

HARISH POLISHETTI

FULL STACK DEVELOPER

Kansas, USA | Mobile: (913)-717-9509 | Email: harishpolishetti97@gmail.com | www.linkedin.com/in/harishp0829

SUMMARY

- Experienced Python Developer with 5+ years of expertise in designing and building scalable web applications.
- Proficient in Django, Flask, and FastAPI for backend development, with expertise in PostgreSQL and MongoDB.
- Skilled in developing and implementing microservices architecture using Python, improving system responsiveness by 30%.
- Optimized database interactions using SQLAlchemy and Django ORM, enhancing query performance and data retrieval efficiency.
- Built RESTful and GraphQL APIs with Flask and FastAPI, reducing API response times by 15% and enabling real-time data updates.
- Implemented Celery and Redis for background task processing, improving system efficiency and scalability.
- Integrated secure authentication and authorization using JWT, OAuth, and OAuth2 for enhanced security.
- Deployed applications on AWS, Docker, and Kubernetes, optimizing cloud deployment and ensuring high availability.

SKILLS

Front-End Technologies	HTML, CSS, Bootstrap, Material UI, JavaScript, TypeScript, ES6, React.js, Redux, React Hooks, Angular.js, Tailwind
Back-End Technologies	Python, Node.js, Express.js, Django, Flask, FastAPI, RESTful API, WebService, Microservices,
Python Libraries	NumPy, Pandas, Matplotlib, Seaborn, SciPy, TensorFlow, PyTorch, Scikit-Learn, Keras, OpenCV, NLTK, BeautifulSoup, Scrapy, Celery, Pytest, PySpark, Streamlit, FastAPI
Methodologies	Waterfall, Agile Scrum, Agile Kanban
IDEs	PyCharm, Jupyter Notebook, Spyder, Google Colab, NetBeans, VS Code
Web Services	RESTful, SOAP, GraphQL, gRPC
Databases	SQL, MongoDB (NoSQL), PostgreSQL, MySQL, Firebase, SQLite, Cassandra, Redis, Neo4j
CI/CD & Tools	Jenkins, GitHub Actions, GitLab CI/CD, Docker, Kubernetes, Terraform, CodeShip
Testing Tools	Pytest, Selenium, Unittest, Robot Framework, Postman, Jest, React Testing Library, Mockito
Cloud & Deployment	AWS (Lambda, S3, EC2, RDS), Google Cloud (GCP), Azure, Docker, Kubernetes, MLOps, Cloud Functions
Web Servers	Apache Tomcat, Nginx, Gunicorn, uWSGI, Apache HTTP Server
Big Data & ETL	Hadoop, Spark, Kafka, Airflow, Dask, PySpark, Apache Flink

EDUCATION

Master's in Computer Science – University of Central Missouri, MO, USA

Bachelor's in Electrical & Electronics Engineering– Jawaharlal Nehru Technological University, Hyderabad, India

EXPERIENCE

JPMorgan Chase & Co, Remote | Jun 2023 -Current| Full Stack Developer

- Developed **scalable microservices** using **Python (FastAPI, Flask, Django)**, improving **transaction processing system reliability** by **30%**.
- Optimized **SQLAlchemy & PyMongo** interactions for **PostgreSQL and MongoDB**, significantly **reducing data retrieval times**.
- Leveraged **PySpark** for **distributed data processing**, optimizing **fraud detection algorithms** and reducing response time for flagging suspicious transactions by **20%**.
- Designed and implemented **RESTful APIs** using **FastAPI and Flask**, reducing **page loading times** by **15%**.

- Integrated **Celery with Redis** for **background task processing**, improving asynchronous **financial transaction workflows**.
- Built **MLOps pipelines** using **TensorFlow, MLflow, and Kubeflow**, ensuring **automated model deployment and real-time monitoring** of credit risk.
- Developed **low-latency Python modules** for **high-frequency trading applications**, optimizing execution speeds for **sub-millisecond processing**.
- Implemented **Internationalization (i18n)** using **Flask-Babel and React-i18next**, enabling multi-language support for global users.
- Designed secure **RESTful APIs** using **Flask and OAuth2.0**, ensuring seamless **legacy banking system integration** and **SOX/PCI-DSS compliance**.
- Integrated **AWS CloudWatch and Prometheus** for **real-time monitoring** of application performance, resource utilization, and error tracking.
- Optimized **MySQL and PostgreSQL schemas**, enhancing **data access efficiency** for **large-scale transactional workloads**.
- Developed an **API Gateway** using **Flask and Nginx**, incorporating **centralized authentication, rate limiting, and request validation**.
- Managed **project dependencies** using **Poetry and pipenv**, ensuring **consistent and reproducible builds**.
- Automated **CI/CD pipelines** with **GitHub Actions, Kubernetes, and Jenkins**, streamlining **testing, building, and deployment of containerized applications**.
- Collaborated in an **Agile Scrum framework**, participating in **Sprint Planning, Daily Stand-ups, Sprint Reviews, and Retrospectives**.
- Collaborated in an **Agile Scrum framework**, participating in **Sprint Planning, Daily Stand-ups, Sprint Reviews, and Retrospectives**.

HCL Technologies, India | July 2019 -Dec 2022 | Full Stack Developer

- Designed and developed **web applications for financial services**, increasing user adoption by **15%**.
- Built reusable **Django and Flask components**, enabling **customizable tables and 25+ types of charts**.
- Developed **report templates compatible with various data sources**, reducing response time by **40%**.
- Created **highly responsive web applications** using **ReactJS (frontend) and Python (Django/Flask) backend**, serving **100,000+ users monthly**.
- Built and maintained **RESTful and GraphQL APIs**, ensuring **seamless data exchange** between client-side and server.
- Integrated **OAuth2 authentication** for **secure user login and API access control**, enhancing **system security and user trust**.
- Developed a **role-based access control (RBAC) system**, increasing **security compliance by 20%**.
- Deployed applications to **AWS EC2** and automated deployment using **Jenkins, Docker, and Kubernetes**.
- Implemented **JWT authentication and session management**, ensuring **secure access to sensitive resources**.
- Developed a **real-time chat feature** using **WebSockets and Django Channels**, improving **user engagement**.
- Created a **CI/CD pipeline** using **Jenkins**, reducing **deployment time by 30%** and improving **productivity**.
- Automated **API Gateway and microservices configurations** using **Apigee Edge**, enabling the **generation of 50+ API proxies** in a single run.
- Used **Kafka Streams** to **update PostgreSQL/MySQL databases** dynamically.
- Documented **REST APIs** using **Swagger (OpenAPI)** for seamless **client integration**.
- Maintained **codebase integrity** and facilitated collaboration using **Git for version control**.
