

Harshita Thota

📍 Chicago, IL | 📞 773-982-4387 | ✉️ tharshita@gmail.com | [🌐 LinkedIn](#) | [🐙 Github](#)

SUMMARY

Computer Science New Grad with experience in data analysis, relational databases, and interactive dashboards. Proficient in SQL, Python, Excel, PowerBI, and Tableau, with hands-on experience in KPI reporting, NLP-driven predictive modeling, and translating raw data into insights that drive stakeholder decisions. Experienced in managing full project lifecycles from data ingestion and modeling to visualization and stakeholder delivery.

EDUCATION

University of Illinois Urbana-Champaign

Bachelor of Science in Computer Science

Harper College

Associate's in Engineering Science

Champaign, IL

Aug. 2023 – May 2025

Palatine, IL

Aug. 2021 – May 2023

EXPERIENCE

Software Engineer Intern

June 2023 – August 2023

Thoughtwave Software and Solutions — SVM, Naive Bayes, Logistic Regression, Google Colab

Naperville, IL

- Designed **ETL** pipelines to preprocess and transform **5K+** customer records (25 features) using **Pandas** and **NumPy**
- Performed sentiment analysis and classification on customer speech and text data using **TF-IDF** vectorization, combined with supervised ML models yielding **80%** success rate
- Automated FAQ retrieval via DuckDuckGo Search by summarizing customer conversations with **SpaCy**, **SVM** and **Naive Bayes** models to extract key themes and frequent keywords, improving response efficiency by **~25%**
- Developed interactive **PowerBI** dashboards to visualize keyword trends, and customer demographics, enabling analysis of satisfaction levels, and resolution outcomes
- Presented user behavior insights via **PowerPoint** and collaborated with stakeholders to inform product strategy

PROJECTS

S&P 500 Insights Dashboard

May 2025

🔗 Interactive Notebook — Python, Pandas, Matplotlib, Seaborn, Plotly

Champaign, IL

- Processed **~50K** daily S&P500 records with **Pandas** to compute finance **KPIs**: average daily return, volatility, cumulative return, max drawdown, and return-dividend yield correlation
- Visualized S&P500 price history and **60-month** average returns with **Matplotlib** and **Seaborn** (highlighting **~56%** max drawdown) and built a **Plotly** scatter of 500 points with hover tooltips to explore return vs. dividend yield

Unicorn Company Analytics

April 2025

🔗 Interactive Dashboard — Microsoft Excel

Champaign, IL

- Built a descriptive Excel dashboard to track unicorn **KPIs** time to unicorn, investor activity, and regional trends
- Applied IF, SUBSTITUTE, and VLOOKUP for **data cleaning** and transforming funding metrics
- Analyzed patterns with **pivot tables**, **charts**, and **slicers** to explore investor frequency and industry growth

Curriculum Crafter

August 2024 – December 2024

🔗 Database Systems — SQLite, Scrapy, React, D3.js

Champaign, IL

- Built a React-Python app to generate dynamic course schedules based on students' history and academic goals
- Scraped university course catalog and AP credit websites using **Scrapy**, then transformed the data using **Pandas**
- Troubleshoot data inconsistencies and schema mismatches across departments to ensure end-to-end data reliability
- Optimized course retrieval speeds by **25%** in **SQLite** through strategic indexing, selective column retrieval, efficient joins, early filtering, and query restructuring to minimize subqueries
- Enforced credit tracking and constraints via **stored procedures** and **triggers** reducing data entry errors by **20%**

RESEARCH & CERTIFICATIONS

🔗 **NLP Model Comparison Report**: BERT vs. Logistic Regression for Customer Sentiment Classification

🔗 **Google Cloud Certified – Generative AI Fundamentals**: Completed via Google Cloud Skills Boost

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, SQL, MongoDB, HTML, CSS

Libraries/Frameworks: Pandas, NumPy, Scikit-learn, SciPy, Seaborn, Matplotlib, TensorFlow, PyTorch, Scrapy

Tools/Platforms: Excel, Tableau, Power BI, SQLite, PowerPoint, GitHub, Oracle Cloud DB, VS Code, Jupyter Notebook, Slack, Microsoft Teams

Data/ML Skills: Data Cleaning, Data Transformation, Descriptive Analytics, Statistical Analysis, NLP(SpaCy, NLTK, Gensim), Generative AI
