML/DDDL, Stored Procedures, Python
- **DATA INTEGRATION:** ETL, Data Modeling, OLTP/OLAP, REST API ingestion
- **PERFORMANCE OPTIMIZATION:** Query tuning, indexing strategies, stored procedure optimization
- **METHODOLOGIES:** Agile/Scrum, UI mockups, storyboards, process flows
- **OTHER TOOLS:** Azure Data Factory, Databricks, Snowflake, Git, Jira

PROFESSIONAL EXPERIENCE

Data Analyst | Tetra Tech – Baltimore, MD | Aug 2024 – Present

- Gather requirements from product managers, engineers, and automation teams to design and deliver BI reporting solutions.
- Create and maintain Power BI dashboards and SSRS reports for disaster recovery analytics, cutting manual reporting time by 35%.
- Develop complex T-SQL queries, stored procedures, and indexing strategies to boost SQL Server performance by 40%.
- Integrate and model data from OLTP databases, REST APIs, and SaaS applications for unified reporting.
- Produce UI mockups and storyboards for dashboard layouts, ensuring alignment with business goals and user needs.

Graduate Research Assistant – Big Data / BI Development | University of Maryland, Baltimore County – Baltimore, MD | Aug 2023 – May 2024

- Designed and optimized reporting solutions using Power BI, Tableau, and SQL for academic and research projects.
- Created UI prototypes, process flows, and data models to support large-scale analytics.
- Integrated datasets from multiple sources (PostgreSQL, APIs, Hadoop-based pipelines) into SQL Server and PostgreSQL for analysis.
- Led workshops for graduate students on query optimization, data visualization, best practices, and BI tool usage.

Data Analyst – Financial & Risk Analytics | Cognizant Technology Solutions – Chennai, India | Jan 2021 – Dec 2022

- Developed enterprise-level reports and dashboards in Power BI and Tableau for financial risk monitoring.
- Wrote advanced T-SQL logic, stored procedures, and DML/DDDL scripts to automate ETL workflows, reducing data processing time by 50%.
- Optimized queries and indexing strategies, improving report refresh speeds by 30%.
- Partnered with business analysts to define KPIs, ensure data quality, and deliver compliance-ready reports.

EDUCATION

- Master's in data science – University of Maryland, Baltimore County
