

Harish Golla

Data Analyst

(201) 575-7767 | harishgolla08@gmail.com | Jersey City, NJ | [LinkedIn](#)

SUMMARY

Data Analyst with 3+ years of hands-on experience leveraging statistical analysis, data engineering, and visualization to deliver actionable insights and improve operational efficiency. Adept in Python, SQL, Tableau, Power BI, and AWS, with proven success in automating workflows, enhancing data governance, and enabling data-driven decisions. Improved customer satisfaction by **15%**, reduced infrastructure setup time by **60%**, and boosted data processing efficiency by **35%**.

SKILLS

Programming Languages: SQL, Python, R
Data Visualization Tools: Tableau, Power BI, MS Excel
Libraries/Packages: Pandas, NumPy, Matplotlib, Seaborn, Scipy, ggplot2
Databases: MySQL, SQL Server
ETL Tools & Other Technologies: Hadoop, SSIS, Talend, Apache NiFi, SAP, SAS, Salesforce, DBT
Operating Systems: Windows, Linux
Methodologies: SDLC, Agile, Waterfall

EXPERIENCE

Data Analyst, Freddie Mac, USA **August 2024 – Present**

- Designed and implemented MySQL queries and Python scripts to clean, wrangle, and structure large datasets, resulting in a 35% improvement in processing speed and 15% gain in data accuracy.
- Built and maintained interactive Tableau dashboards and Power BI reports to visualize KPIs, trends, and operational metrics, improving executive decision-making by 20%.
- Automated recurring reports using Python, SQL, and AWS Lambda, reducing manual efforts by 40% and ensuring timely data delivery.
- Validated over 100 million customer records during a major migration from Teradata to Azure Databricks, ensuring complete data accuracy and minimizing system downtime.
- Developed a Power BI dashboard to track customer segmentation and data quality, which led to an 80% increase in operational efficiency across teams.
- Led data profiling and transformation efforts using Informatica and AWS Glue, contributing to stronger data governance and compliance practices.
- Created and enforced a scalable Data Governance Framework, establishing rules and workflows that enhanced data consistency and accountability.
- Mentored junior analysts on SQL optimization, data visualization standards, and stakeholder communication, supporting faster onboarding and improved team output.

Data Analyst, Experion Technologies, INDIA **May 2020 – December 2022**

- Developed Python scripts for automating data cleaning and preparation using Pandas and NumPy, cutting manual effort by **30%** and data prep time by **40%**.
- Designed and delivered Power BI dashboards and Excel models for finance and operations, improving reporting speed and accuracy by **25%**.
- Optimized SQL Server and PostgreSQL queries used in dashboards and internal tools, reducing query execution time by **15%**.
- Built ETL pipelines using Informatica and Talend to integrate multiple data sources and load structured data into a centralized warehouse.
- Conducted data validation and analysis using R (ggplot2), Python, and SQL for marketing campaigns and customer performance metrics.
- Assisted in a Proof of Concept for Google BigQuery migration, testing and verifying the accuracy and performance of transferred datasets.
- Collaborated with business teams to define data requirements, build ad hoc SQL queries, and deliver customized reports supporting international analytics initiatives.

EDUCATION

Masters in Data Analytics and Visualization, Yeshiva University, New York, US **January 2023 – December 2024**

Bachelors in Electronics and Communication Engineering, Reva University, Bengaluru, India **August 2018 – May 2022**
