PROFESSIONAL CERTIFICATIONS

- **HRCI Pro: People Analytics**
Focus on workforce insights, HRIS metrics, compliance reporting, and strategic people analytics to inform organizational decision-making.
 - Currently enhancing practical skills in UKG and Relias via sandbox demos and case-study-based learning to support end-to-end HR system administration, reporting, QA/UAT, managing users and permissions, and supporting business systems.
-

PROFESSIONAL EXPERIENCE

Sunray IT Inc.

New Jersey, USA

SQL ETL / Power BI Developer

February 2025 - Present

- I interacted daily with business resources to analyze 50+ business processes, gather and track requirements, and ensure timely delivery of 20+ project milestones for software consulting and system analysis initiatives.
- Utilized SQL Server Profiler to identify and optimize 100+ slow-running queries, improving performance and availability by 40% in MS SQL Server environments.
- Created and executed 50+ SSIS packages to integrate and transform data from 10+ multiple sources, supporting efficient ETL processes for database administration and client software products.
- Designed, developed, and tested ETL processes to load data from various systems using SSIS, reducing data integration time by 30% for corporate clients in software development.
- Employed tools such as Database Engine Tuning Advisor, SQL Profiler, and Windows Performance Monitor to analyze and enhance MS SQL Server performance across 15+ projects.
- Designed and documented complete architecture for 5+ Power BI Proof of Concept (POC) solutions, enabling scalable data modeling and analytics for system optimization.
- Wrote complex DAX functions within Power BI and Power Pivot for advanced data modeling and analytics, handling datasets exceeding 1 million records to deliver actionable insights.

University of Massachusetts

Dartmouth, MA, USA

Research Assistant – Open Educational Resources (OER)

September 2024 - December 2024

- Designed an AWS-based automation pipeline for transcription and indexing of 50+ hours/month of learning content, improving accessibility and system efficiency by 90%, demonstrating systems administration and supporting business systems in a collaborative environment.
- Conducted end-to-end data analysis, dashboard development, QA/UAT, and managing users and permissions for 10+ faculty stakeholders using Python, Excel, and web tools, directly supporting informed decision-making, academic compliance, and navigating ambiguity with a can-do attitude.
- Built and maintained 5+ workshop websites, demonstrating capability in digital systems, user-focused design, learning new technologies, and building productive relationships with business stakeholders and power users.

- Produced 20+ compliance dashboards for maintenance data using Power BI, with experience transferable to HRIS dashboards for FMLA, ACA, and HIPAA monitoring, as well as Salesforce administration, Sales Cloud, and GTM applications.
- Transformed 1,000+ unstructured aviation maintenance files using Spark, SQL, and Python as bulk data loader tools, delivering structured datasets aligned with compliance reporting standards and data management best practices in Excel and Google Sheets.
- Cleaned and validated large datasets (over 500,000 records) to ensure data integrity, using Pandas, advanced Excel techniques, QA/UAT processes, and handling routine problems independently while asking clarifying questions.
- Collaborated across 3 teams (engineering, QA, and data) to maintain consistent data standards, resolve 50+ system-level issues, build productive relationships with team members and business stakeholders, and proactively share context through clear draft documentation.

SELECTED PROJECTS | TECHNICAL HIGHLIGHTS

Airline Customer Care Chatbot Application Using API's Integration:

AI/ML Developer

- Built a smart chatbot using Streamlit and GPT to assist users with real-time flight and weather information via integration of 2+ external APIs, demonstrating experimentation with AI-driven processes, agentic AI practitioner skills, and integration of data systems for real-world sales and support tools.
- Showed curiosity and creativity in user experience design for real-world applications, with comfort learning new technologies and a willingness to experiment, reducing query resolution time by 70%.

DATA VISUALIZATION DEVELOPER

- Developed a responsive D3.js dashboard integrating demographic and socioeconomic indicators across 30+ regions, enabling actionable analytics in a collaborative environment.
- Utilized core web technologies: JavaScript, HTML, and CSS to deliver real-time insights and a responsive, engaging visualization platform, supporting business systems and data management for 100+ users.

SKILLS

- **HRIS & Workforce Systems:** UKG Pro (in progress), Relias LMS (in progress), onboarding/offboarding workflows, timekeeping/payroll integration, performance management platforms; transferable to Salesforce administration, Sales Cloud, GTM applications, ancillary sales and support tools.
- **Analytics & Reporting:** Power BI (DAX, Power Query), Advanced Excel (VBA, PivotTables), Google Sheets, SQL (T-SQL, PostgreSQL), Python (Pandas), bulk data loader tools
- **Compliance & Data Governance:** HIPAA, FAA, ACA, FMLA, EEOC, QA/UAT work, managing users and permissions
- **Collaboration & Leadership:** Cross-functional project management, stakeholder engagement, agile teamwork, building productive relationships with team members, business stakeholders, and power users; excellent written and verbal communication skills, producing clear draft documentation, proactively sharing context.
- **Cloud & Tools:** AWS, Azure, Jupyter, Spark; demonstrated curiosity and creativity, comfort learning new technologies, willingness to experiment with AI-driven processes.

EDUCATION

University of Massachusetts - Dartmouth

MA, USA

MS Data Science, - GPA: 3.44

- Database Design, Machine Learning, Advance Data Mining, Data Visualization, Mathematical Statistics, High-performance scientific computing.
