SUMMARY

Results-driven Analyst with a solid foundation in institutional research, business intelligence, and data analytics. Experienced in collecting, analyzing, and disseminating data to support institutional effectiveness, organizational success, and informed decision-making. Skilled in creating dynamic dashboards, conducting statistical analyses, and improving reporting efficiency through advanced data cleaning, integration, and predictive modeling techniques.

EDUCATION

Master of Science in Business Analytics, Kent State University

Bachelor of Commerce (Computer Applications), Osmania University

SKILLS

- Data analytics and reporting: **SQL, Power BI, Tableau, DAX, advanced Excel**
- Business analysis: Process improvement, survey analysis, institutional performance metrics, automation, **Dashboards**
- Predictive modeling & statistical analysis: Advanced ML algorithms (regression, classification), statistical modeling, forecasting

EXPERIENCE

Merchandise & Retail Analytics Intern | **Walt Disney World**, Orlando, FL

Aug 2024 – Feb 2025

- Developed Excel analytics tools, drove a task to reduce shrinkage and reduced it by 19%
- Collaborated cross-functionally on data-driven strategic initiatives, reducing inventory discrepancies by 15%.
- Maintained comprehensive audit trails and documentation, enhancing operational transparency by 25%.

Business Analytics Intern | Smart Knower, Remote

July 2021 – Jul 2023

- Conducted data cleansing and analysis, boosting client operational efficiency by approximately 15%.
- Developed **interactive Tableau dashboards**, improving real-time decision-making capabilities for stakeholders.
- Automated repetitive reporting tasks using **Python**, decreasing manual workload by over 25%.

PROJECTS AND RESEARCH:

Sentiment Classification with RNN – Kent State University.

2023

- Created an RNN-based text classification pipeline (TensorFlow, Keras), achieving 87% accuracy on sentiment prediction tasks, while implementing embedding layers and dropout to enhance generalization.

Sales & Inventory Dashboard - Kent Natural Food Store.

2024

- Developed Power BI dashboard to track sales performance and inventory compliance across 12K+ transactions. Used advanced SQL (joins, CTEs, window functions) to ensure data accuracy and identify trends. Implemented data validation processes reducing stockouts by 20% through improved forecasting.

Deep Drive Analytics Dashboard | **Python, Pandas, Plotly** – Interactive Data

2025

- Built interactive dashboard for revenue performance visualization with custom financial metrics
- Implemented real-time filtering capabilities for dynamic revenue analysis and reporting
- Developed a **custom metric**, “horsepower per \$1,000,” to quantify performance-to-price value of sports cars.
