PROFESSIONAL EXPERIENCE:

Software Engineer, Virtusa, Bangalore, India

April 2021 – July 2023

- Processed and analyzed millions of user data dynamically using MySQL to create user-centric reports, enhancing decision-making and data visibility.
- Designed and implemented Bash scripts to automate QA and application monitoring, achieving an improvement of **3% CTR**.
- Automated data pipelines to streamline order-related data flows between middleware and integrated components, reducing manual effort and errors.
- Organized and optimized internal systems, including order entry/management, conversion/revenue tracking, and production workflow tools, ensuring seamless operations.
- Managed large-scale order provisioning for BT – Everything Everywhere in a production environment, delivering high-quality service and operational reliability.

TECHNICAL SKILLS:

Programming	Java, C, C++, JavaScript, SQL, Spring Boot, Python, AI, R Programming, Data Structures
Database	MySQL, NoSQL, Oracle
Web tools	HTML, CSS, Spring MVC
Tools & Utilities	Git, GitHub, Apache Tomcat, Jenkins, Tableau, Power BI, JIRA, Excel, Pivot table, JSON
Data Analysis	Pandas, NumPy, Matplotlib, Seaborn, Tableau, Azure
Machine Learning	Scikit-learn, Pytorch, Random Forest, Deep Learning, Natural Language Processing, LLMs

CERTIFICATIONS:

Google Data Analytics Professional Certificates (View)	IBM Machine Learning (View)
Career Essentials in Data Analysis by Microsoft and LinkedIn (View)	Google AI Essentials (View)
Oracle Certified Associate, Java SE 8 Programmer (View)	Data Analytics Essentials (View)

ACADEMICS AND INDEPENDENT PROJECTS:

Customer Behavior Analysis for Electric Vehicle Adaption

July 2024

Skills: Data Analysis & Visualization, Machine Learning Algorithms, Statistical Modeling, Python Programming

- This project aimed to analyze challenges in electric vehicle (EV) adoption in urban areas and provide data-driven solutions.
- Assisted marketers in addressing adoption barriers through predictive modeling, advanced machine learning algorithms, and interactive dashboards developed using Streamlit.
- Conducted consumer behavior analysis to generate actionable insights for enhancing charging infrastructure and optimizing targeted marketing strategies.

Sales Analysis Dashboard *(Skills: Data Visualization, Statistical Modeling, Tableau)*

June 2024

- Analyzed sales data to identify revenue drivers and sales growth trends across demographics and regions, providing actionable insights.
- Developed interactive dashboards using Tableau (also replicable in Power BI) to support KPI tracking and forecasting.
- Applied predictive analytics and statistical modeling to optimize marketing strategies and improve overall sales optimization.

Dogecoin Price Prediction using Historical Data and Social Media Trends

Nov 2024

Skills: Data Preprocessing, Machine Learning Models, RNN Models, EDA (Exploratory Data Analysis)

- Performed data cleaning and preprocessing; created a correlation matrix for insights.
- Conducted Statistical Analysis, leveraging Supervised Learning (Linear and Random Forest Regression) and Unsupervised Learning techniques for price prediction.
- Implemented LSTM models for price forecasting and used XGBoost for hyperparameter tuning.
- Conducted web scraping from X (formerly Twitter) to analyze social media trends impacting price movements.

EDUCATION:

Saint Peter's University, NJ, USA

February 2025

MS in Data Science *(Courses: Design & Analysis of Algorithms, Big Data & Analytics, Machine Learning algorithms and Visualizations)*

GPA: 3.94/4.0

Sri Venkateswara College of Engineering and Technology, India

May 2020

BS in Computer Science *(Courses: OOPS, Web Development, Software Engineering)*

GPA: 7.13/10
