

Harikrishnan Nair

California, USA | +1 (341) 203-3778 | hari.viswanadhan7@gmail.com | [LinkedIn](#) | [Portfolio](#)

Data Scientist with 4 years of experience designing and deploying data-driven solutions using ML, NLP, and Generative AI. Adept at building predictive models, developing NLP pipelines, and applying deep learning techniques to large datasets. Proficient in Python, SQL, and cloud platforms (AWS, GCP, Azure), with experience bringing models from research to production to enable data-informed decision-making.

EXPERIENCE

Data Scientist | Ramp – Remote, USA,

March 2025 – Present

- Developed enterprise-scale churn and fraud detection using XGBoost, LSTM, and Transformers, raising accuracy 22% and cutting attrition 18%.
- Designed NLP workflows with Hugging Face Transformers, BERT, and spaCy, analysed 5M+ interactions and boosting campaign engagement 25%.
- Collaborated on dataset curation, annotation workflows and improving data quality.
- Trained and deployed fraud detection models on AWS SageMaker, streamlining experiments and reducing training time by 30%.
- Designed feature pipelines in SageMaker Feature Store to support real-time fraud monitoring, improving prediction consistency by 18%.
- Implemented LLM-powered customer support automation with RAG and prompt engineering, reducing query resolution time 28% and improving NPS 15%.

Analyst | Accenture Solutions Pvt. Ltd.

March 2021 – July 2023

- Developed healthcare software for U.S. government programs using SQL, APIs, and multithreading, reducing application processing time by 12%.
- Conducted data analysis using SQL, Tableau, and Power BI to build real-time dashboards, improving executive reporting efficiency by 45%.
- Designed and maintained ETL workflows using Python, SQL, and Airflow, streamlining data prep and improving analytics accuracy by 30%.
- Performed A/B testing, regression, and statistical modelling to deliver insights that improved decision-making speed and efficiency by 20%.
- Authored documentation and training materials for BI tools and workflows, accelerating team onboarding and tool adoption by 25%.
- Collaborated on product releases to enhance data accessibility and ensure WCAG compliance, supporting inclusive analytics delivery.

Data Scientist | Nexova – India,

December 2019 – February 2021

- Built predictive ML models (Random Forest, Logistic Regression, SVM), improving financial forecast accuracy 30% for insurance and banking use cases.
- Designed time-series forecasting models (LSTM, RNN) to predict investment trends, increasing accuracy 28% across structured datasets.
- Developed ETL pipelines using SQL, Pandas, and Python, automating ingestion and preprocessing, reducing manual workload by 40%.
- Created business intelligence dashboards in Power BI, improving real-time reporting and decision efficiency by 25% for leadership teams.
- Deployed ML models on AWS SageMaker and GCP ensuring production-ready scalability across multiple client environments.

EDUCATION

Master of Science in Information Systems

July 2023 - May 2025

California State University, Fullerton, CA

PROJECTS

Insurance Underwriting: Heart Disease Prediction Models

May 2025

- Developed Logistic Regression, Random Forest, and SVM models using Scikit-learn, achieving 80.4% accuracy and 90% recall, optimizing risk scoring for underwriting.

Company Health/Risk Analysis

May 2025

- Built an automated financial analysis system using Flask, SQL, Python(Pandas, NumPy), and integrated external financial APIs for real-time data, cutting manual effort by 99% and enabling faster risk evaluation.
- Built interactive dashboards for trend detection, red flag alerts, and customizable financial reports, enabling faster and more informed investment decisions.

MV Stock Portfolio Optimization

Dec 2024

- Designed and implemented ETL pipelines with web scraping to extract, clean, and transform stock data from Yahoo Finance and exchanges into PostgreSQL, ensuring more than 99% data completeness and robust time-series analysis.
- Applied Mean-Variance Optimization in R with PostgreSQL datasets, achieving 54.75% return and a Sharpe ratio of 3.83, outperforming benchmarks with reproducible ETL workflows.

TECHNICAL SKILLS

- **Certificates:** Microsoft Power BI Data Analyst, AWS Machine Learning Associate, CSPO(Certified Scrum Product Owner)
- **Languages/Libraries:** Python (Pandas, NumPy, SciPy, Scikit-learn), R, SQL, PostgreSQL, MySQL, Spark, Databricks, Airflow
- **Machine Learning & AI:** Supervised/Unsupervised ML, NLP (BERT, Transformers, RAG, Text Classification), Deep Learning (CNN, LSTM, VAEs), LLMs, Generative AI (Prompt Engineering, Fine-tuning, Deployment), Time Series Forecasting, Model Monitoring & Retraining, EDA, Data Mining, APIs
- **Visualization:** Tableau, Power BI, Looker, MS Excel,
- **Developer Tools:** Jupyter Notebooks ,AWS (SageMaker, Lambda, EC2, S3, CloudWatch), GCP,Azure ML, Databricks, MLflow, Feature Store, Docker, Kubernetes, CI/CD (GitLab, Jenkins, GitHub Actions),Snowflake, Hive, Hadoop, MongoDB, Neo4J, Trino
