SUMMARY

AI Fullstack Engineer Intern with expertise in architecting and deploying scalable backend solutions using ExpressJS, Docker, and AWS, geared towards optimizing multi-agent AI workflows. Achievements include advancing CI/CD deployment pipelines with Jenkins and SonarQube, and enhancing agent orchestration through Zapier integrations. Committed to utilizing technical mastery and impactful projects to foster innovation and efficiency in AI engineering efforts.

EXPERIENCE

FindrAI

May 2025 - Present

AI Engineer

Remote

- Built browser automations and AI agent orchestration logic using Zapier and webhook integrations to solve complex tasks, improving task efficiency and reducing manual intervention
- Architected and deployed scalable backend infrastructure using ExpressJS, Docker, and AWS to support multi-agent AI workflows with LLMs (Claude, Gemini) and Cortex memory systems.
- Enhanced API performance and streamlined CI/CD deployment cycles by setting up Jenkins pipelines for Docker-based deployments, applying SonarQube for code quality checks, and managing package versions with JFrog Artifactory, resulting in faster and more reliable deployments

University of North Texas

Jul 2024 - May 2025

Graduate Teaching Assistant

Denton, TX

- Mentored 150+ students in Data Science & Big Data labs, teaching Python, SQL, and Pandas for data wrangling and analysis.
- Designed and evaluated lab assignments on Apache Spark and Hadoop, guiding students through batch and distributed data processing.
- Introduced real-time streaming exercises using Apache Kafka, and built end-to-end ETL pipelines and Docker, boosting deployment success.
- Led CI/CD workshops using Jenkins and AWS, and implemented monitoring with CloudWatch and Postman, reducing student troubleshooting time.

KLOG Solutions

Jul 2022 - Apr 2023

Software Developer Intern

Hyderabad, IN

- Created automated builds and deployments via Jenkins, applied Docker to containerize backend services, and followed Agile workflows.
- Developed NodeJS REST APIs and frontend dashboards for real-time shipment tracking using Bootstrap.
- Integrated third-party APIs and handled relational data with MySQL stored procedures. Collaborated in Agile workflows and conducted API testing using Postman.

EDUCATION

University of North Texas

2023 - 2025

Masters of Science, Computer Science

- **GPA:** 3.8
- **Coursework:** Machine Learning, Introduction to Big Data and Data Science, Data Visualization, Distributed and Parallel Database Systems, Database Management System (DBMS), Software Engineering

JNTUH

2018 - 2022

BTech, Computer Science & Engineering

SKILLS

- **Code:** Javascript, React, NextJS, TypeScript, NodeJS, Python, Java, C/C++, HTML/CSS, SQL, NoSQL, RestAPIs
- **Tools:** Git, Jenkins, Jest, SonarQube, JFrog, Docker, Kubernetes, Grafana, Splunk, AWS, Shell, Groovy, Zapier, Agentic AI, LLMs, Kafka, CI/CD, Postman, llm, Agentic AI

ACHIEVEMENTS

- Distinguished Graduate Student Award, UNT
- Earned the "0-100" certificate on 100xDevs-Full Stack with Devops
- Completed Meta Front-End Developer Professional, Web Development Bootcamp and Python certifications
