OBJECTIVE

Master's student in Computer Science with 2 years of professional experience in software development, data analysis, and system design. Skilled in problem-solving, teamwork, and delivering scalable, high-quality solutions. Seeking to apply technical expertise and continuous learning to contribute to innovative and fast-paced projects.

EXPERIENCE

DELOITTE

Business Technology Analyst

08/2022 to 12/2023

Salesforce Development and Administration

- Reduced workload by **30%** by streamlining email-based support request management using a custom Salesforce application.
- Developed 15+ Reports and Dashboards using **SOQL** queries to track ticket status and team performance, improving decision-making for business teams.
- Led the full lifecycle development of the Support Platform Salesforce application (design, testing, deployment), serving over **1500** users with **99.9%** uptime.
- **Administered Salesforce** by managing support tickets, resolving platform issues, and overseeing license allocations.
- Resolved **50+** complex Salesforce support requests monthly, maintaining a less than 24-hour resolution time, and a **95%** user satisfaction rate.
- Built Custom **Flows**, **Objects** and **Page layouts** to streamline ticket management, reducing manual steps by **40%**.
- Deployed Salesforce applications from Dev to Prod ensuring seamless functionality for the users.
- Designed and presented interactive Salesforce dashboards to executive clients, translating complex data into actionable insights that drove a **15%** improvement in customer satisfaction scores.
- Enhanced custom tracking application features, reducing reporting errors by **30%** via rigorous **QA testing**.
- Improved data integrity by enforcing validation rules that minimized incorrect user inputs.

Data Management and Analytics.

- Streamlined data pipelines using **Alteryx**, integrating **SQL** databases, Excel, and SaaS platforms to reduce manual processing time by **40%**.
- Created Excel-based validation tools to reconcile **Vertex** tax reports with internal records, eliminating 100% of discrepancies.
- Established standardized **data cleansing** protocols enhancing reporting accuracy by **25%** across financial and operational datasets.
- Centralized siloed data by implementing critical system enhancements with stakeholders.
- Engineered 15+ **Alteryx workflows**, automating data collection, transformation, and reporting, achieving a **70%** efficiency gain.

PROJECTS

Vehicle Rental Management System

- Developed a full-stack Vehicle Rental Management System using **Python**, **Streamlit (frontend)**, and **MongoDB (database)** to streamline vehicle rentals, customer/supplier data, and payment processing.
- Designed an interactive **user interface** with features like login authentication, admin/customer dashboards, and CRUD operations for vehicles, rentals, suppliers, and payments.
- Implemented **user authentication** for admins and customers with secure login credentials (email & password).

- Developed complex search queries for customer and admin dashboards to retrieve rental history, payment status, and vehicle availability

Student Survey Microservices Application

- Designed and developed a microservices-based backend application to manage campus visit surveys using **RESTful APIs** and **Spring Boot**.
- Implemented full CRUD operations with data persisted in a **MySQL** database hosted on **Amazon RDS** for cloud-native reliability.
- Built Docker images and pushed to **Docker Hub**, then deployed the application to a **Kubernetes** cluster using **Rancher** on **AWS EC2** instances.

Prediction of Population Density and Poverty Rate with Satellite Imagery - *Bachelor's project*

- Developed a regression model using satellite imagery and kernel methods to predict India's population density and poverty rate.
- Achieved **98.79%** accuracy and **96.25%** efficiency, outperforming existing methodologies in the domain.
- Utilized **GIS** tools to collect and preprocess geospatial imagery, integrating with machine learning workflows for regression analysis.
- **Published** the work in the International Journal of Innovative Science and Advanced Engineering (IJISAE).

SKILLS

Technical skills: C, Java, Python, HTML, CSS, JavaScript, **Cloud Platforms & Services:** AWS (S3, EC2), Salesforce Apex, SOQL

Python Libraries: NumPy, Pandas, OpenCV

Tools: Alteryx, MS Office, Vertex, Git, Wireshark

Databases: MySQL, MongoDB

Operating Systems: Windows, MacOS, Linux

DevOps & CI/CD: Docker, Jenkins, Kubernetes

EDUCATION

MASTER OF SCIENCE: COMPUTER SCIENCE (GPA: 3.74)

Expected in 12/2025

George Mason University, Fairfax, VA

- Relevant Coursework: Database programming for WWW, Computer Vision, Introduction to Artificial Intelligence, Component-based Software Development, Analysis of Algorithms, Information Security Theory and Practice, Network Security.

ACCOMPLISHMENTS

- **Winner – PatriotHacks 2024**
Secured 1st place in a 36-hour hackathon by successfully completing a challenge presented by Salesforce and Fiscal Services, developing an AI-powered solution to analyze U.S. government spending data and enhance accessibility and transparency.
- **2nd Place – USI Tax Technology Week 2023 (Deloitte)**
Earned runner-up position by designing an insightful PowerBI dashboard under tight deadlines, effectively presenting complex tax-related data for improved decision-making.
- **Volunteer Certification – NSS & Unnat Bharat Abhiyan**
Actively involved in social outreach initiatives, including awareness rallies and public education drives on key societal issues, as part of the National Service Scheme and Unnat Bharat Abhiyan.

CERTIFICATIONS

- Salesforce Certified Tableau Desktop Foundations
- Salesforce Certified AI Associate
- Alteryx Foundation Micro-Credential
- AI for Everyone - Coursera
- PCAP: Programming Essentials in Python - Cisco Networking
