U.S. Permanent Resident (Green Card)

SUMMARY

Highly analytical Data Analyst with 4+ years of experience and a Master's in Computer Science, adept at transforming complex datasets into actionable insights and optimizing ETL workflows. Proficient in SQL, Tableau, Power BI, Python, and cloud platforms (AWS, Azure), with a proven track record in developing interactive dashboards. Eager to leverage technical skills and data governance expertise to drive data-driven decision-making in IT-focused environments. U.S. work-authorized (Green Card).

EXPERIENCE

University of Texas at Arlington | *Data Analyst*

Jul 2023 - Feb 2024

- Enhanced data collection efficiency by 50% through leading a cross-functional team of 12 volunteers, implementing comprehensive data quality assurance protocols, and documenting standardized ETL procedures, ensuring accurate data integration and minimizing data irregularities
- Streamlined data accessibility by 40% through systematic integration and profiling of complex COVID-19 datasets from multiple disparate sources using Advanced Excel, enabling faster data retrieval while maintaining rigorous data validation standards
- Deployed predictive machine learning models using Python to optimize pandemic resource allocation, presenting data-driven insights and recommendations to healthcare officials and non-technical stakeholders to support strategic decision-making

Bricon Building Solutions | *Data Analyst*

Jan 2017 - Nov 2020

- Utilized advanced data mining methodologies and statistical analysis to evaluate product performance, conducting root-cause analysis of irregularities that drove a 15% improvement in conversion rates and a 20% increase in revenue
- Interpreted and analyzed complex statistical data through advanced Excel techniques to identify key trends and patterns, proactively assessing business impact that resulted in a 10% increase in customer engagement and 5% decrease in bounce rate
- Conducted comprehensive data analysis using SQL to extract, transform, and integrate raw data from multiple sources into actionable business insights, directly influencing strategic company decisions and resulting in a 15% increase in profitability
- Designed and maintained comprehensive reports and interactive dashboards using Tableau and Power BI, effectively communicating complex findings and insights to stakeholders and providing real-time oversight of key business metrics

SKILLS

- Programming/Tools:** Python (Pandas, NumPy, Matplotlib, Plotly, Scikit Learn, LangChain) | SQL (JOIN, VIEW, CTE) | Advanced Excel (VLOOKUP, Pivot Table, VBA, Macros) | Streamlit
- Tools/Software:** Tableau | Power BI | MS Excel (Pivot Chart) | Google Sheets | Salesforce CRM Analytics | Jira | Jupyter Notebook
- Database Systems:** MySQL | PostgreSQL | BigQuery
- Cloud Technologies:** AWS | Microsoft Azure
- Other Skills:** Hypothesis Testing | A/B Testing | Regression Analysis | ETL/ELT Processes

EDUCATION

University of Texas at Arlington, Texas, USA | *Master of Science, Computer Science*

National Institute of Technology, Patna, India | *B. Tech., Electronics and Communication Engineering*

PROJECTS

LLM - Equity Research Analysis [[Link](#)]

- Developed the News research tool for the equity research analysis using the multiple article URLs provided by the user
- For cost-cutting per token when OpenAI API is called, only the relevant chunk of the article was used instead of the complete article, using the concept of Semantic Search (used Embedding and Vector Database)
- Used LangChain, OpenAI API, Streamlit for building the application

SQL Data Warehouse [[Link](#)]

- Designed and built a modern data warehouse, applying best practices in ETL/ELT processing, data architecture, data integration, and data modeling for analysis

CERTIFICATIONS

Google Advanced Data Analytics Certificate [[Link](#)] [[Credly Badge](#)]

- Worked on a large dataset, applying data analysis techniques, and building models to extract insights using machine learning, predictive modelling, and statistics

Boston Consulting Group Data Science Virtual Experience Program [[Link](#)]

- Demonstrating skills in business understanding, Exploratory Data Analysis (EDA), Feature Engineering & Modelling, and Findings & recommendations
