

JAMPANA HARSHINI

[Harshini.J](#) | Harshini.jampana@gmail.com | Hayward CA | +(510) 994-6993 |

PROFESSIONAL SUMMARY

Business Analytics graduate with strong hands-on experience in data analysis, data quality validation, and predictive modeling. Proficient in Python, SQL, Tableau, and R, with the ability to clean, model, and visualize complex datasets for decision-making. Adept at performing Exploratory Data Analysis (EDA), feature engineering, and applying machine-learning techniques such as regression and classification. Skilled in communicating insights through dashboards and reports, maintaining data governance standards, and collaborating in cross-functional teams using Git and cloud-based tools (AWS).

SKILLS

Programming & Databases: Python, R, SQL, MongoDB, MySQL, MATLAB, Java

Analytics & ML: Predictive Modeling, NLP, Machine Learning, Deep Learning, Data Visualization, EDA

Tools & Platforms: Tableau, Power BI, AWS, Hadoop, ETL

Statistics: Descriptive & Inferential Statistics, Hypothesis Testing

EDUCATION

California State University East Bay

Aug 2023 – May 2025

Master of Science in Business Analytics

MVGR College of Engineering

Aug 2018 – May 2022

Bachelor's, Computer Science and Engineering

PROFESSIONAL EXPERIENCE

Associate Software Engineer Trainee, Tata Consultancy Services, India

July 2022 – July 2023

- Developed and optimized MongoDB queries for backend data management, improving execution time by 20%.
- Designed NoSQL schemas to support scalable application development.
- Automated data validation processes using Python scripts, increasing accuracy and reducing manual effort.
- Collaborated with developers to integrate data solutions into production workflows.

Web Development Intern – Bala Swecha

June 2020 – July 2020

- Built an interactive educational web application for school children using HTML, CSS, JavaScript, and XML.
- Improved application load speed by 30%, enhancing accessibility across devices.
- Designed intuitive UI features that increased user engagement among the target audience.

PROJECTS

Employee Attrition Analysis

- Designed and implemented predictive models (Random Forest, Decision Tree, Logistic Regression) on HR dataset of **1,470 employees** to forecast attrition risk.
- Discovered key drivers such as salary, job role, and work-life balance, enabling HR teams to create targeted retention strategies.
- Built interactive Tableau dashboards to present findings to stakeholders.

Telecom Customer Churn Analysis

- Developed a churn prediction model using Decision Trees and Gradient Boosting, improving prediction accuracy by 12% over the baseline.
- Analyzed usage patterns, demographics, and customer behavior to identify at-risk segments.
- Created a Tableau dashboard to track churn trends and support strategic decision-making.

Text Classification with NLP

- Preprocessed, tokenized, and vectorized 50,000+ text records for sentiment classification.
- Implemented and tuned a Naive Bayes classifier, achieving 87% accuracy in categorizing sentiment.
- Enhanced feature engineering pipeline to improve model robustness and maintain performance with new data.
