SUMMARY

Results-driven Business Analyst with 3+ years of experience in data-driven decision-making, financial modeling, business intelligence, and process optimization. Skilled in leveraging SQL, Python, Power BI, Tableau, and Snowflake for data visualization, KPI tracking, and forecasting. Proficient in Agile, Scrum, SDLC, and DevOps methodologies, with expertise in requirement gathering, process automation, and stakeholder management. Adept at driving operational efficiency, enhancing risk mitigation, and improving reporting accuracy by 20%.

SKILLS

Methodologies: SDLC, Agile/Scrum, Waterfall, Lean, DevOps

Business Analysis: Cost/Benefit analysis, Impact analysis, GAP analysis, Risk analysis, SWOT Analysis

Business Intelligence: Tableau, Power BI, Qlik Sense, Looker, Google Analytics, Alteryx, Power Query, DAX

Database Management: MySQL, Oracle, MS Access, Snowflake, Neo4j, Azure, AWS

Programming Language: Python, Java, C, C++, HTML/CSS, R programming

Project Management Tools: MS Project, MS Excel, MS SharePoint, MS Office, Asana, Trello, Jira, Rally, Confluence

Documentations: FRD, BRD, SRS, Test Plan, User Guide, Use Cases, User Story, User Personas

Tracking Tools: HP Quality Center, Rational ClearQuest, RTM

ERP Planning & CRM: SAP, MS Dynamics Nav, Salesforce, HubSpot

User Experience (UX) Tools: Draw.io, Figma, Axure RP, Balsamiq, Moqups

Technical Skills: SAS, ETL, Data Analysis, Data Modeling, Statistics, JAD, KPIs, Requirement gathering, Process Mapping, Quality Assurance (QA), A/B testing, MS Visio, RACI Matrix

Soft Skills: Communication, Time Management, Leadership, Ownership, Adaptability, Negotiation, Decision- Making, Conflict Resolution, Problem Solving, Collaboration

EXPERIENCE

Business Analyst | Elevance Health

Jan 2024 – Present

- Designed and developed interactive dashboards using Power BI, Tableau, and Qlik Sense, enabling real-time KPI tracking and reducing reporting time by 20%.
- Conducted SQL-based financial analysis, identifying cost-saving opportunities and improving investment strategy performance by 15%.
- Integrated Snowflake and AWS databases to centralize and streamline data pipelines, improving data accessibility for executive decision-making.
- Applied DAX and Power Query to automate data transformations, improving processing efficiency by 30%.
- Conducted GAP & SWOT analyses to identify process inefficiencies, leading to a 15% increase in workflow efficiency.
- Ensured regulatory compliance by assessing financial risks and aligning business processes with federal healthcare laws.
- Developed risk mitigation frameworks to improve decision-making accuracy by 25%.
- Automated manual data workflows using Python and R, reducing processing time by 30% and eliminating errors.
- Created detailed business process documentation (BRD, FRD, SRS, User Stories, Use Cases), improving cross-functional collaboration.
- Led Agile sprint planning and backlog grooming, ensuring 95% on-time project delivery.

- Developed test plans and UAT scripts, ensuring seamless software implementation and defect reduction by 30%.
- Led cross-functional collaboration between business, IT, and finance teams, aligning business needs with technical capabilities.
- Created executive-level presentations using MS Visio, Draw.io, and Axure RP, increasing stakeholder engagement by 20%.
- Conducted A/B testing and UX research, refining data visualization techniques to enhance user experience.

Business Analyst | Oracle

June 2019 – Aug 2022

- Designed Looker & Power BI dashboards, tracking performance metrics and improving asset allocation accuracy by 10%.
- Implemented predictive modelling using Python and R, reducing inventory holding costs by 28% and improving forecasting accuracy by 15%.
- Created ETL pipelines in Snowflake and MySQL, ensuring seamless integration of large datasets for advanced analytics.
- Developed SQL-based automation scripts, improving data extraction speed by 25% and reducing manual errors.
- Conducted cost-benefit and impact analysis, identifying process gaps and implementing automation, resulting in a 50% reduction in operating budget.
- Automated data cleaning and processing workflows, reducing manual labour time by 30%.
- Performed market research and competitive analysis, providing actionable insights that led to a 15% increase in revenue generation strategies.
- Managed Agile development projects, working closely with cross-functional teams, ensuring seamless implementation of data-driven business strategies.
- Led feature prioritization and product roadmaps using Jira & Confluence, improving project delivery speed by 20%.
- Developed detailed FRDs, BRDs, and user stories, improving software requirement clarity and reducing defects by 30%.
- Conducted training sessions for business users, enhancing data literacy and reporting capabilities.
- Created detailed financial reports and executive summaries, leading to more data-driven decision-making by senior leadership.
- Led UAT testing and quality assurance, ensuring accurate implementation of business intelligence solutions.

EDUCATION

Master in Business Analytics

Southern university at New Orleans

Jan 2023- May 2024

Bachelor in Agricultural Science & Rural Development

Loyola Academy Degree & PG college

June 2017- June 2021
