

HARI CHANDANA KESARI

Denver, CO | 3032104021 | harichandanakesari32@gmail.com | [Linkedin](#) | [Github](#)

SKILLS

- **Programming Languages:** Python, R
- **Libraries:** Pandas, NumPy, Seaborn, Matplotlib
- **Data Visualization:** Tableau, Power BI, Excel
- **Database Management:** SQL, MySQL, PostgreSQL, SQL Server Management Studio (SSMS)
- **Development & IDEs:** Jupyter, Visual Studio Code
- **Project management:** Jira, Asana, Agile, Scrum

EDUCATION

Master of Science in Health Informatics conc. in Health data science
University of Denver

09/2023 - 06/2025

Bachelor of Dental Surgery
NTR University of Health Sciences

08/2017 - 06/2023

EXPERIENCE

Data Analyst Intern (SQL, Tableau, Python, ML)

01/2025 – 05/2025

G Technologies, Australia. Remote

- Engineered an AI-driven EMR system aggregating and refining healthcare data from diverse sources, established HIPAA-compliant documentation standards and secure data management protocols, improving data quality.
- Executed advanced SQL queries to extract and explore healthcare data from large-scale databases, performed data profiling and quality assessments, ensuring clean datasets for downstream analytics and model training.
- Collaborated with data scientists to develop and optimize machine learning models using Python, TensorFlow, PyTorch, enhancing disease diagnosis predictions by 25% through advanced analytics while supporting ad-hoc requests.
- Created interactive Tableau dashboards that presented AI-integrated diagnosis predictions alongside actual diagnosis findings, demonstrating performance metrics to technical and non-technical stakeholders.

Research Analyst Intern (R programming language)

05/2024 - 06/2024

ThinkNeuro, LLC, USA. Remote

- Constructed automated data pipelines in R using the bibliometrix package to process and examine 100 mental health research publications, uncovering critical economic barriers impacting healthcare accessibility.
- Designed interactive visual maps with VOSviewer to illustrate citation networks and research patterns, accelerating policy formulation by reducing manual analysis efforts by over 40%.
- Evaluated publication trends and research performance indicators through statistical techniques, identifying strong associations between socioeconomic factors and mental health care disparities across varied demographics.
- Presented comprehensive research findings through detailed summaries and visual reports, providing senior leadership with data-driven insights that informed targeted policy interventions.

Dental Informatics Intern (Excel)

07/2022 - 06/2023

Narayana Dental College & Hospital, India. Onsite

- Enhanced clinic operations by optimizing EMR-based scheduling, reducing patient wait times and increasing daily patient capacity by 27%, from 22 to 28 patients.
- Analyzed care data for 1,000+ patients monthly, providing actionable insights into treatment outcomes, and optimized clinical choices by performing cost-benefit analysis for treatment selection.
- Created advanced Excel dashboards to monitor financial metrics, leading to a 15% increase in monthly collections by identifying opportunities for improved procedure profitability and insurance claim success.
- Conducted supervised dental procedures including exams, scaling, and restorations, thoroughly documenting treatment data for comprehensive clinical outcome analysis.
- Served as liaison between clinical staff and IT department for EHR management, delivered comprehensive training to dental students, and facilitated effective communication to ensure seamless system adoption.

PROJECTS & PORTFOLIO

Customer Behavior Analysis and Segmentation - SQL | [Link](#)

- Executed advanced customer analytics using SQL Server, T-SQL, CTEs, and window functions, processing 500K+ transactions across 30+ countries to segment customers into 4 lifetime value tiers with 99% data accuracy.
- Architected SQL-based RFM models and aggregation pipelines to uncover 12-month purchasing patterns, optimize customer targeting, and drive insights into revenue contribution.

Patient risk stratification & Alert system - SQL | [Link](#)

- Pioneered clinical readmission risk analytics with advanced SQL (CTEs, window functions, CASE expressions), analyzing 7 patient risk factors, guiding post-discharge care for high-risk patients.
- Orchestrated automated risk scoring database with SQL stored procedures that categorized patients into 5 risk levels, enabling real-time alerts for clinical staff to prioritize interventions.

Health Insurance cost Prediction - Python, ML | [Link](#)

- Engineered a machine learning model that achieved 93% prediction accuracy for health insurance charges, leveraging Decision Tree algorithms, KMeans clustering, and advanced feature engineering (Polynomial Features, Label Encoding) on healthcare datasets.
- Directed end-to-end exploratory data analysis (EDA) on 7+ features, uncovering key patterns, mitigating outliers, and significantly improving model validation and interpretability using Python (Pandas, Seaborn) and Scikit-learn.

Healthcare Quality Improvement Analytics - Python | [Link](#)

- Conducted advanced analysis of 3 healthcare KPIs over 60 months of operational and patient safety data, applying Pandas for data wrangling, and Matplotlib, Seaborn for visualizing time-series trends and correlation patterns.
- Uncovered significant statistical relationships through regression modeling leveraging Sci-py, translating 5 years of complex multi-metric data into actionable insights that supported evidence-based quality improvement initiatives.

Patient Analytics Dashboard - Power BI | [Link](#)

- Designed interactive healthcare dashboard in Power BI by cleaning, merging, and transforming clinical datasets using Power Query, supporting operational and patient-level analysis.
- Built a star-schema data model and created 10+ DAX measures to monitor KPIs such as patient wait times, satisfaction scores, appointment types, and referral patterns for leadership reporting.

Flu Vaccination Analytics Dashboard - SQL, Tableau | [Link](#)

- Developed complex SQL workflows using CTEs, joins, aggregation, and CASE logic to extract, clean, and transform 165K+ patient immunization records, building a reliable dataset to track flu shot compliance (85.9%) .
- Constructed an interactive Tableau dashboard with filters, parameters and calculated fields visualizing compliance trends by age, race, and county, enabling data-driven decision-making for public health initiatives.

Retail Sales Analytics and Dashboard Automation - Excel | [Link](#)

- Built an advanced Excel dashboard using Power Query for automated data cleaning, PivotTables for aggregation across regions and products, and real time visualizations to track monthly KPIs.
- Automated end-to-end reporting workflows using Power Query transformations and slicers, reducing manual effort by 40%, cutting report generation time from 2 hours to 20 minutes, and improving data reliability across monthly reports.

CERTIFICATION

- Accomplished **advanced SQL skill assessment** – HackerRank.
- **SQL 5-star gold badge** - HackerRank.
- Attained Google Data Analytics Professional Certificate – Google.
- Completed HIPAA awareness training – American Health Training.
- Certified in Diagnosis coding using ICD - 10 CM - Centers for Medicare & Medicaid Services.
- Certified in Procedure coding using ICD - 10 PCS - Centers for Medicare & Medicaid Services.
