## PROFESSIONAL EXPERIENCE

### Capstone Project – Predicting & Analyzing Leading Causes of Death in the U.S. Using Machine Learning

*Saint Louis University – Dept. of Health & Clinical Outcomes Research, St. Louis, MO* Jan 2025 – Present

- Built and evaluated time-series and classification models (ARIMA, LSTM, Random Forest, Logistic Regression, SVM, KNN, Clustering) for mortality trends.
- Conducted data cleaning, EDA, and model validation using AUC-ROC, RMSE, and Silhouette Score.
- Partnered with faculty to derive strategic public health recommendations based on model outputs.
- Applied revenue and risk analysis techniques to inform potential health policy interventions.

### Graduate Teaching Assistant (Healthcare Informatics & Data Science)

*Saint Louis University, St. Louis, MO*

Aug 2023 – Dec 2024

- Mentored graduate students on SQL querying, health data models, and informatics tools.
- Led Python and R workshops focused on clinical data extraction, visualization, and modeling.
- Supported faculty in grading over 100 student projects in machine learning and EHR analytics.

### Clinical Data Analyst

*Asram Super Specialty Hospital, Malkapuram, India*

Sep 2019 – Dec 2022

- Collaborated with clinicians to extract and analyze EHR data for improving patient outcomes.
- Integrated EHR, lab reports, and historical data into a unified repository, improving access by 35%.
- Conducted regression analysis to reduce readmission rates by 15% and optimize workflows.
- Developed Tableau and R-Shiny dashboards to support ICU monitoring and resource planning.
- Conducted clinical chart reviews and supported data queries aligned with Epic workflows.

### Pharmacy Intern

*KVSR Siddhartha College of Pharmaceutical Sciences, Vijayawada, India*

Jul 2019 – Dec 2019

- Performed drug interaction analysis and improved patient adherence reporting by 15%.
- Supported senior pharmacists in clinical documentation and data quality reviews.

---

## TECHNICAL SKILLS

- **Languages:** R, Python, SQL
- **EHR Systems:** Epic (Advanced), Cerner (Familiar), Custom EHR platforms
- **Data Tools:** Tableau, Power BI, R-Shiny, Matplotlib, Seaborn
- **Machine Learning:** Regression, Classification, Time-Series Forecasting, Clustering
- Generative AI Fundamentals (Databricks)
- Machine Learning & AI Specialist (Coursera), Advanced R Programming (DataCamp)
- **CDM Knowledge:** Familiar with mapping challenges to Common Data Models (CDMs)

---

## PROJECTS

### Diabetes Prediction Using ML

- Achieved 99.12% accuracy using Random Forest models; optimized features via preprocessing.

### Survival Analysis on PBC Dataset

- Applied Cox and Weibull models in R to determine survival predictors.

### ETL Pipeline for Scientific Research

- Reduced data errors by 30% using automated pipelines with Docker and Azure DevOps.

---

## EDUCATION

- **Saint Louis University, St. Louis, MO**

*Master's in Health Data Science*

- **KVSR Siddhartha College of Pharmaceutical Sciences, Vijayawada, India**

*Bachelor of Pharmacy*
