San Jose, CA | (669) 977-9413 | [linkedin/harshsomaia187](https://www.linkedin.com/in/harshsomaia187) | harshsomaia187@gmail.com

SUMMARY

Data Analyst with 3+ years of experience delivering scalable analytics solutions across supply chain, healthcare, and finance domains. Proficient in SQL, Python, BigQuery, Tableau, and Power BI, with a strong focus on building cloud-based ETL pipelines, KPI dashboards, and real-time reporting tools. Improved order accuracy by 15%, reduced fulfillment delays by 20%, and automated reporting processes by translating complex data into actionable insights that support cross-functional decision-making in fast-paced environments.

PROFESSIONAL EXPERIENCE

Data Engineering & BI Intern | Novatore Solutions | DE, USA

Nov 2024 – Present

- Spearheaded the integration of CRM, transactional, and operational datasets using SQL, Python, and Talend into Azure Synapse, improving data integrity and enabling unified BI reporting across teams.
- Developed real-time KPI dashboards in Power BI, visualizing SLA metrics and operational performance, reducing report turnaround time by 40% and enabling leadership to make faster, data-driven decisions.
- Performed trend analysis using Python (pandas, scikit-learn) and SQL, surfacing actionable insights that optimized workflows and reduced client operational bottlenecks.
- Built robust ETL pipelines and dimensional models using Apache Airflow and Azure Data Factory, supporting scalable analytics delivery and enabling accurate reporting for 10+ consulting initiatives.
- Collaborated with cross-functional teams to define data logging standards and implement governance protocols, ensuring scalable architecture and secure access across sensitive operational datasets.

Data Analyst | Accenture Solutions Pvt Ltd | Mumbai, India

Jun 2021 - Jul 2023

- Collaborated with data engineers and stakeholders to design scalable data models in BigQuery, integrating ERP and logistics systems, improving data accuracy, and reducing integration errors by 30%.
- Implemented data validation checks and anomaly detection logic using DBT and SQL, enhancing data reliability across supply chain reports and reducing downstream errors by 25%.
- Developed BI solutions using SQL, Tableau, and ETL tools, automating inventory tracking and reporting on stock levels, supplier lead times, order fulfillment, reducing manual reporting by 40%.
- Developed interactive Tableau dashboards tracking KPIs, including inventory turnover and order cycle time, providing actionable insights and helping stakeholders reduce stockouts by 20% and improve order fulfillment accuracy by 15%.
- Analyzed supply chain delays and cost fluctuations using historical data in BigQuery and Python, identifying bottlenecks in order fulfillment and inventory, resulting in 20% reduction in warehouse downtime and 15% increase in order accuracy.

Data Analyst | CyberNest | Bangalore, India

May 2020 - May 2021

- Engineered dynamic cybersecurity insight dashboards using Tableau and Snowflake, visualizing threat trends and platform activity to accelerate researcher decision-making and reduce report creation time by 35%.
- Automated ingestion and transformation of AI-generated research summaries using Python and Airflow, creating a scalable pipeline that improved data freshness and supported real-time threat monitoring.
- Partnered with analysts and security teams to define research engagement KPIs and develop reporting layers in Tableau, boosting visibility into content performance and increasing stakeholder alignment by 25%.
- Designed automated anomaly detection scripts in Python to flag irregular threat patterns and data gaps, enabling faster triage for security researchers and improving incident response efficiency.

PROJECTS

Amazon Customer Behavior Analytics | Python, SQL, Apache Spark, AWS Redshift, Power BI

Jun 2025

- Engineered ETL pipeline using Spark and SQL processing 50M+ retail transactions. Developed Redshift-based analytical model linking customer demographics, purchase frequency, and return rates to group active, occasional, and inactive buyers, improving customer segmentation. Designed interactive Power BI dashboards to track monthly shopping patterns and high-return products.

Cricket Data Analysis | Cricbuzz API, GCP, Google Dataflow, BigQuery, Looker Studio

Jan 2025

- Developed a cloud-based data pipeline using the Cricbuzz API and Google Cloud Storage, capturing live cricket match statistics, reducing data processing delays, and improving real-time data availability. Automated data transformation workflows using Google Dataflow cleaning, parsing, and loading match data into BigQuery, achieving 99% data accuracy for large-scale cricket analytics. Built an interactive Looker Studio dashboard visualizing player performance, team statistics, and match predictions.

Real-Time Voting Analysis | Apache Kafka, Spark, PostgreSQL, Docker, Streamlit, LSH, and Tableau

Oct 2024

- Created a system to address need for real-time vote processing, employing Apache Kafka for streaming data and Spark for real-time analytics, efficiently processing over 1 million votes daily and quickly identifying leading candidates. Developed real-time dashboards exploiting Tableau and Streamlit, showing leading candidates and displaying live voting updates and results by candidate and state.

TECHNICAL SKILLS

Programming Languages: Python (Pandas, NumPy, scikit-learn), SQL, DAX, Java, C

Databases & Data Warehousing: MySQL, PostgreSQL, BigQuery, Snowflake, Azure Synapse Analytics, Redshift, Oracle DBMS

Data Science & Analytics: Excel, SSAS, Tableau, Power BI, Power Query, Qlik Sense, Looker Studio, MS Visio, Alteryx, A/B Testing

Cloud Technologies: AWS (S3, Redshift, Lambda), Google Cloud Platform (BigQuery, Vertex AI, Cloud Storage)

Machine Learning & AI: Computer Vision, LLM, Predictive Modeling, Time Series Forecasting, Classification, Regression, NLP, RAG pipelines

ETL & Data Engineering: DBT, Talend, Apache Spark, Airflow, Azure Data Factory, Kafka, Google Dataflow, Docker, Streamlit, Git, Jira

EDUCATION

Master of Science in Data Science | San Jose State University | CA, USA

Aug 2023 - May 2025

Relevant Coursework: Statistics, Database, Data Visualization, Data Mining, Machine Learning, Data Warehousing, Big Data

Bachelor of Technology in Computer Engineering | University of Mumbai | Mumbai, India

Aug 2017 - Jun 2021

Relevant Coursework: Big Data Analysis, Business Intelligence, Database Management, Artificial Intelligence, R Programming
