

HARSHA VARDHAN RAJA

402 W. New York St., Apt#107, Indianapolis, IN46202, Phone # 317-828-9555, harsha.vardhan953@gmail.com

OBJECTIVE

Looking for challenging and responsible position in growth oriented company, where I can apply and further develop my problem-solving and programming skills.

EDUCATION

- Masters in Computer Science, Purdue School of Science (Expected: May 2016) GPA – 3.40
- Bachelors in Computer science & Engineering, Amrita University (2010-2014) GPA – 3.75

WORK EXPERIENCE

Infosys (January 2014 – May 2014)

Grade: Java Development Intern

- Developed a java based desktop installable tool called 'Java Pro Genesis Tool' using AWT/swing which is a simple, user friendly environment for java beginner to write code in minutes.
- Trained on website development technologies such as HTML, CSS, JavaScript, Servlets, JSP, and JDBC.

HP India Ltd. (December 2012- January 2013)

Grade: Android App Development Intern

- Developed an Android application named 'App Box' which is a combo of 3 apps Internet Browser, Bunk stack app and SMS app.
- Trained on application development on Android technology and worked on backend Database using SQL lite Open Helper class, a helper class to manage database creation and version management in java.

TECHNICAL EXPERTISE

Programming Languages	: C, C++, Java, C#
Databases	: Oracle, Microsoft SQL server
Web Designing	: HTML, CSS, JavaScript, jQuery, JSP, JDBC, PHP, XML and ASP.NET
Operating Systems	: Windows, UNIX
Tools	: Microsoft Visual Studio, Dos Box Emulator, Tableau

PROJECTS

Parallel programming – Shared Memory Approach: (December 2015)

- Analyzed and compared based on speedup and performance of various approaches to implement parallel programming using C, FORTRAN, Java and Python.

Data Security in Cloud Computing: (March 2015)

- Developed a website based on Data Protection as a Service (DPaaS) which enforces data security and privacy to data owners by securing the data using cryptographic encryption and key management.
- User interface is developed using HTML, CSS, JavaScript and SQL as database connectivity.
- Randomized key generation algorithm is used to create a random key and this key is used to encrypt the data using MD5 algorithm.

Trip Recommender System: (November 2014)

- Developed a recommender system that generates hotel recommendations for specific user based on user interests and previous user ratings.
- Dataset (Trip Advisor Dataset) undergoes data cleansing and then matrix factorization using least square method is applied to generate the recommendations.

OTHER PROJECTS:

- Created a University level college fest website, 'Amrita Kalanjali' held at Amrita University which provides registration details to students about the events.
- Developed a higher studies consultancy website, 'Fly High', as a part of undergraduate project which provides information about structure and preparation of several competitive exams like GRE, TOEFL, GMAT and SAT.
- Developed user interface application, 'Gate Pass System' using C++ on the concept of hierarchical inheritance.

CERTIFICATION

Certified as developer for developing SMS application on Txtweb platform in the competition of 'Planet of Apps' held at Amrita University on March 2012.
