

Harini Reddy Gade

Full Stack Developer | gadeharinireddy@gmail.com | 862-348-1623

Professional Summary

Full Stack Developer with 4+ years of experience in designing and deploying scalable enterprise applications using Java, Spring Boot, React, and cloud platforms (AWS & GCP). Proficient in building REST APIs, microservices, and responsive web interfaces. Experienced in integrating AI/ML solutions, event-driven systems, and DevOps automation with Docker and Jenkins in Agile environments.

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, SQL, PL/SQL

Frameworks: Spring Boot, Spring MVC, Hibernate, React, Vue.js, Angular, Flask

Cloud/DevOps: AWS (ECS, Lambda, S3, SageMaker), GCP (BigQuery, Pub/Sub), Docker, Jenkins, Git

Databases: Oracle, MySQL, PostgreSQL, MongoDB, Elasticsearch

Tools & Others: Kafka, RabbitMQ, JUnit, Mockito, Swagger, Maven, Gradle, Agile/Scrum

Education

Master's in Computer Science – New Jersey Institute of Technology, Jan 2022 – May 2023

Bachelor's in Electronics & Communication Engineering – Sreyas Institute of Engineering & Technology, Jun 2017 – Jul 2021

Professional Experience

Prudential Insurance Company – NJ

Full Stack Developer | Aug 2023 – Present

- Modernized Prudential's Benefit Center by transforming legacy billing and claims systems into a microservices-based full-stack platform using Spring Boot, React, AWS ECS, and Docker, improving performance, scalability, and deployment agility.
- Developed Payment and Billing microservices with Spring Boot, Kafka, and RabbitMQ, integrated AI-driven claim risk prediction via AWS SageMaker, and built a React + TypeScript dashboard for real-time payments and analytics.

CVS Health – NY

Software Developer Intern | Jan 2023 – May 2023

- Migrated legacy systems to GCP-based microservices with Spring Boot and Docker/Kubernetes, improving scalability and performance.
- Implemented LLM-driven document summarization pipelines for medical claims using Python and Vertex AI.

Wipro Technologies – Hyderabad, India

Software Developer | Aug 2020 – Nov 2021

- Built and deployed cloud-hosted dashboards for Microsoft using Spring MVC, React/Vue.js, and AWS (Lambda, S3, CloudFront), integrating backend services into scalable, event-driven web applications with RabbitMQ.
- Delivered high-performance, modular solutions through Agile collaboration, optimizing user experience and ensuring seamless integration across distributed systems.
