

Harpreet S Basota

(209) 284-9791 | hbasota2000@gmail.com

Personal Summary

Versatile software developer with practical experience in both iOS and web development, skilled in building responsive, user-friendly applications using Swift, SwiftUI, JavaScript, and modern frameworks. Proven track record of designing and deploying mobile and web solutions that solve real-world problems and enhance user experiences. Adept at implementing scalable architectures, integrating RESTful APIs, and working with cloud services like Firebase. Experienced in Agile environments with a strong understanding of UI/UX principles, version control, and cross-platform development. Committed to continuous learning and growth, with a passion for delivering high-quality, impactful software.

Technical Skill

Programming Languages: C++, Swift, Python, JavaScript, PHP, Go, SQL, HTML, CSS

Frameworks & Libraries: SwiftUI, Node.js, Firebase, MapKit, Stripe API

iOS Development: iOS SDK, CoreLocation, MapKit, MVVM, VIPER, MVC, Real-Time Systems, Xcode

Tools & Platforms: Git, GitHub, VSCode, Xcode, CI/CD Pipelines, Unit Testing, Debugging, Cloud Functions

Methodologies & Practices: Agile Development, Version Control, Mobile Development, API Integration, REST APIs

Specialized Skills: H3 Geospatial, CoreLocation, API Integration, Stripe API

Education

University of California, Davis - Bachelor of Science

Computer Science, 06/2024

Relevant Coursework: Data Structures & Algorithms, Machine Learning, Database Management, Cloud Computing, Operating Systems

Certificates:

Meta iOS Developer Professional Certificate

Coursera |

- Industry-recognized certification developed by Meta (Facebook) engineers
 - Hands-on training in Swift, SwiftUI, iOS SDK, UIKit, CoreLocation, and API Integration
 - Built multiple iOS apps using MVVM, MVC, and VIPER architecture
 - Implemented RESTful APIs, local and cloud data storage with Firebase and Firestore
 - Gained experience with debugging, unit testing, version control (Git/GitHub), and CI/CD pipelines
 - Practiced Agile methodologies and full app lifecycle development in Xcode
-

Experience/Projects

IOS DEVELOPER | 06/2024 - Current

DashDrop

- **Tech Stack:** Swift UI (Frontend), Node.js & Firebase (Backend), Stripe API (Payments), H3 Geospatial Indexing (Order Matching), Firestore & Realtime Database (Data Storage).
- **Real-Time Order Matching:**
 - Engineered a **dynamic order assignment algorithm** using **H3 geospatial indexing** to match customers with nearby drivers based on real-time location data.
 - Implemented **radius expansion logic** to optimize delivery efficiency and reduce wait times.
- **Secure User Authentication:**
 - Integrated **Firebase Authentication** for user and driver sign-up/login using **email-password and OAuth (Google Sign-In)**.
 - Designed a **role-based access control system** to differentiate features for customers, drivers, and admins.
- **Payment Processing System:**
 - Developed **secure, automated payment workflows** using **Stripe API** to handle transactions and driver payouts.
 - Implemented a **wallet system** to allow users to preload funds for faster transactions.
- **Live Tracking & Notifications:**
 - Integrated **Google Maps API** to enable **real-time driver location tracking** and delivery status updates.
 - Implemented **push notifications** using **Firebase Cloud Messaging (FCM)** to alert users about order status changes.
- **Scalability & Performance Optimization:**
 - Optimized **database queries and API endpoints**, reducing response times and improving overall system performance.
 - Implemented **caching strategies** with Firebase Realtime Database for frequently accessed data to enhance speed.
- **User Experience & Interface Enhancements:**
 - Designed a **mobile-friendly, responsive UI** with React.js, ensuring a smooth customer experience.
 - Developed an **interactive dashboard** for drivers to manage deliveries efficiently.

WEB DEVELOPER | 07/2022 - 07/2023

Sparkles

- Company Overview: <https://sparklescarwashlube.net/>
- Developed a responsive website using React.js, Node.js, and Firebase to enhance online booking and customer experience
- Implemented a real-time service scheduling system to streamline operations
- Applied SEO techniques, boosting website visibility and attracting more users
- Built a CMS for staff to easily update service offerings, prices, and promotions without technical expertise
- Enhanced site performance by optimizing images, implementing caching, and minimizing CSS/JS files, resulting in faster load times
- <https://sparklescarwashlube.net/>

Microblog Platform

- Developed a **full-stack blog platform** where users can **create posts, comment, like, and engage with others**.
- Implemented **user authentication** using **username/password and Google login** for secure access.
- Designed a **responsive front-end** with **JavaScript and CSS**, ensuring a smooth user experience.
- Built a **scalable backend** using **Node.js and Express**, handling user requests efficiently.
- Integrated a **PostgreSQL/SQLite database** for managing user posts, comments, and interactions.
- Enabled users to **edit, delete, and manage content** with an intuitive profile management system.

Weather App

A modern, interactive weather application built with React.js, OpenWeather API, and real-time geolocation services.

- Developed a **responsive weather forecasting application** that provides real-time weather data using OpenWeather API.
- Implemented **auto-suggestions** in the search bar for city names with dynamic dropdown filtering.
- Integrated **real-time geolocation detection** to fetch the user's current weather conditions.
- Designed and implemented **animated weather-based video backgrounds**, dynamically updating based on current weather conditions.
- Optimized UI/UX with **aesthetic glassmorphism design**, responsive layouts, and smooth transitions.
- Used **React Hooks (useState, useEffect)** for efficient state management and API calls.
- Ensured **cross-browser compatibility and mobile responsiveness** for seamless user experience.
