

Harika Uppalapati

Data Analyst

Dallas, TX | harika1133@outlook.com | (940) 843-5761 | [LinkedIn](#)

Summary:

Data Analytics Consultant with 5+ years of progressive experience across consulting, healthcare, retail, and finance domains. Expert in designing interactive dashboards using Power BI, Tableau, and Excel; building scalable ETL pipelines with SQL, Python, SAS; and integrating data across Snowflake, Oracle, and cloud platforms like AWS, Azure, and GCP. Skilled in translating complex data into actionable insights through KPI development, stakeholder collaboration, and data storytelling. Adept at automating reporting workflows via Power Automate and SharePoint, with proven ability to improve forecast accuracy and reduce operational latency. Demonstrated success in agile environments using JIRA, Confluence, and Git, with strong command of statistical techniques, anomaly detection, and data quality assurance.

Skills:

Business Intelligence & Visualization: Power BI (DAX, Power Query, Row-Level Security), Tableau (LOD Expressions, Prep Builder), Looker Studio, Excel (Power Query, Pivot Tables, VBA), SSRS, Google Analytics

Programming & Automation: SQL (Joins, Window Functions, Optimization), Python (Pandas, NumPy, Seaborn), R (Statistical Analysis), Power Automate, Excel Macros, SharePoint Automation

Cloud Platforms: AWS (S3, Lambda, Glue, Redshift), Azure (Data Factory, Synapse, Databricks), Google Cloud Platform (BigQuery), Snowflake, Microsoft Fabric

ETL & Data Management: ETL Pipelines (Cloud & On-Premise), Data Warehousing, Data Modeling (Star, Snowflake), Data Wrangling, Data Cleaning & Validation, Data Quality Monitoring, Metadata Management

Advanced Analytics & Testing: Forecasting, Predictive Modeling, Regression Analysis, A/B Testing, Hypothesis Testing, Anomaly Detection

Consulting & Collaboration Tools: Stakeholder Management, KPI Development, Data Storytelling, Agile (Scrum), JIRA, Confluence, Git, MS PowerPoint

Experience:

Data Analyst, McKinsey & Company

Feb 2024 - Present

- Designed and deployed executive-level dashboards in Power BI and Tableau using DAX, LOD, and Power Query, enhancing forecast accuracy by 30% and driving faster decision-making across healthcare, finance, and retail clients.
- Developed and managed scalable, cloud-native ETL pipelines using SQL, Python, and SAS through AWS Glue, Azure Data Factory, and BigQuery, consolidating data from Snowflake, Oracle, and PostgreSQL to reduce reporting latency by 40%.
- Defined and implemented key performance indicators (KPIs) and visual metrics aligned with client OKRs, improving operational visibility and strategic alignment.
- Automated end-to-end reporting workflows using Power Automate and SharePoint integration, accelerating delivery cycles by 20% and reducing reliance on manual processes.
- Led cross-functional collaboration with product owners and business stakeholders, applying agile methodologies (JIRA, Confluence, Git) to deliver iterative data solutions with measurable business impact.
- Applied anomaly detection, hypothesis testing, and advanced data validation logic to ensure 95%+ dashboard accuracy across high-volume datasets.

Data Analyst, Avenir Technologies

Jun 2017 – Jul 2021

- Created and maintained 100+ interactive dashboards and reports using Power BI, Tableau, Excel (Pivot Tables, VBA), and SSRS, enhancing business reporting and insight generation by 40%.
- Built automated data workflows using SQL and Python scripts combined with Power Automate, significantly reducing manual effort and reporting errors.
- Developed data pipelines leveraging Microsoft Fabric and Snowflake to support ongoing business intelligence and analytics workflows.
- Delivered ad hoc insights and business reports using Excel Power Query and visualization tools, improving internal leadership decision support.
- Ensured data quality and consistency through systematic validation and cleaning processes, enabling reliable Tableau and Power BI integration.

Education: MASTER OF SCIENCE IN COMPUTER SCIENCE | UNIVERSITY OF NORTH TEXAS
