

SUMMARY

Results-driven Data Analyst with 3 years of experience transforming complex data into actionable insights and building scalable architectures. Proficient in statistical analysis, data visualization, and ETL processes using SQL, Python, Power BI and Tableau, as well as big data technologies like Hadoop and Spark. Experienced in cloud platforms such as AWS and Azure. Adept at delivering data-driven solutions that enhance decision-making and collaborating with teams to present findings to stakeholders.

SKILLS

- Languages and Protocols: Python, SQL Server, R, SAS, Stata, Hadoop, Spark, Hive, MongoDB, ML, NLP
- Tools and Libraries: Power BI, Tableau, Jira, Excel, SAP, MS Office, Qlik, Looker, Pandas, NumPy, TensorFlow, PyTorch,
- Clouds and Database: AWS (S3, Redshift, EMR, Glue), Azure, Google Clouds, Snowflake, Databricks, Oracle, Salesforce

INDUSTRY EXPERIENCE

Zenex Automation | Data Analyst

Jan 2022 – Dec 2023

- Data **cleansing** and **preprocessing** a messy dataset with missing values, outliers, and inconsistencies, resulting in high-quality data for analysis and **predictive modeling** by using Python.
- Data **modeling** in relational database by using SQL, boosting database efficiency, query performance, and scalability by **80%** to support complex business requirements.
- Developed and maintained robust **ETL pipelines** to extract, transform, and load data from various sources, ensuring high data quality and integrity of database by 90%.
- Applied advanced statistical techniques, including hypothesis testing, **A/B testing**, **regression** analysis, to uncover the data relationship.
- Developed and deployed predictive models by using machine learning techniques, including regression, classification, and clustering algorithms, which improved predictive accuracy by 70%.
- Delivered actionable business insights by developing comprehensive Tableau and BI **reports and dashboards**, improving decision-making by 95% at all organizational levels.

DMart | Business Analyst

Apr 2021 – Dec 2021

- Designed and implemented complex **SQL queries** to extract, manipulate, analyze data, and 90% improved **efficiency and accuracy**.
- Utilized advanced Excel including **VLOOKUP, SUMIF, INDEX-MATCH, and pivot tables**, to streamline data analysis processes, reducing manual data manipulation time by 40% and improving reporting accuracy by 25%.
- Developed and optimized **KPIs** Dashboards and reports in Power BI and Tableau to provide **real-time insights** that improved performance tracking and decision-making power by 35%.
- Applied time series analysis and predictive modeling to **forecast trends**, enhancing business planning processes and increasing forecasting accuracy by 25%.

CERTIFICATION AND AWARD

Google Analytics Certification | **Google**

Nov 2023

Volunteer in BALC | **Department of Business analytics at UTD**

Jun 2023

ACADEMIC PROJECTS

HR Analytics for Employee Attrition & Performance (SQL& MongoDB)

Oct 2024

- Developed a SQL & MongoDB database system to analyze employee attrition, performance, and workforce trends. Designed relational and document-based models, built ETL pipelines, and wrote complex queries to uncover key insights on attrition drivers and workforce patterns, providing data-backed recommendations to improve retention and engagement. ([Harshil1919](#))

Credit Risk Analysis Using Machine Learning Models

Jan 2024

- Developed and evaluated credit risk prediction models using XGBoost and neural networks, leveraging data sampling, exploration, feature engineering, and hyperparameter tuning to optimize performance. Utilized one-hot encoding for categorical features. Conducted Deployment and comparative analysis to identify the optimal model based on ROC and AUC metrics. ([github.com](#))

Data Analysis in telecommunication Domain (Power BI)

Nov 2023

- Lead customer churn analysis for the telecommunication sector using Power BI. Developed KPIs and dashboards to monitor customer behavior, identify churn indicators, and predict future churn rates. Leveraged advanced data modeling and DAX functions to provide actionable insights, resulting in a 25% improvement in retention strategies and accurate forecasting of churn trends. ([Harshil Patel](#))

Amazon sales report using Tableau and MySQL

Jan 2023

- Designed and developed Tableau dashboard for Amazon India, leveraging advanced data visualizations to analyze sales by category, courier status, and channels. Implemented interactive maps to showcase regional sales distribution and delivered actionable insights on B2B sales and weekly trends. Optimized performance through calculated fields, filters, and custom visualizations. ([Tableau Public](#))

EDUCATION

The University of Texas at Dallas, Dallas, TX

Jan 2023 – Dec 2024

Master of Science in Business Analytics and Artificial Intelligence

GPA – 3.6

- **Relevant courses:** Database Foundation, Data Visualization, Advance Statistics for Business Analytics, Big Data, Machine Learning, Natural Language Processing, Predictive Analysis, Clouds Computing

Gujarat University, Gujarat, India

Jun 2019 – Apr 2022

Bachelor of Commerce in Accounting and Finance

GPA - 3.7
