Highly analytical data professional with a Master's in Health Data Science and five years of experience. I specialize in applying data analysis, predictive modeling, and dashboarding to optimize operations. My skills in managing high-volume data and translating complex findings into actionable insights are directly transferable to a fast-paced environment.

PROFESSIONAL EXPERIENCE

Pharmacy Technician – Operations & Reporting

Walgreens, St. Louis, MO

Aug 2025 – Present

- Handled 60+ customer service requests daily, ensuring SLA adherence, accuracy, and compliance.
- Leveraged pharmacy system reports to manage 1,500+ SKUs, reducing service delays and improving efficiency by 15%.
- Resolved insurance claims with a 98% first-pass approval rate, aligning with call center-style productivity and quality metrics.
- Generated weekly KPI reports (approval rates, turnaround times, and customer satisfaction indicators) to support performance monitoring.

Graduate Teaching Assistant – Machine Learning & Predictive Analytics

Saint Louis University, St. Louis, MO

Aug 2023 – Dec 2024

- Designed Tableau and Power BI dashboards to track KPIs and forecast workload demands, mirroring call center capacity planning.
- Consolidated multiple data sources into a unified reporting system, improving data access and decision-making by 35%.
- Conducted regression and time-series modeling to forecast trends, providing insights similar to call volume and staffing optimization.
- Partnered with faculty and students to communicate complex data findings to non-technical audiences with clarity and impact.

Data Analyst – Healthcare Operations

Asram Super Specialty Hospital, Malkapuram, India

Sep 2019 – Dec 2022

- Built dashboards in Tableau and Power BI to monitor workforce performance and resource utilization, reducing bottlenecks in service delivery.
- Conducted root-cause analysis on workflow inefficiencies, enabling data-driven improvements that reduced turnaround times by 15%.
- Forecasted patient inflows and staffing needs using historical data, supporting scheduling and operational planning—analogueous to call center forecasting.
- Created single-source-of-truth documentation for KPIs and workflows to ensure alignment across operational teams.

TECHNICAL SKILLS

- **Languages & Tools:** SQL, Python, R, Excel, Power BI, Tableau, Looker, R Shiny
- **Analytics & Reporting:** KPI dashboards, SLA/CSAT/NPS tracking, call volume forecasting, workforce performance analysis
- **Data Management:** Relational data modeling, ETL pipelines, automation of reporting processes
- **Platforms (Familiar):** Salesforce CRM, Call Center Systems (NICE, Genesys concepts)
- **Other:** Statistical modeling, Forecasting, Root-cause analysis, Documentation & data governance

PROJECTS

KPI Dashboard Development (Capstone Project)

- Built a Power BI dashboard to monitor key performance indicators (KPIs), reducing reporting time by 35%.
- Applied SQL and Python for data cleaning, transformation, and KPI calculation, ensuring a reliable single source of truth.

Automated ETL Pipeline

- Developed an ETL pipeline with Docker and Azure DevOps to automate data processing, reducing reporting errors by 30% and enabling real-time insights.

EDUCATION

- **Saint Louis University**, St. Louis, MO
Master's in Health Data Science
- **KVSR Siddhartha College of Pharmaceutical Sciences**, Vijayawada, India
Bachelor of Pharmacy
