

Harsha

Project Manager

Baltimore, MD 21227 | +1 443-973-8443 | Hashmav12@gmail.com

SUMMARY

- Results-driven **Project Manager with 4+ years of experience** leading end-to-end enterprise projects in Healthcare and Banking, ensuring delivery within scope, schedule, and budget.
- Demonstrated expertise in **Agile, Waterfall, and Hybrid methodologies**, managing projects across the full SDLC from initiation to deployment.
- Adept at **project governance**, creating transparency for executives through dashboards, KPIs, and reporting frameworks.
- Strong experience managing **multimillion-dollar budgets** with a focus on optimizing costs, resource allocation, and vendor management.
- Skilled in **stakeholder communication**, bridging the gap between business leadership, technical teams, and external vendors to ensure alignment.
- Hands-on in **compliance-driven initiatives** (ICD-10 remediation, HIPAA, healthcare regulatory reporting, banking data retention).
- Delivered multiple **digital transformation initiatives** improving patient engagement, fraud detection, and operational performance.
- Experience in PMO and PPM of considerable and complex programs/projects spanning across organizational functions.
- Full project management lifecycle expertise utilizing PMI, SDLC methodology RAD, Agile, waterfall, OOAD coupled with experience in business case development, strategy definition, financial management, vendor relations, negotiation, and risk mitigation.
- Cross functional team development and management with focus on team relations and expectation/priority management in highly complex matrix environment.
- Managed teams onsite, offsite and offshore across the globe and has experience in complex data migration projects involving multiple countries and cross functional teams across the globe.
- Experienced in **release management** using DevOps practices, CI/CD pipelines, and automation tools like Jenkins, XL Release, and Kubernetes.
- Strong background in **data migration, data governance, and cloud platform modernization**, ensuring scalability and cost optimization.
- Recognized for **risk management expertise**, proactively identifying issues and implementing mitigation strategies.
- Guided **Agile ceremonies** (sprint planning, backlog grooming, retrospectives) to improve team productivity and velocity.
- Known for developing **comprehensive project documentation** (BRDs, FRDs, backlog reports, use case diagrams, and process flows).
- Consistently improved **business outcomes** such as reduced wait times, enhanced fraud monitoring accuracy, and improved platform performance.
- Proficient with **industry-standard project management tools** (Jira, Rally, Confluence, MS Project, Clarity, SharePoint) for seamless execution.

SKILLS

- **Project Management:** Agile (Scrum, SAFe), Waterfall, Governance, Budgeting, Stakeholder Management, Release Planning
- **Technical:** MS SQL, SSRS, SSIS, Unix, Python, Splunk, HTML, JavaScript
- **Databases:** Oracle, Teradata, SQL Server, MS Access
- **DevOps & Release Management:** Jenkins, XL Release, Docker, Kubernetes, OpenShift
- **Reporting & Visualization:** QlikView, Power BI, Tableau
- **Project Tools:** Jira, Confluence, Rally, Clarity, MS Project, SharePoint
- **Documentation & Diagrams:** BRD, FRD, Data Flow, Use Case, Sequence Diagrams
- **Project Management:** MS Project, Microsoft Office PowerPoint, Excel, Word, UML Unified Modeling Language, BPM Business Project Management, MS Visio, SDLC, RUP- Rational Unified Process, AGILE, JAD/RAD, SAD Structure Analysis and Design, Clarity, Documentum, SCRUM, Dashboard.
- **Process Improvement:** ISO Standards, Total Quality Management TQM, Data warehouse OLTP, Teradata, Business Intelligence, ERPs Supply Chain- SCM/Inventory Management/Logistics, Customer Relationship management- CRM using Seibel.

PROFESSIONAL EXPERIENCE

Project Manager | Signify Healthcare

Sept 2024 – Present

Project: Digital Patient Engagement & Compliance Modernization

Description: Large-scale program aimed at enhancing patient digital engagement, reducing wait times, improving compliance processes, and ensuring regulatory alignment across systems.

Responsibilities:

- Directed a **multi-department digital transformation initiative** to implement patient self-service portals, mobile scheduling apps, and digital communication channels, increasing patient satisfaction scores.
- Oversaw **ICD-10 remediation program** by coordinating with compliance, billing, and IT teams, ensuring all systems and workflows adhered to updated coding standards.
- Led the **design and rollout of compliance reporting solutions**, supporting regulatory audits and reducing audit preparation time by 30%.
- Managed **program timelines, dependencies, and deliverables**, ensuring alignment with enterprise-level deadlines and compliance mandates.
- Collaborated with business analysts and SMEs to prepare **BRDs, FRDs, data flow diagrams, and compliance documentation**.
- Facilitated **Agile ceremonies** across multiple scrum teams, driving efficient sprint planning, backlog grooming, and prioritization of features.
- Partnered with product owners to refine **user stories, define acceptance criteria, and align backlog priorities** with business needs.
- Acted as the key liaison with **senior leadership and external vendors**, providing weekly dashboards and executive-level updates on project health.
- Implemented **risk management practices**, including risk registers, issue logs, and proactive mitigation strategies, reducing project delays.
- Coordinated **release management processes** leveraging Jenkins, XL Release, Docker, and Kubernetes for efficient deployments.

- Oversaw **UAT cycles, defect tracking, and QA processes**, ensuring high-quality delivery with minimal post-production issues.
- Achieved tangible results such as **15% reduction in patient wait times**, improved scheduling efficiency, and stronger compliance alignment across healthcare operations.

Project Manager | Amazon, India

Oct 2020 – July 2024

Project: Customer Insights & Data Analytics Modernization

Description: Led a strategic program to modernize Amazon India's customer analytics ecosystem by centralizing behavioral data, automating reporting, and delivering real-time insights. The initiative supported decision-making across e-commerce, logistics, and digital marketplace operations while improving customer experience and operational efficiency.

Responsibilities:

- Directed the **end-to-end delivery of a cloud-based analytics platform** on AWS, integrating large-scale datasets from retail, supply chain, and digital payment systems.
- Collaborated with product leaders, category managers, and data science teams to **define KPIs and reporting frameworks** aligned with Amazon India's business growth strategy.
- Managed the **migration of terabytes of structured/unstructured data** into AWS Redshift and S3, enabling scalable, cost-optimized storage and faster insights.
- Oversaw development of **real-time ETL pipelines** using AWS Glue and Lambda, improving data ingestion speed and accuracy.
- Launched **automated reporting dashboards** in QuickSight and Tableau, reducing manual reporting time for business teams.
- Implemented **robust data security and governance controls** including RBAC, encryption, and compliance with India's evolving data protection guidelines.
- Facilitated **Agile delivery across distributed teams**, leading sprint planning, backlog grooming, and retrospectives to drive on-time delivery.
- Established **CI/CD pipelines** using Jenkins and AWS CodePipeline for seamless feature deployment in analytics workflows.
- Tracked and reported **project progress, risks, and ROI metrics** through Jira dashboards and weekly executive reviews.
- Partnered with finance and procurement teams to **manage multi-million-dollar budgets**, optimizing AWS spend through reserved instances and usage monitoring.
- Achieved significant outcomes including **faster customer insights generation**, improved product recommendation accuracy, and **enhanced reporting capabilities** for retail and operations teams.

EDUCATION

Masters in Engineering Management

University of Maryland Baltimore County
