Professional Summary

Experienced and detail-oriented Clinical Data Manager with over 6 years of progressive experience in managing and reviewing clinical data across Phase I-III trials. Proven ability to lead end-to-end data management activities across global clinical trials, including study start-up, database programming, user acceptance testing (UAT), documentation, and study close-out. Strong expertise in Data Management Plan (DMP) development, protocol input, SAE reconciliation, CRF design, edit check specification, data query resolution, and metric reporting. Adept at collaborating with cross-functional teams to ensure data integrity, compliance, and timely delivery of high-quality clinical data.. Skilled in Medidata Rave, Oracle RDC, Inform, and LIMS with a focus on ensuring regulatory compliance (ICH-GCP, 21 CFR Part 11) and continuous audit readiness. Proficient in managing clinical systems, including CTMS and eTMF, with hands-on experience in setup, configuration, and lifecycle maintenance across global trials. Skilled in leveraging CTMS and eTMF platforms to drive compliance, audit readiness, and real-time data visibility for cross-functional teams.

Professional Experience

01/2023 – 06/2025
California, USA

Associate Data Manager
HealthGenic solutions

- Led start-up, conduct and close-out activities of clinical trials to deliver clean and quality data.
- Reviewed protocols and contributed to eCRF design, edit check specifications, and Data Management Plans (DMPs).
- Ensuring protocol and indication-specific data needs were addressed.
- Developed and maintained Integrated Review Plans in alignment with regulatory expectations and audit-readiness standards.
- Performed SAE reconciliation and managed CDM/SRP queries in EDC platforms; supported coding and protocol deviation tracking.
- Supported data management for a Phase II oncology study including CRF review, data cleaning, and query management.
- Worked with tumor assessment data following RECIST criteria and managed AE/SAE reconciliation specific to oncology trials.
- Conducted **quality control (QC) reviews of TMF documents** to ensure compliance with ICH-GCP, ALCOA/ALCOA+ principles, and study-specific TMF Plans and Indices.
- **Identified, tracked, and resolved quality issues (QIs)** related to TMF documentation by collaborating with cross-functional teams and external vendors, ensuring timely resolution and documentation accuracy.
- Applied appropriate **metadata, classification, and naming conventions** to TMF records per the TMF Index and sponsor requirements, maintaining audit readiness.
- Generated **TMF inventories and completeness reports** for periodic and final reviews; issued TMF Review Completion Certificates and verified quality issue resolution.
- Supported **TMF final transfer and archival processes** including receipt, reconciliation, and validation of document transfers from CROs and external vendors.
- Maintained and updated **study-specific TMF trackers**, ensuring document status transparency and alignment with study milestones.
- Participated in **SMT and TMF Operations meetings**, providing regular updates on TMF status, metrics, QI trends, and risk mitigation strategies.

- Performed TMF **reconciliation and physical record tracking** to ensure proper filing and long-term storage compliance.
- Configured and maintained CTMS and eTMF systems for oncology and device studies, ensuring timely document tracking, milestone updates, and regulatory compliance.
- Participated in eTMF quality control reviews and TMF reconciliation activities to ensure completeness, accuracy, and inspection readiness.
- Led study-level CTMS administration, including subject tracking, visit scheduling, and status reporting.
- Collaborated with clinical operations to resolve CTMS discrepancies and streamline data entry workflows.
- Supported end-user training and documentation for eTMF best practices across internal and external stakeholders.
- Conducted quality reviews of essential trial documents in alignment with ICH-GCP, ALCOA/ALCOA+ principles, and company SOPs/WIs.
- Applied appropriate metadata and classification to TMF records according to study-specific TMF Plans and indices.
- Identified, tracked, and collaborated with stakeholders to resolve document quality issues and trial record deficiencies.
- Updated study-specific TMF trackers and indices to ensure document currency and inspection readiness.
- Managed the receipt and shipment of physical trial records to/from long-term offsite storage facilities.
- Participated in TMF QC and reconciliation activities to ensure document completeness, accuracy, and audit readiness.

04/2020 – 11/2022
California, USA

Clinical Data Associate

Orcimed Lifesciences.

- Executed data review, discrepancy management, and database testing across global studies.
- Developed and validated CRF designs, edit checks, and Data Validation Plans based on study protocols.
- Supported study setup including EDC/UAT review, test case execution, and system validation.
- Reconciled lab data (local/central), managed Data Transfer Agreements (DTAs), and ensured compliance with SOPs and ICH-GCP guidelines.
- Applied CDISC terminology and SDTM standards for data review, mapping, and validation in collaboration with cross-functional teams.
- Independently managed lab data reviews utilizing LIMS, ensuring accuracy and protocol compliance.
- Coordinated with vendors to ensure data integrity, quality, and timely delivery of clinical data.
- Provided support in eTMF management activities including document upload, metadata tagging, and compliance reviews.
- Assisted with CTMS data entry and maintenance related to site activation, monitoring visits, and enrollment tracking.
- Coordinated with project teams to align eTMF artifacts with milestones and regulatory submission timelines.
- Conducted **quality control (QC) reviews of TMF documents** to ensure compliance with ICH-GCP, ALCOA/ALCOA+ principles, and study-specific TMF Plans and Indices.
- **Identified, tracked, and resolved quality issues (QIs)** related to TMF documentation by collaborating with cross-functional teams and external vendors, ensuring timely resolution and documentation accuracy.
- Applied appropriate **metadata, classification, and naming conventions** to TMF records per the TMF Index and sponsor requirements, maintaining audit readiness.
- Generated **TMF inventories and completeness reports** for periodic and final reviews; issued TMF Review Completion Certificates and verified quality issue resolution.

- Supported **TMF final transfer and archival processes** including receipt, reconciliation, and validation of document transfers from CROs and external vendors.
- Maintained and updated **study-specific TMF trackers**, ensuring document status transparency and alignment with study milestones.
- Participated in **SMT and TMF Operations meetings**, providing regular updates on TMF status, metrics, QI trends, and risk mitigation strategies.
- Performed TMF **reconciliation and physical record tracking** to ensure proper filing and long-term storage compliance.

02/2018 – 12/2019
California, USA

Clinical Data Coordinator
Pharmaron

- Conducted data review, listing review, and discrepancy resolution.
- Collaborated on database lock processes, UAT testing, and metric reporting.
- Supported SAE reconciliation, protocol deviation tracking, and edit check validation.
- Developed and validated edit checks to ensure alignment with protocol and data collection requirements.
- Supported reconciliation of Serious Adverse Events (SAEs) and tracked protocol deviations across studies.
- Generated and analyzed study metrics to monitor query trends, site performance, and data cleaning progress.

Core Competencies

Electronic Data Capture (EDC)
Medidata Rave, Inform, Oracle
Clinical

**CDISC / CDASH | ICH-GCP / FDA
/ IRB Compliance**

Metrics & Process Optimization

GenAI tools

**CTMS Data Tracking & Subject
Management**

**Clinical Data Lifecycle
Management**

**Edit Check Development | Data
Validation | UAT**

**Laboratory Information
Management System (LIMS)**

**CTMS and eTMF Systems
Management**

ALCOA, ALCOA+ Principles

**SAE & Lab Reconciliation |
Protocol Deviation Review**

**CRF Design | eCRF Completion
Guidelines | DMP Creation**

SQL for querying and validation.

**TMF Quality Control &
Reconciliation**

Technical Skills

Soft Skills

MS Word, Excel, PowerPoint, Outlook
. Bascis of SQL , Power BI .
