EDUCATION

Georgia State University

Master of Science in Computer Science

Jan 2021 - May 2023

Atlanta, GA

Bhoj Reddy Engineering College for Women

Aug 2016 - Sept 2020

Bachelor of Technology in Computer Science

Hyderabad, TS

SKILLS

Data Analysis: Python, R, SQL, Excel, Tableau, Power BI

Data Manipulation: Pandas, NumPy, SQL, Data Wrangling

Statistical Analysis: Hypothesis Testing, Regression Analysis, Time Series Analysis

Machine Learning: Scikit-learn, Regression, Classification, Clustering

Big Data: Hadoop, Spark

Database Management: MySQL, MongoDB, PostgreSQL, Elasticsearch, Snowflake

Version Control: Git

Other: Angular, NodeJS, Java, Spring Framework, Agile, Jira, Jenkins, AWS, CI/CD, Docker

EXPERIENCE

Data Analyst

RapidIT, Inc.

Mar 2022 - Jun 2023

Atlanta, GA

- Utilized **Python, SQL, and Excel** to analyze customer data, resulting in a 20% increase in customer retention rates.
- Developed interactive dashboards using **Tableau**, showcasing data insights to stakeholders and facilitating data-driven decision-making.
- Conducted exploratory data analysis and implemented data cleaning procedures using **Pandas**, improving data accuracy by 15%.
- Built predictive models with a regression analysis approach, achieving an 85% accuracy rate for customer behavior forecasting.

Graduate Teaching Assistant

Georgia State University

Jan 2021- May 2022

Atlanta, GA

- Led and collaborated in lab sessions for 130+ undergraduates on debugging and **algorithm application**, resulting in a 40% reduction in average memory usage and improved **problem-solving techniques**.
- Conducted interactive tutorials for 70+ learners on **fundamental computing** concepts, achieving an 82% knowledge retention rate.

Data Analyst

GradLane Solutions Pvt. Ltd.

Apr 2019 - Dec 2020

Hyderabad, TS

- Developed data cleaning and preprocessing pipelines with **Python and Pandas**, ensuring data quality improvements of 20%.
- Conducted **data profiling** and performed **statistical analysis** to identify anomalies and outliers.
- Built and deployed machine learning models for **predictive analysis** and **demand forecasting**, achieving a 90% accuracy rate.
- Collaborated with the development team to implement **data collection mechanisms** for new product features, improving data collection efficiency by 40%.
- Assisted the data modeling team in designing and implementing logical and physical data models for database optimization.

PROJECTS

Parkinson's Disease Detection using Handwriting Kinematics and ML Classification

- Utilized **NumPy, Pandas, and Scikit-Learn** to perform feature extraction-based analysis on spiral tests of members to successfully diagnose Parkinson's Disease.
- A variety of models, including **RF, KNN, SVM, and Decision tree**, were implemented, and the Random Forest model resulted in 100% accuracy.

Failure Risk Assessment by Student Performance Analysis

- Improved model accuracy by 80% through correlation analysis and addressed data quality concerns using **NumPy, Scikit-learn, pandas, and matplotlib**.
- Enhanced model performance by 30% by implementing various algorithms such as **Naive-Bayes, KNN, SVM, and decision tree** and evaluating their accuracy and recall.

Customer Segmentation Analysis

- Utilized clustering algorithms and **Python** to conduct customer segmentation analysis, resulting in the identification of 4 distinct customer segments.
- Developed visualizations using **Tableau** to present customer segments and provided actionable recommendations for targeted marketing campaigns.
