SUMMARY

Recent BS in Information Technology graduate with specialized coursework in cybersecurity, networking, and cloud systems. Skilled in ethical hacking, information security management, and server administration, with hands-on experience in data center operations and risk prevention strategies. Strong understanding of IAM, compliance, and secure system design, with growing knowledge of AWS cloud fundamentals. Seeking an entry-level role in cybersecurity or cloud engineering to apply technical expertise and strengthen enterprise security.

EDUCATION

Bachelor of Science in Information Technology

University of the Cumberland, Williamsburg, KY

Sep 2023 - Aug 2025

- Software Engineering • Programming of Mobile Devices • Application Software • Business Intelligence
- Ethical Hacking • Networking • Server Administration • Data Center • Info Security & Assurance
- Fundamentals of Databases • Object-Oriented Programming

SKILLS

Cybersecurity: Ethical Hacking, Information Security & Assurance, Risk Management, Compliance, Encryption, IAM, Firewalls, Vulnerability Assessment

Networking & Systems: TCP/IP, DNS, DHCP, Server Administration (Windows Server), Data Center Operations, Virtualization Concepts

Cloud & Platforms: AWS Cloud Practitioner (in progress), Azure basics, IAM, Storage & Backup Concepts, High Availability, Disaster Recovery

Programming & Scripting: PHP, SQL, JavaScript (for security testing), .NET MAUI (app integration), JSON Parsing

Version Control & Tools: GitHub, Visual Studio, FileZilla FTP, Wireshark (basic exposure)

Software Tools: Visual Studio, VS Code, Android Emulator, Kali Linux (lab exposure)

PROJECTS

1. Website Deployment & File Management using FileZilla

Used FileZilla alongside Visual Studio to deploy and manage website files for coursework projects. Tasks included uploading HTML/CSS files, organizing directories, renaming files, and ensuring secure file transfers via SFTP. Gained hands-on experience with live server updates, remote file management, and FTP-based workflows.

2. Mobile App Development using .NET MAUI & JVM

Built a cross-platform mobile application using .NET MAUI and Java Virtual Machine (JVM) tools as part of a coursework assignment. Designed an intuitive, responsive UI and implemented core features such as navigation, input handling, and layout optimization. Gained practical experience in mobile UI/UX design, debugging, and cross-platform deployment.
